So our experts highlights the new type of questions and add updates into the ISO-14001-Lead-Auditor practice materials, and look for shifts closely when them take place. At the same time, as we can see that the electronic devices are changing our life day by day, our ISO-14001-Lead-Auditor study questions are also developed to apply all kinds of electronic devices.

PECB Certified EMS ISO 14001 Lead Auditor Exam Sample Questions (Q14-Q19):

NEW QUESTION # 14

Whistlekleen is a national dry cleaning and laundry organisation with 50 shops. You are conducting an EMS surveillance audit of Head Office and are sampling environmental performance measurement. You find that 80 per cent of failures to meet performance criteria originate from five shops in the same region. Most of these failures relate to the release of volatile organic compounds (VOCs) that exceeds regulations. The Environmental Manager tells you that these are the oldest shops in the organisation. The cleaning equipment needs replacing but the organisation cannot afford it at the moment. On raising the matter with senior management, you are told that there are plans to replace the equipment in these shops over the next five years.

Select two options that apply to how you should respond to the information given.

- A. Evaluate whether the process for measuring environmental performance is effective
- B. Extend the audit plan to include the five shops
- C. Raise an opportunity for improvement (OI) to reduce damaging emissions
- D. Criticise the equipment replacement period as being too environmentally damaging for too long
- E. Recommend that staff in the five shops should have medical check-ups due to air pollution
- F. Determine if the local authority has been informed that the organisation is exceeding VOC emissions

Answer: A,F

NEW QUESTION # 15

You are conducting a Stage 2 certification audit of VitalSpark, a pharmaceutical organisation manufacturing vitamins and other healthcare medicines. In a separate area in the centre of their large site, a supplier produces oxygen supplies piped directly into the manufacturing processes of VitalSpark. They also deliver oxygen in bulk tankers to other customers. When you review the environmental aspects register, you find that the only environmental aspect recorded for this arrangement relates to the heavy goods vehicles of the supplier transiting the site.

You ask the EMS Manager about the environmental consequences to VitalSpark of this arrangement and are told that they are not significant since the supplier has its own services for water, sewage, waste and energy.

The EMS Manager tried unsuccessfully to communicate with the supplier who is located inside the VitalSpark site and outside the scope of the EMS.

You raise a non-conformance against clause 6.1.2 of ISO 14001:

"VitalSpark does not maintain documented information on aspects/impacts related to activities, products and services of the oxygen supplier." Which combination of two of the following actions proposed by VitalSpark would permit you to close out the nonconformity?

- A. VitalSpark will suggest that the oxygen supplier should undertake training in environmental awareness.
- B. VitalSpark will retrieve environmental data on a monthly basis from the on-site supplier.
- C. VitalSpark will expand its audit programme to include audits of the oxygen supplier's organisation.
- D. The oxygen supplier will be requested to undertake a full environmental survey of its processes.
- E. The oxygen supplier will be requested to implement an ISO 14001 management system within the next 3 months.
- F. VitalSpark will update its documented information on aspects/impacts to include those related to the oxygen supplier.

Answer: B,F

NEW QUESTION # 16

You are conducting a Stage 2 certification audit of VitalSpark, a pharmaceutical organisation manufacturing vitamins and other

healthcare medicines.

In a separate area in the centre of their large site, a supplier produces oxygen supplies piped directly into the manufacturing processes of VitalSpark. They also deliver oxygen in bulk tankers to other customers. When you review the environmental aspects register, you find that the only environmental aspect recorded for this arrangement relates to the heavy goods vehicles of the supplier transiting the site.

You ask the EMS Manager about the environmental consequences to VitalSpark of this arrangement and are told that they are not significant since the supplier has its own services for water, sewage, waste and energy.

The EMS Manager tried unsuccessfully to communicate with the supplier who is located inside the VitalSpark site and outside the scope of the EMS.

After gathering more evidence, you note down findings against several clauses of ISO 14001. Determine which three of the findings stated are non-conformities.

- A. The organisation has failed to include in the EMS scope the activities, products and services associated with suppliers and contractors performing their activities in its own site. (Clause 4.3)
- B. Documentation of environmental impacts was missing for the supplier of oxygen. (Clause 6.1.2)
- C. The EMS Manager had some problems communicating with the supplier by mobile phone as an interested party. No other methods of communication were employed. (Clause 7.4.3)
- D. The Environmental Manager did not visit the oxygen supplier. (Clause 7.4.3)
- E. The aspects related to the use of heavy goods trucks was not identified. (Clause 6.1.2)
- F. The contractor's environmental policy is not consistent with the organisation's policy (Clause 5.2)
- G. Evidence was found to indicate that the needs of some interested parties had not been considered by the organisation. A neighbour's interests had not been identified. (Clause 4.2.b)
- H. The internal audit programme does not include processes for control of subcontractor transport movements. The audit programme does not cover the full environmental management system. (Clause 9.2.2)

Answer: A,B,H

NEW QUESTION # 17

Considering the requirements of clauses 6.1.2 and 6.1.4 of ISO 14001:2015, put the actions in the correct order to complete a process/task.

Answer:

Explanation:

□ Explanation:

□ Determine environmental aspects

Determine environmental impacts

Establish criteria to determine the significance of impacts

Determine which impacts are significant

Determine which aspects are significant

Plan actions to be taken

Determine how to evaluate the effectiveness of the actions taken

According to ISO 14001:2015 clause 6.1.2 (Environmental Aspects), an organization must determine the environmental aspects of its activities, products, and services that it can control and influence, and their associated environmental impacts.

Once identified, the organization shall:

Determine the aspects that can have significant impact on the environment using established criteria for evaluating significance.

(Reference: ISO 14001:2015, clause 6.1.2) Then, as per clause 6.1.4 (Planning action), the organization needs to:

Plan actions to address significant environmental aspects, legal requirements, and risks/opportunities.

Determine how to evaluate the effectiveness of these actions to ensure continual improvement.

This logical sequence ensures a structured and risk-based approach to identifying and managing environmental impacts.

Reference: ISO 14001:2015 - Clause 6.1.2 and 6.1.4

NEW QUESTION # 18

Sparkle is an organisation that provides mobile car cleaning services at customers' premises. It has been certified to ISO 14001 for some time and has appointed a full-time Environmental Management System Manager. The audit plan during a surveillance audit includes continual improvement and the auditor asks to see the most recent management review meeting minutes.

The minutes indicate that the Environmental Management System Manager reported that the last review of the organisation's

Based on the scenario, select the two options which best describe the evidence for raising such a non- conformity.

- Answer: A,E**
