

Valid CDCP Real Test, CDCP Study Tool

BONUS!!! Download part of DumpExam CDCP dumps for free: <https://drive.google.com/open?id=1r4LxyeWBa74OSWXGBDbPuQE8Me5hWUVj>

On the one hand, our company hired the top experts in each qualification examination field to write the CDCP training materials, so as to ensure that our products have a very high quality, so that users can rest assured that the use of our research materials. On the other hand, under the guidance of high quality research materials, the rate of adoption of the CDCP Study Materials preparation is up to 98% to 100%. Of course, it is necessary to qualify for a qualifying exam, but more importantly, you will have more opportunities to get promoted in the workplace.

EXIN CDCP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Raised Floor• Suspended Ceiling: The topic discusses applicable standards, signal reference grid, and disability act and regulations.
Topic 2	<ul style="list-style-type: none">• Fire Safety• Protection: This topic gives an understanding of standards for fire suppression, detection systems, total flooding fire suppression techniques, and handheld extinguishers. Additionally, it covers Signage and safety.
Topic 3	<ul style="list-style-type: none">• Cooling Infrastructure: The topic focuses on liquid immersion cooling, supplemental cooling options, sensible and latent heat definitions, and temperature and humidity recommendations.
Topic 4	<ul style="list-style-type: none">• Equipment Racks: It discusses power rail• strip options, security considerations, and rack standards, properties and selection criteria.
Topic 5	<ul style="list-style-type: none">• Light: This topic covers light fixture types and placement, emergency lighting, and emergency Power Supply (EPS).
Topic 6	<ul style="list-style-type: none">• Power Infrastructure: It focuses ATS and STS systems, redundancy levels and techniques, static and dynamic UPS systems, battery types, thermo-graphics, and renewable energy factor (REF).
Topic 7	<ul style="list-style-type: none">• Designing a Scalable Network Infrastructure: It covers ANSI• TIA-942 cabling hierarchy, network redundancy, structured Cabling System, and planning considerations.

CDCP Study Tool, New CDCP Exam Pass4sure

Our website just believe in offering cost-efficient and time-saving CDCP exam braindumps to our customers that help them get high passing score easier. Our valid CDCP test questions can be instantly downloaded and easy to understand with our 100% correct

exam answers. One-year free update right will enable you get the latest CDCP VCE Dumps anytime and you just need to check your mailbox.

EXIN Certified Data Centre Professional (CDCP) Sample Questions (Q27-Q32):

NEW QUESTION # 27

Can Electro Magnetic Fields (EMF) cause data centre failures?

- A. Yes, but only EMF caused by lightning strikes.
- B. No, only power issues will cause data centre failures.
- **C. Yes, high levels of EMF can cause data centre failures.**
- D. No, only cooling issues will cause data centre failures.

Answer: C

Explanation:

According to the EPI Data Centre Training Framework, EMF is a form of electromagnetic interference (EMI) that can disrupt or damage the normal operation of electronic devices, such as servers, network cables, and IT equipment¹. High levels of EMF can be generated by power equipment, cell phones, microwaves, TV and radio signals, etc., and can cause data corruption, data loss, system malfunction, and crashes²³. Therefore, EMF can cause data centre failures and affect the availability, performance, and security of the data centre. To prevent or mitigate EMF, data centres should follow the best practices for data centre design, layout, cabling, grounding, shielding, and testing¹⁴.

NEW QUESTION # 28

Which Class of Fire involves combustible metals or combustible metal alloys such as magnesium, sodium and potassium?

- A. Class C
- B. Class B
- C. Class A
- **D. Class D**

Answer: D

Explanation:

Class D fires involve combustible metals or combustible metal alloys such as magnesium, sodium and potassium. These metals can react violently with water, air, or other chemicals, and require special extinguishing agents¹. References: 1: EPI Data Centre Professional (CDCP®) Reference Materials, page 16.

NEW QUESTION # 29

From the list below, which sensor detects smoke the fastest?

- A. Sprinkler bulbs
- B. Photoelectric detector
- C. Ionization detector
- **D. VESDA/HSSD**

Answer: D

Explanation:

VESDA (Very Early Smoke Detection Apparatus) or HSSD (High Sensitivity Smoke Detection) systems are the fastest smoke sensors among the options listed. These systems use a network of pipes to draw air samples from the protected area and analyze them using a laser-based detection chamber. VESDA/HSSD systems can detect smoke at very low concentrations, typically in the range of 0.005 to 20 percent obscuration per meter.

This means they can provide early warning of a fire before it becomes visible or spreads. VESDA/HSSD systems are ideal for data centers and other critical facilities that require high levels of fire protection and minimal downtime.

NEW QUESTION # 30

Which Class of Fires involves ordinary combustible materials such as paper, wood and cloth?

- A. Class B
- B. Class D
- C. Class K
- **D. Class A**

Answer: D

Explanation:

According to the CDCP® Preparation Guide, Class A fires involve ordinary combustible materials such as paper, wood and cloth. These materials leave behind ash or embers when they burn. Class A fires can be extinguished by water or other cooling agents that reduce the temperature of the fuel below its ignition point.

NEW QUESTION # 31

What is a requirement of an FM200 (HFC-227) installation?

- A. Drainage system under the raised floor.
- B. Install pre-action sprinklers in the same room as the FM200.
- **C. It is a high-pressure gas; therefore nozzles must be mounted with two brackets.**
- D. Install the gas containers (tanks) close to the data centre.

Answer: C

Explanation:

FM200 (HFC-227) is a clean agent fire suppression system that uses a high-pressure gas to extinguish fires by reducing the oxygen concentration and absorbing the heat. FM200 is stored in cylinders at pressures of up to 42 bar (600 psi) and is released through nozzles into the protected area. Because of the high pressure, the nozzles must be mounted with two brackets to prevent them from moving or breaking during discharge. The brackets must be securely attached to the ceiling or wall and aligned with the nozzle outlet. The nozzle outlet must also be free of any obstructions that could affect the discharge pattern or distribution.
