新版1Z0-1042-25題庫 - 1Z0-1042-25考試大綱

從專門的考試角度來看，有必要教你關於考試的技巧，你需要智取，不要給你的未來失敗的機會，KaoGuTi培訓資源是個很了不起的資源網站，包括了Oracle的1Z0-1042-25考試材料，研究材料，技術材料。認證培訓和詳細的解釋和答案。考古題網站在近幾年激增，這可能是導致你準備Oracle的1Z0-1042-25考試認證毫無頭緒。KaoGuTi Oracle的1Z0-1042-25考試培訓資料是一些專業人士和通過了的考生用實踐證明了的有效的培訓資料，它可以幫助你通過考試認證。

Oracle 1Z0-1042-25 考試大綱：

主題	簡介
主題 1	Using OIC Connections & Adapters: This section evaluates the expertise of Integration Developers and Solution Architects in creating and configuring OIC connections. It includes setting up trigger and invoke connections, understanding the role of the Connectivity Agent, and effectively using adapters to connect cloud and on-premises applications seamlessly.
主題 2	Creating Scheduled Integrations: This domain measures the skills of Automation Engineers and Cloud Administrators in defining integration schedules and converting scheduled integrations to app-driven ones. It also includes using scheduled parameters to automate workflows efficiently.
主題 3	Creating Orchestrated Integrations: This section tests the knowledge of Orchestration Developers and Business Process Analysts in managing orchestrated integrations within OIC. It includes using lookups, data mappers, and custom JavaScript libraries, configuring orchestration flow actions, implementing file handling options, and leveraging the fault-handling framework to manage errors effectively.

主題 4	Testing, Monitoring, and Troubleshooting Integrations: This section assesses the abilities of Support Engineers and Integration Administrators in managing integration lifecycles. It includes activating and deactivating integrations, testing REST-triggered integrations, importing and exporting integrations, as well as monitoring and troubleshooting integration instances to ensure smooth operations.
主題 5	Getting Started with OIC Integrations: This section of the exam measures the skills of Integration Specialists and Cloud Engineers in understanding the foundational components of Oracle Integration Cloud (OIC). It covers key integration concepts, how integrations work, and web services fundamentals such as WSDL, SOAP, REST, and JSON. The focus is on building a strong understanding of OIC's integration capabilities.

最新的 Oracle Cloud Infrastructure 1Z0-1042-25 免費考試真題 (Q96-Q101):

問題 #96

Which Oracle Integration (OIC) XPath function can be used to retrieve data from an OIC Lookup within the Map Editor?

- A. getLookup
- B. get-content-as-string
- C. lookupValue
- D. get-value-from-lookup

答案: C

解題說明:

Comprehensive and Detailed Explanation:

XPath in Mapper:

D:True-lookupValue retrieves lookup data.

問題 #97

You can recover unsaved changes in an Oracle Integration (OIC) integration that crashes during design time because of a browser crash or loss of network connectivity. Which statement is NOT valid with regard to this feature?

- A. Changes made while working inside the Map Editor cannot be recovered.
- B. Changes made while editing a Connections page cannot be recovered.
- C. A backup copy is created after each completed task, therefore there is no time limit to logging back in and recovering your changes.
- D. A user with the ServiceAdministrator role can unlock an integration that has unsaved changes.
- E. A user with the ServiceAdministrator role can recover the unsaved changes.

答案: A

解題說明:

Comprehensive and Detailed Explanation:

Recovery Feature:

E:False-mapper changes recoverable.

問題 #98

A company has been using Oracle Integration Cloud (OIC) to integrate its business applications, such as Oracle HCM Cloud, Oracle ERP Cloud, and Salesforce. However, they are planning to migrate some of their integration workloads from their current OIC instance to a new instance in a different region to comply with data sovereignty regulations. Which statement is true regarding the exporting and importing of integrations?

- A. You cannot import an integration if it already exists with the same identifier and version.
- B. You can export an integration either as a separate file (IAR) or bundled in a package (PAR) and it will still contain the connection resources.

- C. You can import a package containing activated integrations.
- D. To change an integration identifier or version, you can manually edit the exported integration (IAR) file before importing it into another instance.

答案： A

解題說明：

Comprehensive and Detailed Explanation:

Migration involves exporting and importing:

Option A: False - manually editing IAR files is not supported; identifiers and versions are managed within OIC.

Option B: True - OIC prevents importing an integration if an identical identifier and version exist in the target instance to avoid conflicts.

Option C: Partially true - IAR or PAR files include connection metadata, but not sensitive data (e.g., credentials), and "still contain" is vague; B is clearer.

Option D: False - imported integrations (even in packages) are inactive by default and require activation post-import.

B ensures uniqueness and integrity during migration.

問題 #99

When considering the configuration of APIs, Services, and Service Accounts in the API Platform Cloud Service, which two statements are valid?

- A. An API Platform policy can be configured to reference another policy to override credentials information.
- **B. A Service Account defines the security credentials required to invoke a back-end service.**
- C. A Service must include a Service Account reference to invoke a back-end service.
- **D. An API references Services and Service Accounts through the policies defining the API.**
- E. A Service Account is limited to using OAuth credentials only for defining security because Services can be configured to define Basic Authentication.

答案： B,D

解題說明：

C: API references Services and Service Accounts through policies.

E: Service Accounts store credentials to access backend resources.

Incorrect options:

A: Service Accounts can store multiple types of credentials.

B: A service doesn't necessarily require a Service Account.

D: API policies inherit credentials but don't override them easily.

問題 #100

Which two statements are true about the Internet of Things (IoT)?

- **A. Cloud technology is well-suited to enable IoT, offering agility, low costs, and excellent resource utilization.**
- B. IoT is not useful in asset-tracking scenarios due to the unavailability of low-cost connected devices and sensors.
- C. Using IoT, hospitality-based businesses can track customer behavior to deliver rewards and tailored services.
- **D. Different IoT approaches need to integrate technologies like mobile, cloud, big data, and analytics, connecting everyday objects to each other and the Internet.**

答案： A,D

問題 #101

.....

如果你想在短時間內，以最小的努力，達到最有效果的結果Oracle的1Z0-1042-25考試準備，你可以使用KaoGuTi Oracle的1Z0-1042-25考試培訓資料，KaoGuTi的培訓資料是通過實踐檢驗了的，也是通過眾多考生證明了它確實可以百分百通過考試，利用了它，你將達到你的目的，得到最佳的效果。
