## Interactive HPE6-A86 Testing Engine - New HPE6-A86 Test Tips

Our company committed all versions of HPE6-A86 practice materials attached with free update service. When HPE6-A86 exam preparation has new updates, the customer services staff will send you the latest version. So we never stop the pace of offering the best services and HPE6-A86 practice materials for you. And we offer you the free demo of our HPE6-A86 Learning Materials to check the quality before payment. Tens of thousands of candidates have fostered learning abilities by using our HPE6-A86 Learning materials you can be one of them definitely.

## HPE Network Switching Associate Exam Sample Questions (Q12-Q17):

### NEW QUESTION # 12

What does the show logging command display on an Aruba switch?

- A. VLAN assignments
- B. System logs and event messages
- C. Running configuration
- D. IP routing table

**Answer: B**

Explanation:

The show logging command on an Aruba switch is used to display the system logs and event messages. These logs typically include information about the switch's operation, errors, system events, warnings, and other messages related to the switch's performance and health. This command helps administrators monitor and troubleshoot the switch.

### NEW QUESTION # 13

A Solutions Architect is presenting a network design that includes both campus access layer switches (like the CX 6300) and data center switches (like the CX 8325). The customer is concerned about the complexity of managing different operating systems. What is a key software differentiator of the HPE Aruba Networking switching portfolio that addresses this concern?

- A. The switches can be ordered with a choice of either AOS-CX or a third-party open network operating system.
- **B. All CX switches run the same network operating system, AOS-CX, providing a consistent experience.**
- C. Each switch series runs a completely different operating system optimized for its specific role.
- D. The data center switches run AOS-CX, while the campus switches run the legacy ArubaOS-Switch software.

**Answer: B**

### NEW QUESTION # 14

Which attributes are true about UDP? (Choose two.)

- **A. connectionless**
- B. requires an established connection
- C. uses sequence numbers
- D. supports retransmission
- **E. used for latency-sensitive traffic**

**Answer: A,E**

### NEW QUESTION # 15

Suppose that a router has learned about network 172.18.37.0/24 from three sources ?OSPF, Internal BGP, and a static route. Which statement is true about this router's path selection?

- A. The router chooses the option with the highest administrative distance.
- B. The router chooses the OSPF route, because it is trusted more than BGP.
- **C. The router chooses the static route.**
- D. The router chooses the best path based on the lowest cost.

**Answer: C**

### NEW QUESTION # 16

A Support Technician is helping a customer identify a switch model that has redundant, hot-swappable power supplies to ensure high availability.

Which hardware feature is a key differentiator for switch models designed for high availability, such as the Aruba CX 6300M or the CX 6400 series?

- A. Fixed, internal power supplies.
- B. A single, field-replaceable power supply unit.
- **C. Dual, load-sharing, hot-swappable power supply bays.**
- D. Support for Power over Ethernet (PoE).

**Answer: C**

### NEW QUESTION # 17

.....
