Our Apigee-API-Engineer qualification test closely follow changes in the exam outline and practice. In order to provide effective help to customers, on the one hand, the problems of our Apigee-API-Engineer test guides are designed fitting to the latest and basic knowledge. For difficult knowledge, we will use examples and chart to help you learn better. On the other hand, our Apigee-API-Engineer test guides also focus on key knowledge and points that are difficult to understand to help customers better absorb knowledge. Only when you personally experience our Apigee-API-Engineer qualification test can you better feel the benefits of our products. Join us soon.

Google Apigee-API-Engineer Certification Exam covers a wide range of topics from API design, development, testing, and deployment to security and monitoring. Apigee-API-Engineer exam is designed to test an individual's ability to develop and maintain scalable and reliable API solutions using the Google Cloud Platform. Apigee-API-Engineer exam also covers the use of Apigee, a leading API management platform that provides a range of tools and services to help developers build and manage APIs.

To pass the exam, you'll need a combination of experience and study. Google recommends that you have at least 3 years of experience working with APIs and a deep understanding of RESTful API design principles. You can also prepare for the exam by taking online courses, reviewing the Apigee documentation, and practicing with exam-style questions.

## Google Apigee-API-Engineer Reliable Test Simulator - Valid Apigee-API-Engineer Exam Answers

Perhaps you have seen too many Apigee-API-Engineer exam questions on the market and you are tired now. But our Apigee-API-Engineer preparation quiz can really give you a different feeling. We have conducted research specifically on the current youth market, so we are very clear about what young people like today. Our Apigee-API-Engineer learning guide combine professional knowledge and trends to make you fall in love with learning!

Google Apigee-API-Engineer Certification Exam is designed for professionals who already have a solid understanding of APIs and their underlying technologies. Apigee-API-Engineer exam covers topics such as API design, security, performance, and analytics. It also tests your knowledge of Apigee's features and functionality, so you can effectively leverage the platform to manage your organization's APIs.

## Google Cloud - Apigee Certified API Engineer Sample Questions (Q62-Q67):

### NEW QUESTION # 62

As an API Engineer you are approached late in the day with an emergency request to configure a 2 way TLS connection between Apigee and the backend server. All existing certificates have been revoked. The security team provides you the PEM file for the backend server and your new Apigee TLS certificate. What minimum steps are required to reconfigure 2-way TLS?

Choose 2 answers

- A. Use the KVM to store the contents of the PEM file.
- B. Add the backend servers PEM file to the trust store.
- C. Add your Apigee TLS certificate to the key store.
- D. Add the backend servers PEM file to the key store.
- E. Use the Access Control Policy to reference the PEM file
- F. Add the backend certificate chain to the trust store

**Answer: A,D**

### NEW QUESTION # 63

A cloud customer wants to safeguard their APIs against a sudden increase in traffic. You need to calculate an allowable traffic rate of 100 transactions per second (TPS) What should you do?

- A. Use a Quota enforcement policy set to limit throughput to 100 TPS
- B. Use a default Spike Arrest policy setting the limit to 100 TPS
- C. Use a Spike Arrest policy setting the UseEffectiveCount parameter
- D. Keep a count of accesses in the back-end, rejecting queries when they exceed 100 TPS

**Answer: B**

### NEW QUESTION # 64

The performance testing team would like to improve the transactions per second for an API you recently developed. The API retrieves partner names and contact information. What should you do?

- A. Add an Assign Message Policy
- B. Add a Spike Arrest Policy
- C. Add Caching Policies
- D. Add a Statistics Collector Policy

**Answer: D**

### NEW QUESTION # 65

Which are characteristics of the PopulateCache and ResponseCache policies'? Select all that are correct

- A. PopulateCache allows you to cache any string object.
- B. ResponseCache caches the complete HTTP response (including headers).
- C. PopulateCache has a TimeOfDay expiry option
- D. ResponseCache has separate policy definitions for Lookup vs. Populate cache operations.

**Answer: D**

### NEW QUESTION # 66

What are all of the values typically set in a Raise Fault policy?

- A. Status Code, Reason Phrase, and Payload
- B. Error Code, Reason Phrase, and Payload
- C. Status Code, Error Code, and Payload
- D. None of the above

## • E. Status Code and Payload

**Answer: B**

## NEW QUESTION # 67
