

# Quiz Nutanix - Valid NCP-CI-AWS - Exam Nutanix Certified Professional - Cloud Integration - AWS Forum

2026 Latest ExamBoosts NCP-CI-AWS PDF Dumps and NCP-CI-AWS Exam Engine Free Share:  
<https://drive.google.com/open?id=1phhQa4vVmAT3QjffmeNBC08bxft-0uUV>

The clients only need 20-30 hours to learn the NCP-CI-AWS exam questions and prepare for the test. Many people may complain that we have to prepare for the NCP-CI-AWS test but on the other side they have to spend most of their time on their most important things such as their jobs, learning and families. But if you buy our NCP-CI-AWS Study Guide you can both do your most important thing well and pass the test easily because the preparation for the test costs you little time and energy.

## Nutanix NCP-CI-AWS Exam Syllabus Topics:

| Topic   | Details  |
|---------|--|
| Topic 1 | <ul style="list-style-type: none"><li>Deploying an NC2 on AWS Environment: This portion assesses your knowledge of cloud cluster deployment, cloud provider network configuration, and your skills in addressing cluster deployment challenges.</li></ul>                      |
| Topic 2 | <ul style="list-style-type: none"><li>Managing an NC2 on AWS Environment: This exam component tests your understanding of node and cluster management tasks, along with your ability to oversee cluster and cloud resource health.</li></ul>                                   |
| Topic 3 | <ul style="list-style-type: none"><li>Prepare the AWS cloud environment: This exam segment evaluates your ability to set up the AWS cloud environment, initiate NC2 service subscription, establish implementation criteria, and recognize networking prerequisites.</li></ul> |
| Topic 4 | <ul style="list-style-type: none"><li>Configuring an NC2 on AWS Environment: This section examines your proficiency in setting up cloud networking and security measures, as well as addressing connectivity issues.</li></ul>   |

## Quiz 2026 Latest NCP-CI-AWS: Exam Nutanix Certified Professional - Cloud Integration - AWS Forum

When you choose NCP-CI-AWS valid study pdf, you will get a chance to participate in the simulated exam before you take your actual test. The contents of NCP-CI-AWS exam torrent are compiled by our experts through several times of verification and confirmation. So the NCP-CI-AWS questions & answers are valid and reliable to use. You can find all the key points in the NCP-CI-AWS practice torrent. Besides, the NCP-CI-AWS test engine training equipped with various self-assessment functions like exam history, result scores and time setting, etc.

## Nutanix Certified Professional - Cloud Integration - AWS Sample Questions

## (Q104-Q109):

### NEW QUESTION # 104

An administrator wants to use existing Nutanix licenses for NC2 consumption. Which statement is true related to license reservation?

- A. A PAYG subscription plan is not needed when using a reserved license capacity, which can entirely cover the NC2 usage.
- B. Nutanix licenses can be reserved anytime during an active free trial or a paid subscription.
- C. Nutanix licenses for NC2 must be reserved before subscribing to NC2.
- **D. A reserved licensed capacity automatically takes care of any incidental overages that might arise.**

**Answer: D**

Explanation:

Nutanix provides a flexible licensing model for NC2, allowing customers to use their existing on-premises licenses through reservation. A key benefit of this approach is that reserved licensed capacity automatically handles incidental overages. If a cluster temporarily scales out and exceeds the reserved capacity, the Nutanix billing system accounts for the excess usage automatically, typically by drawing from the associated Pay-As-You-Go (PAYG) account or consumption credits. This ensures that the cluster remains operational and compliant even during unexpected spikes in demand. Administrators can manage these reservations through the Nutanix portal, allowing them to balance their committed on-premises license spend with the variable needs of their cloud-resident clusters.

### NEW QUESTION # 105

Exhibit.

What does the exhibit indicate?

- A. Replication in paused state
- **B. No ongoing replication**
- C. Replication in error state
- D. Ongoing replication

**Answer: B**

Explanation:

The exhibit indicates a replication operation with specific details about the protection domain, remote site, and snapshot. Key points to note are:

\* Bytes Completed: 0 bytes completed.

\* Complete Percent: 0.0%

\* Paused: false

\* Aborted: false

Given these details:

\* No ongoing replication: The operation has started, but there is no progress in terms of bytes completed or percentage completed. Since the status shows 0 bytes and 0 percent completed, it indicates that no data has been replicated yet.

Nutanix Best Practices for Monitoring Replication

### NEW QUESTION # 106

Which two statements are the most accurate regarding Cluster Protect? (Choose two.)

