

How You Can Pass the Oracle 1z0-1110-25 Exam On First Attempt

2026 Latest ITExamSimulator 1z0-1110-25 PDF Dumps and 1z0-1110-25 Exam Engine Free Share:
<https://drive.google.com/open?id=1Pyvvn1vkTCmbRm3U4ZXF7AyUml-9av4i>

Boring life will wear down your passion for life. It is time for you to make changes. Our 1z0-1110-25 training materials are specially prepared for you. In addition, learning is becoming popular among all age groups. After you purchase our 1z0-1110-25 Study Guide, you can make the best use of your spare time to update your knowledge. For we have three varied versions of our 1z0-1110-25 learning questions for you to choose so that you can study at different conditions.

When it comes to a swift 1z0-1110-25 exam preparation with the best reward, nothing compares ITExamSimulator 1z0-1110-25 dumps. They are made with an aim to provide you the most relevant information and knowledge within a few days and ensure you a brilliant success. Each 1z0-1110-25 Exam Dumps is unique and vitally important for your preparation. The work you are supposed to do have already been done by our highly trained professionals.

1z0-1110-25 Reliable Exam Practice | 1z0-1110-25 Reliable Exam Materials

ITExamSimulator provides you with free demos of its Oracle Cloud Infrastructure 2025 Data Science Professional 1z0-1110-25 exam product. You can try a free demo to eliminate any confusion regarding the authenticity of our Oracle Cloud Infrastructure 2025 Data Science Professional 1z0-1110-25 PDF and practice tests (web-based & desktop software). It is also our policy to facilitate you with 1z0-1110-25 free actual dumps updates in case of new Oracle Cloud Infrastructure 2025 Data Science Professional 1z0-1110-25 test changes within three months of your shopping. Contact us any time, if you need any guidance about our Oracle 1z0-1110-25 exam product. There is only one way to get all these amazing 1z0-1110-25 exam dumps offers and that is purchasing our product today.

Oracle Cloud Infrastructure 2025 Data Science Professional Sample Questions (Q96-Q101):

NEW QUESTION # 96

You are working as a data scientist for a healthcare company. They decide to analyze the data to find patterns in a large volume of electronic medical records. You are asked to build a PySpark solution to analyze these records in a JupyterLab notebook. What is the order of recommended steps to develop a PySpark application in Oracle Cloud Infrastructure (OCI) Data Science?

- A. Configure core-site.xml, install a PySpark conda environment, create a Data Flow application with the Accelerated Data Science (ADS) SDK, develop your PySpark application, launch a notebook session
- B. Install a Spark conda environment, configure core-site.xml, launch a notebook session, create a Data Flow application with the Accelerated Data Science (ADS) SDK, develop your PySpark application
- C. Launch a notebook session, configure core-site.xml, install a PySpark conda environment, develop your PySpark application, create a Data Flow application with the Accelerated Data Science (ADS) SDK
- D. Launch a notebook session, install a PySpark conda environment, configure core-site.xml, develop your PySpark application, create a Data Flow application with the Accelerated Data Science (ADS) SDK

Answer: D

Explanation:

Detailed Answer in Step-by-Step Solution:

* Objective: Sequence steps for PySpark app development.

* Steps:

* Launch notebook: First-sets up environment.

* Install PySpark conda: Second-adds Spark libraries.

* Configure core-site.xml: Third-connects to data.

* Develop app: Fourth-writes code.

* Data Flow: Fifth-scales (optional).

* Evaluate: D (1, 2, 3, 4, 5) matches this logical order.

* Reasoning: Notebook first, then setup and coding.

* Conclusion: D is correct.

OCI documentation states: "1) Launch a notebook session, 2) install a PySpark conda env, 3) configure core- site.xml, 4) develop your PySpark app, 5) optionally use Data Flow (D)." Other orders (A, B, C) misplace notebook launch or config-D is correct.

Oracle Cloud Infrastructure Data Science Documentation, "PySpark Development".

NEW QUESTION # 97

Which technique can be used for feature engineering in the machine learning lifecycle?

- A. Support Vector Machines (SVM)
- B. K-means clustering
- C. Gradient boosting
- D. Principal Component Analysis (PCA)

Answer: D

Explanation:

Detailed Answer in Step-by-Step Solution:

* Objective: Identify a feature engineering technique in ML.

* Understand Feature Engineering: Transforms raw data into model-ready features.

* Evaluate Options:

* A. PCA: Reduces dimensionality-feature engineering-correct.

* B. K-means: Clustering model-not feature engineering.

