You will never be disappointed.

SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q54-Q59):

NEW QUESTION # 54
What color have blockers that have an information purpose?

- A. Blue
- B. Red
- C. White
- D. Green

Answer: A

Explanation:
Blockers in SAP Signavio Process Intelligence are visual indicators used in process analysis to highlight specific conditions or issues, such as delays or errors. The documentation specifies their color coding:
* Exact Extract:"Blockers with an information purpose, such as highlighting specific process steps or conditions for informational purposes, are displayed in blue. This distinguishes them from blockers indicating warnings (yellow) or critical issues (red)." (SAP Signavio Process Intelligence User Guide, section on "Blockers and Visual Indicators").
* Explanation:
* Option A (Blue):Blue blockers are used to mark informational elements, such as steps that require attention for analysis but are not necessarily problematic. For example, a blue blocker might highlight a step with high variability for further investigation.
* Option B (White)is incorrect as white is not used for blockers; it may be a background or neutral color in visualizations.
* Option C (Green)is incorrect because green typically indicates positive or compliant states, not informational blockers.
* Option D (Red)is incorrect as red blockers signify critical issues, such as errors or significant delays.
Reference:SAP Signavio Process Intelligence User Guide, section on "Blockers and Visual Indicators"; SAP Certified Associate - Process Data Analyst Study Guide, Chapter 4: Process Visualization.

NEW QUESTION # 55
Which feature in SAP Signavio allows for the visualization of process variations over time?

- A. Variant Explorer
- B. Process Discovery Widget
- C. Over Time Widget
- D. Process Performance Dashboard

Answer: C

NEW QUESTION # 56
How can a metric be created in SAP Signavio Process Intelligence?Note: There are 3correct answers to this question.

- A. Create a JSON file.
- B. Import a metric based on a JSON file.
- C. Add a metric from the library.
- D. Create a custom metric.
- E. Import a metric from SAP Signavio Process Manager.

Answer: B,C,D

Explanation:
In SAP Signavio Process Intelligence, metrics can be created in several ways to suit different requirements and complexities. Users can create custom metrics tailored to specific process analysis needs, add predefined metrics from a library that provides a range of commonly used metrics, or import metrics defined in a JSON file, which allows for complex and detailed metric definitions and reusability across different analyses.

NEW QUESTION # 57
Which are the main aspects of filters in SAP Signavio Process Intelligence?Note: There are 2 correct answ-ers to this que-stion.

Answer:

Explanation:
A.D

NEW QUESTION # 58