- **A. The Cluster Protect feature requires AOS version 6.7 or higher.**
- B. Nutanix Guest Tools (NGT) is not required to be installed on User VMs.
- C. An AWS subnet can be shared by VMs, Prism Central, and Multicloud Snapshot Technology (MST).
- **D. The clusters that are to be protected must be registered with the same instance of Prism Central.**

**Answer: A,D**

Explanation:

\* The clusters that are to be protected must be registered with the same instance of Prism Central (Answer C):

\* For Cluster Protect to function correctly, all clusters intended for protection must be registered under the same Prism Central instance. This ensures consistent management and coordination of protection policies and operations across clusters.

\* The Cluster Protect feature requires AOS version 6.7 or higher (Answer D):

\* Cluster Protect is a feature that is available starting from AOS version 6.7. To utilize this feature, ensure that the Nutanix clusters are running this version or a newer one.

### NEW QUESTION # 107

An administrator has deployed an NC2 cluster on AWS to an existing environment for VDI.

Afterwards, the corporate security teams direct the administrator to reuse an existing AWS subnet, 10.79.4.0/24 that has two EC2 instances: EC2-1 (10.79.4.200) and EC2-2 (10.79.4.201). The security team indicates that this directive is to avoid overlap with the AHV IPAM.

Which two configuration actions should the administrator take to ensure there are no configuration issues? (Choose two.)

- A. Deploy two VMs on the NC2 cluster and assign 10.79.4.200 and 10.79.4.201 as the assigned IPs in Prism Element
- B. `aCLI > net.de/ete_from_ip_blacklist 10.79.4.200` `aCLI > net.defete_fromip_blacklist 10.79.4.201`
- C. Configure the AHV IPAM to use DHCP range 10.79.4.2 -10.79.4.253.
- D. `aCLI > net.add_to_ip_blacklist 10.79.4.200` `aCLI > net.add_to_ip_blacklist 10.79.4.201`

**Answer: C,D**

Explanation:

To avoid IP address conflicts and ensure there are no configuration issues when reusing an existing AWS subnet, the administrator should take the following actions:

`aCLI > net.add_to_ip_blacklist 10.79.4.200` `aCLI > net.add_to_ip_blacklist 10.79.4.201` (Answer A):

This command adds the specified IP addresses to the blacklist, preventing AHV IPAM from assigning these addresses to any VMs. This ensures that the existing EC2 instances with IPs 10.79.4.200 and 10.79.4.201 are not allocated to other VMs in the NC2 cluster.

Configure the AHV IPAM to use DHCP range 10.79.4.2 -10.79.4.253 (Answer D):

By configuring the AHV IPAM to use a specific DHCP range, you ensure that the IP addresses assigned to the EC2 instances (10.79.4.200 and 10.79.4.201) are not included in the DHCP pool. This prevents IP address conflicts within the subnet.

### NEW QUESTION # 108

Regarding the licensing considerations for NC2, which two statements accurately describe the consumption models for VDI and general-purpose clusters?

- A. The VDI cluster uses user-based consumption, where consumption and cluster pricing are based on the number of users concurrently using the cluster.
- B. The general-purpose cluster uses a capacity-based method by default, where the consumption and cluster pricing are based on the capacity provisioned in the cluster.
- C. License reservation is mandatory when using the NC2 free trial.
- D. Switching from a new portfolio (NCI) to a legacy portfolio (AOS), and vice versa is allowed.

**Answer: A,B**

Explanation:

Nutanix offers tailored licensing models for different workload types within NC2 to optimize costs. For VDI-specific clusters, Nutanix utilizes a user-based consumption model. In this scenario, pricing is determined by the number of concurrent users, which is ideal for elastic desktop environments where the number of active VMs fluctuates. Conversely, general-purpose clusters typically default to a capacity-based method. Here, consumption is calculated based on the total provisioned capacity (cores or TiB) of the cluster, providing predictable costs for steady-state server workloads. These models allow organizations to align their software spend directly with their actual resource utilization patterns. It is important to note that switching between portfolio types (NCI and AOS) is generally restricted once a cluster is deployed.

## NEW QUESTION # 109

.....

Among all learning websites providing IT certification NCP-CI-AWS dumps and training methods, whose NCP-CI-AWS exam dumps and training materials are the most reliable? Of course, NCP-CI-AWS exam dumps and certification training questions on ExamBoosts site are the most reliable. Our ExamBoosts have professional team, certification experts, technician and comprehensive language master, who always research the Latest NCP-CI-AWS Exam Dumps and update NCP-CI-AWS certification training material, so you can be fully sure that our NCP-CI-AWS test training materials can help you pass the NCP-CI-AWS exam.