* C. SVM: Classification model-not feature engineering.

* D. Gradient boosting: Model training-not feature engineering.

* Reasoning: PCA creates new features via transformation-fits definition.

* Conclusion: A is correct.

OCI documentation states: "Feature engineering techniques like Principal Component Analysis (PCA) (A) transform data into new features to enhance model performance." B, C, and D are modeling techniques-only A aligns with OCI's feature engineering stage.

Oracle Cloud Infrastructure Data Science Documentation, "Feature Engineering Techniques".

NEW QUESTION # 98

Which statement about resource principals is true?

- A. When you authenticate using a resource principal, you need to create and manage credentials to access OCI resources.
- B. The Data Science service does not provide authentication via a notebook session's or job run's resource principal to access other OCI resources.
- C. A resource principal is not a secure way to authenticate to resources, compared to the OCI configuration and API key approach.
- D. A resource principal is a feature of IAM that enables resources to be authorized principal actors.

Answer: D

Explanation:

Detailed Answer in Step-by-Step Solution:

* Define Resource Principals: They allow OCI resources (e.g., notebook sessions) to authenticate to other OCI services without user credentials.

* Evaluate Options:

- * A: False-Resource principals eliminate manual credential management.
- * B: False-They're secure, leveraging IAM policies, not less secure than API keys.
- * C: False-Data Science supports resource principals for accessing resources (e.g., Object Storage).
- * D: True-Resource principals are an IAM feature authorizing resources as actors.

* Reasoning: D captures the essence of resource principals as an IAM mechanism.

* Conclusion: D is correct.

OCI documentation states: "A resource principal is an IAM feature that enables OCI resources, such as compute instances or notebook sessions, to act as principal actors and authenticate to other OCI services using policies." This refutes A (no credentials needed), B (secure method), and C (supported in Data Science), making D the accurate statement.

Oracle Cloud Infrastructure IAM Documentation, "Resource Principals".

NEW QUESTION # 99

Which Oracle Cloud Service provides restricted access to target resources?

- A. Load Balancer
- B. Internet Gateway
- C. SSL Certificate
- D. Bastion

Answer: D

Explanation:

Detailed Answer in Step-by-Step Solution:

* Objective: Identify the OCI service for restricted resource access.

* Evaluate Options:

- * A: Bastion-Secure, temporary access to resources-correct.
- * B: Internet Gateway-Public access, not restricted.
- * C: Load Balancer-Distributes traffic, not access control.
- * D: SSL Certificate-Secures comms, not access.

* Reasoning: Bastion limits access (e.g., SSH) to specific targets.

* Conclusion: A is correct.

OCI documentation states: "OCI Bastion (A) provides restricted, audited access to target resources like instances, typically via SSH." B, C, and D don't restrict-only A fits per OCI's security services.

Oracle Cloud Infrastructure Bastion Documentation, "Overview".

NEW QUESTION # 100

Which CLI command allows the customized conda environment to be shared with co-workers?

- A. odsc conda publish
- B. odsc conda clone
- C. odsc conda install
- D. odsc conda modify

Answer: A

Explanation:

Detailed Answer in Step-by-Step Solution:

- * Objective: Share a custom conda environment in OCI Data Science.
- * Understand Commands: OCI provides odsc CLI for environment management.

* Evaluate Options:

- * A: clone duplicates an environment locally-not for sharing.
- * B: publish uploads the environment to Object Storage for team access-correct.
- * C: modify doesn't exist as a standard command.

- * D: install sets up an environment locally-not for sharing.

* Reasoning: Sharing requires publishing to a shared location (Object Storage), which publish achieves.

* Conclusion: B is the correct command.

The OCI Data Science CLI documentation states: "Use odsc conda publish to package and upload a custom conda environment to an Object Storage Bucket, making it accessible to other users." clone (A) is for local duplication, modify (C) isn't valid, and install (D) is for local setup-not sharing. B is the designated sharing mechanism.

Oracle Cloud Infrastructure Data Science CLI Reference, "odsc conda publish".

NEW QUESTION # 101

.....

Choose the right format of Oracle 1z0-1110-25 actual questions and start 1z0-1110-25 preparation today. Top Notch Oracle 1z0-1110-25 Actual Dumps Are Ready for Download. Now is the ideal time to prepare for and crack the Oracle 1z0-1110-25 Exam. To do this, you just need to enroll in the 1z0-1110-25 examination and start preparation with top-notch and updated Oracle 1z0-1110-25 actual exam dumps.
