ISO-IEC-27001-Foundation Guaranteed Success & Valid ISO-IEC-27001-Foundation Test Questions

Our company is a multinational company which is famous for the ISO-IEC-27001-Foundation training materials in the international market. After nearly ten years' efforts, now our company have become the topnotch one in the field, therefore, if you want to pass the ISO-IEC-27001-Foundation exam as well as getting the related certification at a great ease, I strongly believe that the ISO-IEC-27001-Foundation Study Materials compiled by our company is your solid choice. To be the best global supplier of electronic ISO-IEC-27001-Foundation study materials for our customers' satisfaction has always been our common pursuit.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q40-Q45):

NEW QUESTION # 40
What is required to be reported by the Information security event reporting control?

- A. Unauthorized access
- B. Observed or suspected events
- C. Information disclosure
- D. Asset disposal

Answer: B

Explanation:
Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:
Annex A, control 6.8 (Information security event reporting) specifies:
"Information security events should be reported through appropriate management channels as quickly as possible. The organization should require all employees and contractors to note and report any observed or suspected information security events." This wording confirms that the required reporting covers "observed or suspected events." Specific event types like information disclosure (A) or unauthorized access (B) are examples but not the broad requirement.
Asset disposal (C) is addressed separately under equipment lifecycle controls (Annex A.7.14).
Therefore, the verified correct answer is D: Observed or suspected events.

NEW QUESTION # 41
Which of the following statements about the differences between an internal audit and a certification audit is true?
An internal audit is conducted at planned intervals and a certification audit is conducted annually An internal audit is known as a 1st party audit and a certification audit is known as a 3rd party audit

- A. Both 1 and 2 are true
- B. Only 2 is true
- C. Neither 1 or 2 is true
- D. Only 1 is true

Answer: B

Explanation:
ISO/IEC 27001 Clause 9.2 requires internal audits to be conducted at planned intervals, but it does not specify an annual frequency.
Certification audits, under ISO/IEC 17021 rules, typically occur on a 3-year cycle with annual surveillance, not strictly "annually."
This makes statement 1 inaccurate.
Audit types are defined in ISO/IEC 19011:
First-party audits: conducted internally by or on behalf of the organization (internal audits).
Third-party audits: conducted by independent external certification bodies.
Thus, statement 2 is correct. Therefore, the accurate choice is B: Only 2 is true.

NEW QUESTION # 42
Who determines the number of days required for a certification audit?

- A. Both the management representative and the external auditor together
- B. The lead internal auditor from the organization to be audited

- C. The external auditor from the Certification Body who will undertake the audit
- D. The management representative from the organization to be audited

Answer: C

Explanation:
Certification audits are carried out byCertification Bodies (CBs), not the organization itself. ISO/IEC 27001 requires external certification audits to be independent, impartial, and objective. According to ISO/IEC 27006 (Requirements for bodies providing audit and certification of ISMS), the Certification Body determines the audit duration and number of audit daysbased on factors such as organizational size, complexity, scope, and risk environment. This ensures consistency across organizations and prevents manipulation by the auditee. ISO/IEC 27001 Clause 9.2 and 9.3 addressinternal audit and management review, but the determination of certification audit days is outside the organization's control; it rests solely with the accredited Certification Body auditors. Thus, answer: Bis correct, as the CB's external auditor formally calculates and assigns the audit time.

NEW QUESTION # 43
Which statement describes the Classification of information control in Annex A of ISO/IEC 27001?

- A. Ensures that all information assets are labelled with their classification
- B. Ensures the rules to control physical and logical access apply to assets
- C. Ensures that information is classified based on confidentiality, integrity and availability
- D. Ensures that security perimeters are used to protect assets

Answer: C

Explanation:
Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:
Annex A.5.12 (Classification of information) states:
"Information should be classified according to the information security needs of the organization based on confidentiality, integrity and availability." This aligns directly with option B. Option A (labelling) is a separate control (Annex A.5.13). Option C (security perimeters) is under physical controls (Annex A.7.1). Option D (access control rules) relates to Annex A.5.15 and A.8.2. Thus, the verified correct statement for the Classification of information control isB.

NEW QUESTION # 44
Which audit activity related to ISO/IEC 27001 may be carried out by a practitioner?

- A. Conduct a surveillance audit of their own area of the organization
- B. Conduct an audit of an Accredited Training Organization
- C. Conduct an audit of a Certification Body
- D. Conduct an internal audit of the organization

Answer: D

Explanation:
ISO/IEC 27001 requires internal audits and sets out how they must be conducted: "The organization shall conduct internal audits at planned intervals..." (9.2.1) and "plan, establish, implement and maintain an audit programme(s)... [and] select auditors and conduct audits that ensure objectivity and the impartiality of the audit process" (9.2.2). These extracts confirm that practitioners (internal to the organization) can conduct internal audits provided objectivity and impartiality are ensured (e.g., they do not audit their own work). Surveillance audits (option A) and audits of Accredited Training Organizations or Certification Bodies (options C, D) are third-party activities outside the remit of an internal practitioner under ISO/IEC 27001; the standard's audit requirement is focused on the organization's own internal audit programme. Therefore, conducting an internal audit (B) is the correct practitioner activity per Clause 9.2.

NEW QUESTION # 45
