If you want to improve your career prospects, obtaining WGU Cloud Deployment and Operations, Cloud-Deployment-and-Operations exam certificate is a great way for you. WGU Cloud Deployment and Operations certificate will help you land a job in the industry. After passing the WGU Cloud Deployment and Operations you can increase your earning potential. This is because employers are ready to pay more for candidates who have passed the WGU Cloud-Deployment-and-Operations Certification test. Success in the Cloud-Deployment-and-Operations exam can impact your promotion. If you are already an employee you can promote yourself to the highest level after passing the WGU Cloud-Deployment-and-Operations test.

PDFTorrent releases a new high pass-rate Cloud-Deployment-and-Operations valid exam preparation recently. If you are still puzzled by your test you can set your heart at rest to purchase our valid exam materials which will assist you to clear exam easily. We can guarantee purchasing WGU Cloud-Deployment-and-Operations Valid Exam Preparation will be the best passing methods and it always help you pass exam at first attempt. Now it is really an opportunity. Stop waiting and hesitate again!

Detailed Cloud-Deployment-and-Operations Study Plan | Practice Cloud-Deployment-and-Operations Online

At the PDFTorrent, we guarantee that our customers will receive the best possible Cloud-Deployment-and-Operations study material to pass the WGU Cloud-Deployment-and-Operations certification exam with confidence. Joining this site for the WGU Cloud Deployment and Operations (Cloud-Deployment-and-Operations) exam preparation would be the greatest solution to the problem of outdated material. The Cloud-Deployment-and-Operations would assist applicants in preparing for the WGU Cloud-Deployment-and-Operations exam successfully in one go Cloud-Deployment-and-Operations would provide Cloud-Deployment-and-Operations candidates with accurate and real Cloud-Deployment-and-Operations Dumps which are necessary to clear the WGU Cloud-Deployment-and-Operations test quickly.

WGU Cloud Deployment and Operations Sample Questions (Q61-Q66):

NEW QUESTION # 61

(A company is using the CloudWatch agent on its EC2 Linux instances. The company needs to determine how long read requests have waited on the instance's I/O for proper sizing of the instance. Which metric should the company use?)

- A. diskio_read_bytes
- B. disk_read_ops
- C. disk_io_time
- D. diskio_reads

Answer: C

Explanation:

The `disk_io_time` metric, collected by the CloudWatch agent on EC2 Linux instances, measures the total time (in milliseconds) that read and write requests have waited on I/O, helping to assess disk performance for instance sizing. The WGU Cloud Deployment and Operations Study Guide (Section 4.1, CloudWatch Agent Metrics) states, "The `disk_io_time` metric, available via the CloudWatch agent, tracks the time spent waiting for I/O operations, providing insight into disk contention for optimizing EC2 instance sizing." disk_read_ops, diskio_reads, and diskio_read_bytes measure operation counts or bytes, not wait times.

NEW QUESTION # 62

(An administrator needs to set up self-managed permissions for AWS CloudFormation StackSet operations. Which two roles should be created in the administrator account and in the target accounts? Choose 2 answers.)

- A. In the administrator account, create an IAM role named **AWSCloudFormationStackSetAdministrationRole**.
- B. In each target account, create a service role named **AWSCloudFormationStackSetExecutionRole** that trusts the administrator account.
- C. In the administrator account, create an IAM role named **AWSCloudFormationStackSetExecutionRole**.
- D. In each target account, create a service role named **AWSCloudFormationStackSetAdministrationRole** that trusts the administrator account.

Answer: A,B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

To set up self-managed permissions for CloudFormation StackSet operations, two roles are required: in the administrator account, create an IAM role named **AWSCloudFormationStackSetAdministrationRole** to manage StackSet operations, and in each target account, create a service role named **AWSCloudFormationStackSetExecutionRole** that trusts the administrator account to execute the stacks. The WGU Cloud Deployment and Operations Study Guide (Section 5.4, StackSets) states, "For self-managed permissions, the administrator account requires the **AWSCloudFormationStackSetAdministrationRole**, while each target account needs the **AWSCloudFormationStackSetExecutionRole** with a trust relationship to the administrator account for stack deployment." Roles B and D are incorrectly named or misplaced.

NEW QUESTION # 63

(A company builds an application that renders 3D movies for its users. The application does this by spawning a fleet of instances that each take a slice of the workload and then render a few hundred frames in around 30 minutes. If processing on a node is interrupted, the work can be moved to other running nodes. The cost to users is based on the underlying AWS cost plus a margin. Which EC2 instance type is most suitable to run workload pattern at the lowest cost?)

- A. **Spot Instance**
- B. On-Demand Instance
- C. Reserved Instance
- D. Dedicated Instance

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Spot Instances are the most suitable EC2 instance type for this workload pattern, offering the lowest cost for short, interruptible tasks like 3D rendering, where work can be redistributed if interrupted. This aligns with the company's cost-plus pricing model. The WGU Cloud Deployment and Operations Study Guide (Section 7.3, EC2 Instance Types) states, "Spot Instances provide significant cost savings (up to 90% off On-Demand) for fault-tolerant, short-term workloads like rendering, where interruptions can be handled by redistributing tasks to other nodes." On-Demand, Dedicated, and Reserved Instances are more expensive and less flexible for this use case.

NEW QUESTION # 64

(How are custom metrics grouped in CloudWatch?)

- A. Value

- B. Date
- **C. Namespace**
- D. Service

Answer: C

Explanation:

In Amazon CloudWatch, custom metrics are organized and grouped using namespaces. A namespace is a container for CloudWatch metrics that allows you to isolate and categorize metrics from different applications or services. According to the WGU Cloud Deployment and Operations Study Guide (Section 4.1, CloudWatch Metrics), each custom metric must be assigned to a namespace, which acts as a unique identifier to prevent naming collisions and facilitate metric management. Options like Service, Date, and Value are not used for grouping metrics in this context.

NEW QUESTION # 65

(An organization uses CloudFormation to deploy AWS infrastructure. The templates are built in JSON and deploy EC2 instances across multiple regions. Which solution should be used to set values in the template based on region-specific AMI IDs?)

- A. WaitCondition
- B. Outputs
- **C. Mappings**
- D. Resources

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The Mappings section in a CloudFormation template should be used to set values based on region-specific AMI IDs. Mappings allow the template to define a lookup table that associates regions with corresponding AMI IDs, enabling dynamic selection during stack creation across multiple regions. The WGU Cloud Deployment and Operations Study Guide (Section 5.3, CloudFormation Mappings) states, "The Mappings section enables region-specific configurations, such as mapping AMI IDs to regions (e.g., 'us-east-1': 'ami-123456'), ensuring the correct AMI is used based on the deployment region." Outputs, WaitCondition, and Resources do not provide this mapping functionality.

NEW QUESTION # 66

.....

Comparing to the training institution, our website can ensure you pass the WGU actual test with less time and money. You just need to use spare time to practice the Cloud-Deployment-and-Operations exam questions and remember key points of test answers. If you get a bad result in the Cloud-Deployment-and-Operations Practice Test, we will full refund you to reduce the loss of your money.
