Google - Professional-Cloud-Network-Engineer - Reliable Exam Google Cloud Certified - Professional Cloud Network Engineer Consultant

Google Professional-Cloud-Network-Engineer practice materials are highly popular in the market compared with other materials from competitors whether on the volume of sales or content as well. All precise information on the Google Cloud Certified - Professional Cloud Network Engineer Professional-Cloud-Network-Engineer Exam Questions and high accurate questions are helpful. To help you have a thorough understanding of our Professional-Cloud-Network-Engineer training prep, free demos are provided for your reference.

Google Cloud Certified - Professional Cloud Network Engineer Sample Questions (Q118-Q123):

NEW QUESTION # 118
You create a Google Kubernetes Engine private cluster and want to use kubectl to get the status of the pods. In one of your instances you notice the master is not responding, even though the cluster is up and running.
What should you do to solve the problem?

- A. Create the appropriate master authorized network entries to allow the instance to communicate to the master.
- B. Assign a public IP address to the instance.
- C. Create a route to reach the Master, pointing to the default internet gateway.

- D. Create the appropriate firewall policy in the VPC to allow traffic from Master node IP address to the instance.

Answer: D

NEW QUESTION # 119
You have ordered Dedicated Interconnect in the GCP Console and need to give the Letter of Authorization/Connecting Facility Assignment (LOA-CFA) to your cross-connect provider to complete the physical connection.
Which two actions can accomplish this? (Choose two.)

- A. Run gcloud compute interconnects describe <interconnect>.
- B. Contact your cross-connect provider and inform them that Google automatically sent the LOA/CFA to them via email, and to complete the connection.
- C. Open a Cloud Support ticket under the Cloud Interconnect category.
- D. Check the email for the account of the NOC contact that you specified during the ordering process.
- E. Download the LOA-CFA from the Hybrid Connectivity section of the GCP Console.

Answer: D,E

NEW QUESTION # 120
In your company, two departments with separate GCP projects (code-dev and data-dev) in the same organization need to allow full cross-communication between all of their virtual machines in GCP. Each department has one VPC in its project and wants full control over their network. Neither department intends to recreate its existing computing resources. You want to implement a solution that minimizes cost.
Which two steps should you take? (Choose two.)

- A. Connect both projects using Cloud VPN.
- B. Enable firewall rules to allow all ingress traffic from all subnets of project code-dev to all instances in project data-dev, and vice versa.
- C. Create a route in the code-dev project to the destination prefixes in project data-dev and use nexthop as the default gateway, and vice versa.
- D. Enable Shared VPC in one project (e. g., code-dev), and make the second project (e. g., data-dev) a service project.
- E. Connect the VPCs in project code-dev and data-dev using VPC Network Peering.

Answer: C,D

NEW QUESTION # 121
You are deploying a global external TCP load balancing solution and want to preserve the source IP address of the original layer 3 payload.
Which type of load balancer should you use?

- A. Network load balancer
- B. HTTP(S) load balancer
- C. Internal load balancer
- D. TCP/SSL proxy load balancer

Answer: D

Explanation:
By default TCP/SSL proxy load balancer original client IP address and port information is not preserved, but it can be preserved using the PROXY protocol: https://cloud.google.com/load-balancing/docs/tcp#target-proxies
https://medium.com/google-cloud/preserving-client-ips-through-google-clouds-global-tcp-and-ssl-proxy-load-balancers-3697d76feeb1

NEW QUESTION # 122
You are using the gcloud command line tool to create a new custom role in a project by coping a predefined role. You receive this error message:

INVALID_ARGUMENT: Permission resourcemanager.projects.list is not valid What should you do?

- A. Add the resourcemanager.projects.get permission, and try again.
- B. Remove the resourcemanager.projects.list permission, and try again.
- C. Add the resourcemanager.projects.setIamPolicy permission, and try again.
- D. Try again with a different role with a new name but the same permissions.

Answer: B

Explanation:
