## **New PDII-JPN Test Registration - Valid PDII-JPN Exam Vce**

With the help of our PDII-JPN practice dumps, you will be able to feel the real exam scenario. It is better than PDII-JPN dumps questions. If you want to pass the Salesforce PDII-JPN exam in the first attempt, then don't forget to go through the PDII-JPN practice test provided by the Fast2test. It will allow you to assess your skills and you will be able to get a clear idea of your preparation for the real Salesforce PDII-JPN Exam. It is the best way to proceed when you are trying to find the best solution to pass the PDII-JPN exam in the first attempt.

## Salesforce Sample Questions (Q70-Q75):

### NEW QUESTION # 70

開発者がテストクラス内から組織データにアクセスしようとしています。  
テストクラスに (seeAllData=true) アノテーションが必要なのはどの sObject タイプですか?

- A. ユーザー
- B. プロフィール
- C. レポート
- D. レコードタイプ

**Answer: C**

Explanation:

The seeAllData=true annotation is used to allow a test class to access all data in the org, instead of using test data that is created in the test class or by using test setup methods. This annotation should be used sparingly and only when absolutely necessary, as it can make the test class dependent on the data in the org and cause unexpected failures or unreliable results. The seeAllData=true annotation is required for some sObject types that do not support test data creation, such as Report, Dashboard, Document, and Attachment. Therefore, if the test class needs to access a Report sObject, it must use the seeAllData=true annotation. Reference: [Isolation of Test Data from Organization Data in Unit Tests], [Using the seeAllData Annotation]

### NEW QUESTION # 71

Salesforce 組織には 50,000 を超える連絡先があります。新しいビジネスプロセスでは、これらすべての連絡先レコードからのデータを集計する計算が必要です。この計算は、1日1回、営業時間後に実行する必要があります。

これを達成するために開発者はどの2つの手順を実行する必要がありますか?  
2つの答えを選択してください

- A.
- B.
- C.
- D.

**Answer: A,D**

Explanation:

When dealing with large datasets and the need to perform complex calculations or data aggregation, batch Apex and scheduling are typically used to efficiently process records in batches and to execute the process during off-peak hours.

Option B is correct because using the @future annotation allows you to run methods in the background, but it is not suitable for operations that need to process more than 50,000 records, which is the governor limit for future methods.

Option C is correct because implementing the Schedulable interface allows you to schedule the class to run at specified times, such as after business hours, which is a requirement for this scenario.

Option A is incorrect because Queueable is typically used for chaining jobs and handling asynchronous processing of individual transactions, not for processing large datasets at scheduled times.

Option D is incorrect because the Database.Batchable interface is what's needed for processing large datasets, not Database.Stateful. The Database.Stateful interface is used to maintain state across batch job transactions.

### NEW QUESTION # 72

ビジネスルールでは、新しいアカウントが作成されると必ず連絡先も作成されるように設定されています。連絡先の作成に失敗した場合、アカウントが作成されないようにするためのカスタム画面を開発する際に、どのような機能を使用できますか?

- A. try-catch ブロックで setSavePoint() と rollback() を使用します。
- B. try-catch ブロックで Database.Savepoint メソッドを使用します。
- C. allOrNone を false に設定して Database.Insert メソッドを使用します。
- D. 連絡先の挿入に失敗した場合は、Database.Delete メソッドを使用します。

**Answer: A**

Explanation:

This requirement calls for "Transactional Atomicity," meaning either both database operations (Account creation and Contact creation) succeed, or neither is committed to the database. In Apex, each DML statement normally acts as its own individual transaction unless managed by Savepoints.

The correct approach is to use Database.setSavepoint() and Database.rollback() within a try-catch block (Option A). The developer sets a savepoint immediately before the Account is inserted. If the Account is created successfully but the subsequent Contact insertion fails (due to a validation rule, trigger error, or system exception), the code enters the catch block. Within the catch block, the developer executes Database.

rollback(sp), which reverts the database to the state it was in before the Account was ever inserted.

Option B is technically similar but "A" provides the standard programmatic pattern name. Option C (allOrNone=false) only applies to a single list of records in one DML call and cannot link the success of an Account to a Contact. Option D (manual deletion) is an unreliable "cleanup" strategy that fails if the system crashes or if there are secondary side effects from the initial insertion. Using Savepoints ensures the platform handles the rollback safely and completely.

### NEW QUESTION # 73

開発者は、標準のケース作成画面を、ケースを作成する前にユーザーがウィザードを実行するカスタム画面に置き換えるよう求められます。組織には、Lightning Experience を実行しているユーザのみがいます。

要件を満たすために、開発者は Case New Action を何でオーバーライドする必要がありますか？

- A. ライトニングフロー
- B. ライトニングページ
- C. ライトニングコンポーネント
- D. 雷記録ページ

**Answer: A**

Explanation:

Overriding the standard Case New Action with a Lightning Flow allows the developer to create a custom wizard-style interface for creating cases. Lightning Flows can be embedded in Lightning Experience and provide a guided visual experience.

Lightning Flow

### NEW QUESTION # 74

次のコード スニペットを検討してください。

開発者は、上記のスニペットに適切なコード カバレッジを提供するために、次のテスト クラスを作成しました。

ただし、テストを実行すると、データは返されず、アサーションは失敗します。

ただし、テストを実行すると、データは返されず、アサーションは失敗します。

テストクラスが正常に実行されるようにするには、開発者はどの編集を行う必要がありますか？

- A. テスト クラスに setFixedSearchResults メソッドを実装します。
- B. searchfeature Apex クラスに without sharing キーワードを実装します。
- C. メソッド呼び出しを Test で囲みます。startTest () および Test、 Stop Test ()
- D. @isTest アノテーションに seeAllData=true 属性を実装します。

**Answer: A**

### NEW QUESTION # 75

.....

PDII-JPN exam materials contain all the questions and answers to pass PDII-JPN exam on first try. The Questions & answers are verified and selected by professionals in the field and ensure accuracy and efficiency throughout the whole Product. You will not need to collect additional questions and answers from any other source because this package contains every detail that you need to Pass PDII-JPN Exam.
