

NCP-DB-6.10 Pass4sure Exam Prep, Pdf NCP-DB-6.10 Files

In order to meet the requirements of our customers, Our NCP-DB-6.10 test questions carefully designed the automatic correcting system for customers. It is known to us that practicing the incorrect questions is very important for everyone, so our NCP-DB-6.10 exam question provide the automatic correcting system to help customers understand and correct the errors. Our NCP-DB-6.10 Guide Torrent will help you establish the error sets. We believe that it must be very useful for you to take your NCP-DB-6.10 exam, and it is necessary for you to use our NCP-DB-6.10 test questions.

As is known to us, getting the newest information is very important for all people to pass the exam and get the certification in the shortest time. In order to help all customers gain the newest information about the NCP-DB-6.10 exam, the experts and professors from our company designed the best Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 test guide. The experts will update the system every day. If there is new information about the exam, you will receive an email about the newest information about the NCP-DB-6.10 learning dumps. We can promise that you will never miss the important information about the exam.

Pdf Nutanix NCP-DB-6.10 Files - New NCP-DB-6.10 Test Tips

In order to meet the demands of all the customers, we can promise that we will provide all customers with three different versions of the NCP-DB-6.10 study materials: PDF version, Soft version and APP version. In addition, we can make sure that we are going to offer high quality NCP-DB-6.10 practice study materials with reasonable prices but various benefits for all customers. It is our sincere hope to help you pass NCP-DB-6.10 exam by the help of our NCP-DB-6.10 certification guide. Just come and buy our NCP-DB-6.10 learning prep!

Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Sample Questions (Q248-Q253):

NEW QUESTION # 248

Which ports are used by the NDB database agent for API calls?

- A. 443 and 9440
- B. 443 and 8080
- C. 3205 and 3260
- D. 5985 and 9389

Answer: A

Explanation:

The NDB database agent is a service that runs on each database server VM and communicates with the NDB instance. It uses port 443 for HTTPS API calls and port 9440 for Nutanix cluster API calls. These ports are required to be open on the database server VMs for NDB to function properly.

NEW QUESTION # 249

An administrator begins an SQL database clone deletion, but notices it fails almost immediately. What could be the cause of this failure?

- A. The clone has been marked as Immutable.
- B. A refresh operation is in progress.
- C. The database was not marked as Offline before the operation.
- D. The database data drives are shared with other applications.

Answer: A

Explanation:

If an SQL database clone deletion fails immediately in NDB, the most likely cause is that the clone has been marked as Immutable. An immutable clone is protected from deletion to prevent accidental data loss, often set for critical development or testing environments. This protection must be explicitly removed by the administrator (e.g., via the NDB GUI or CLI) before the deletion can proceed.

NEW QUESTION # 250

An administrator needs to deploy multiple SQL Server instances with different CPU and memory allocations but consistent parameter settings. Which NDB object should be reused?

- A. Software Profile
- B. Resource Domain
- C. Time Machine
- D. Database Profile

Answer: D

Explanation:

A Database Profile defines DB-level configuration (parameters, storage layout, etc.). It can be reused across deployments even if hardware resource allocations differ.

NEW QUESTION # 251

In order to configure and begin taking advantage of the Data Access Management feature of Time Machine, which action should an administrator take first?

- A. Enable NDB HA to protect the metadata associated with the configuration.
- B. Ensure that the source database has been provisioned on the remote Nutanix cluster.
- C. Enable NDB multi-cluster and register required Nutanix cluster(s).

- D. Take an application consistent snapshot of the source database.

Answer: C

Explanation:

To configure and begin taking advantage of the Data Access Management feature of Time Machine, the administrator must first enable NDB multi-cluster and register the required Nutanix cluster(s). Data Access Management allows controlled access to data (e.g., snapshots, clones) across multiple clusters, requiring a multi-cluster setup. This involves enabling multi-cluster support in NDB and registering remote clusters to facilitate data replication and access policies.

NEW QUESTION # 252

An administrator has been asked to add a new Nutanix AHV cluster to the current single default container for DB provisioning. Which configuration should be performed before enabling NDB multi-cluster?

- **A. Add both clusters under Prism Central management and verify NDB is registered to the same Prism Central Instance. environment using a storage container as the**
- B. Configure datastore mapping within Prism Element Protection Domains.
- C. Enable High Availability for NDB service on the Administration page.
- D. Deploy Nutanix Self-Service VM and use blueprints to allow NDB to deploy databases on multiple clusters.

Answer: A

Explanation:

To add a new Nutanix AHV cluster to the current single default container for database provisioning and enable NDB multi-cluster functionality, the administrator must ensure a unified management framework. Nutanix Prism Central serves as the centralized management platform for multi-cluster environments, allowing NDB to manage multiple clusters (in this case, the existing cluster and the new AHV cluster) under a single instance. Before enabling multi-cluster support in NDB, both clusters must be registered with the same Prism Central instance, and NDB must be confirmed as registered to that instance. This ensures consistent policy enforcement, resource visibility, and database provisioning across clusters using the default container.

NEW QUESTION # 253

.....

All these three Nutanix NCP-DB-6.10 exam questions formats are easy to use and compatible with all devices, operating systems, and browsers. You can install and run these three NCP-DB-6.10 exam practice test questions easily and start Nutanix NCP-DB-6.10 Exam Preparation without wasting further time. The NCP-DB-6.10 exam practice questions will ace your Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 NCP-DB-6.10 exam preparation and prepare you for the final NCP-DB-6.10 exam.

Pdf NCP-DB-6.10 Files: <https://www.guidetorrent.com/NCP-DB-6.10-pdf-free-download.html>

Candidates will breeze through Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) certification examination with flying colors and advance to the next level of their jobs if they prepare with updated NCP-DB-6.10 exam questions, Nutanix NCP-DB-6.10 Pass4sure Exam Prep Candidates are likely to be office workers and work and family must be very busy, With authoritative Nutanix Pdf NCP-DB-6.10 Files certificates, you can have access to big companies where the salaries are undoubtedly high.

Using a stylus with your new iPad allows you to handwrite, Pdf NCP-DB-6.10 Files draw, or paint directly on the tablet's screen, Delegating Administrative Permissions, Candidates will breeze through Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) certification examination with flying colors and advance to the next level of their jobs if they prepare with updated NCP-DB-6.10 exam questions.

100% Pass Nutanix NCP-DB-6.10 - Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Marvelous Pass4sure Exam Prep

Candidates are likely to be office workers and work and family must NCP-DB-6.10 be very busy, With authoritative Nutanix certificates, you can have access to big companies where the salaries are undoubtedly high.

Through continuous research and development, our Nutanix NCP-DB-6.10 dumps have won good reputation in the industry, Our
