- A. Process proportion equals some desired value
- B. When we deal with Attribute type data
- C. Process proportion equals some value range
- D. Proportion of the tail is equal
- E. Target is current

Answer: A,B

NEW QUESTION # 175

SCENARIO A Six Sigma team is measuring the moisture content of corn starch as it leaves the conveyer belt of a dryer. They collect one sample four cups of starch at times indicated in the chart at fixed locations labeled A, B, C, and D across the end of the belt. See the diagram below.

Find the sample linear correlation coefficient and the sample coefficient of determination for the data in problem VI.11.

- A. 0.33, 0.11

- B. 0.83, 0.69
- C. 0.49, 0.24
- D. 0.74, 0.55

Answer: C

NEW QUESTION # 176

When an organization is identifying a Six Sigma project, a Black Belt should work with area management to determine the

- A. rolled throughput yield
- B. needs of the business
- C. measurement system requirements
- D. process capability as Cpk

Answer: B

Explanation:

The correct answer is C. needs of the business . The CSSBB supplemental material explains that organizations should align business by process to achieve business objectives and discusses methods for selecting high-impact projects . It also states that the project selection strategy aligns projects with specific short- and long-term business strategies . This shows that when identifying a Six Sigma project, the Black Belt should work with area management first to understand what the business actually needs.

Metrics such as rolled throughput yield, Cpk, or measurement system requirements may become important later in project definition and measurement, but they are not the first strategic basis for deciding which project to pursue. Six Sigma projects should be chosen because they address meaningful business priorities such as customer needs, cost, delivery, quality, or strategic objectives.

Therefore, the project-identification discussion with management should center first on the needs of the business , making C the verified CSSBB answer.

NEW QUESTION # 177

.....

With "reliable credit" as the soul of our CSSBB study tool, "utmost service consciousness" as the management philosophy, we endeavor to provide customers with high quality service.
