

100% Pass 2026 Adobe AD0-E725: Adobe Commerce Developer Expert–High Pass-Rate New Test Vce Free

P.S. Free 2026 Adobe AD0-E725 dumps are available on Google Drive shared by Prep4pass: https://drive.google.com/open?id=16WLWVBWjyz60WwRQ2U8_AH2257WAP16b

We are willing to provide all people with the demo of our AD0-E725 study tool for free. If you have any doubt about our products that will bring a lot of benefits for you. The trial demo of our AD0-E725 question torrent must be a good choice for you. By the trial demo provided by our company, you will have the opportunity to closely contact with our AD0-E725 Exam Torrent, and it will be possible for you to have a view of our products. More importantly, we provide all people with the trial demo for free before you buy our AD0-E725 exam torrent and it means that you have the chance to download from our web page for free; you do not need to spend any money.

Adobe AD0-E725 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• External Integrations: This section of the exam measures the skills of Integration Specialists and focuses on connecting Adobe Commerce with external SaaS services. It encompasses the skills needed to customize data flows, utilize Adobe App Builder for extensibility, and implement Adobe I• O events and webhooks to create automated and connected business processes.
Topic 2	<ul style="list-style-type: none">• Customizations: This section of the exam measures the skills of Solutions Engineers and involves modifying and extending platform functionality. This includes customizing core areas like the product catalog, checkout process, and admin panel, as well as manipulating data entities, customizing APIs, working with message queues, and writing integration tests to ensure code quality and functionality.
Topic 3	<ul style="list-style-type: none">• Cloud: This section of the exam measures the skills of Cloud Architects and covers the deployment and management of Adobe Commerce on cloud infrastructure. It requires explaining the fundamental cloud architecture, performing setup and configuration tasks, and utilizing the Adobe Commerce Cloud CLI tool to manage the environment effectively.

Topic 4	<ul style="list-style-type: none"> • Section 1: Architecture: This section of the exam measures the skills of Backend Developers and covers the core structural concepts of Adobe Commerce. It involves demonstrating effective cache implementation, understanding key code components like plugins and observers, and managing multi-site configurations on a single instance. The domain also includes explaining the use of Git patches, critical security features, the CRON scheduling system, and how indexing functions within the platform.

Hot New AD0-E725 Test Vce Free | High-quality AD0-E725 Dumps Torrent: Adobe Commerce Developer Expert 100% Pass

After your payment is successful, you will receive an e-mail from our system within 5-10 minutes, and then, you can use high-quality AD0-E725 exam guide to learn immediately. Everyone knows that time is very important and hopes to learn efficiently, especially for those who have taken a lot of detours and wasted a lot of time. The sooner you download and use AD0-E725 Training Materials the sooner you get the AD0-E725 certificate.

Adobe Commerce Developer Expert Sample Questions (Q33-Q38):

NEW QUESTION # 33

An Adobe Commerce Developer creates a module that adds a product attribute via a data patch.

Adhering to best practices, how should the Developer remove this product attribute when the module is uninstalled?

- A. Make the patch implement `Magento\Framework\Setup\Patch\PatchRevertableInterface` with the `revert()` method in it.
- B. Create a new CLI command that needs to be executed before the `bin/magento module:uninstall Vendor_ModuleName`.
- C. Delete the custom attribute directly from the database.

Answer: A

Explanation:

The recommended best practice is to use the `PatchRevertableInterface` when creating data patches. This interface defines a `revert()` method, which is executed during module uninstall, ensuring that added entities (such as product attributes) are properly removed.

B (deleting from database directly) is strongly discouraged and violates upgrade safety.

C (creating a CLI command) is unnecessary; uninstallation should be handled within the patch itself.

Reference:

Adobe Commerce DevDocs - Data patches and `PatchRevertableInterface`

NEW QUESTION # 34

A multi-source merchant asks an Adobe Commerce Developer to prioritize inventory source selection based on shipping address and minimal delivery cost.

How should the Developer implement this task functionality?

- A. Use Source Priority Algorithm and utilize `GetSourceSelectionAlgorithmList`.
- B. Configure Distance Priority Algorithm and implement `PlaceReservationsForSalesEventInterface`.
- C. Register new Source Selection Algorithms (SSA) via `di.xml` and implement `SourceSelectionInterface`.

Answer: C

Explanation:

To customize how inventory sources are prioritized, developers must create a new Source Selection Algorithm (SSA). This is done by registering a new SSA in `di.xml` and implementing `SourceSelectionInterface`. This allows developers to define rules such as shipping address proximity or delivery cost.

B is partially correct: Distance Priority Algorithm exists, but implementing `PlaceReservationsForSalesEventInterface` is not the right way to customize selection logic.

C Source Priority Algorithm is fixed (based on predefined priority), not custom.

Reference:

Adobe Commerce DevDocs - Inventory Source Selection Algorithm

Official Documentation Extracts:

"To customize source selection behavior, implement a custom Source Selection Algorithm (SSA). The algorithm must implement SourceSelectionInterface and be registered via dependency injection (di.xml)." - Adobe Commerce DevDocs: Custom Source Selection Algorithm

"Adobe Commerce provides default SSAs: Source Priority Algorithm and Distance Priority Algorithm

Custom SSAs can be created to satisfy specific business requirements such as delivery costs." - Adobe Commerce Inventory Management Guide

NEW QUESTION # 35

A Developer discovers the following code snippet in default.xml layout:

```
<referenceBlock name="content">
<block name="custom" template="example.phtml" cacheable="false" />
</referenceBlock>
```

Which caching behavior will occur?

- A. Only the custom block will not be cached.
- **B. All pages will be marked as non-cacheable.**
- C. The content block and all its child blocks will become cacheable.

Answer: B

NEW QUESTION # 36

A new critical security vulnerability is found on Adobe Commerce Cloud. The successful exploitation may lead to arbitrary code execution, so the Developer must apply a security patch file given by Adobe as soon as possible to ensure system security. How should the Developer apply the security patch on Adobe Commerce hosted on cloud infrastructure according to best practices?

- A. Apply a security patch using composer.json.
- B. Upgrade Adobe Commerce to the latest security patch release.
- **C. Copy a security patch to m2-hotfixes directory.**

Answer: C

Explanation:

On Adobe Commerce Cloud, the best practice for urgent fixes is to place the patch file into the m2-hotfixes directory at the root of the project. Patches in this directory are automatically applied during the Cloud build and deploy process.

Option A (composer.json) applies to composer-based patches in on-premise installations, not the recommended cloud approach.

Option C (upgrade to latest release) is ideal for long-term but not feasible for urgent fixes that must be applied immediately.

Adobe Commerce Cloud DevDocs - Apply patches

NEW QUESTION # 37

A client expresses disappointment with the underreported engagement and revenue metrics reported by Product Recommendations. Which limitation or consideration of this service should be communicated to the client?

- A. Product Recommendations does not support insightful engagement and revenue metrics; an additional service contract is required for this feature.
- **B. Ad blockers and privacy settings can prevent Product Recommendations from capturing shopper behavior.**
- C. Product Recommendations requires the purchase of an additional license to enable real-time reporting.

Answer: B

Explanation:

Product Recommendations relies on capturing shopper behavior (page views, clicks, add-to-cart events) via JavaScript trackers. If users have ad blockers or restrictive privacy settings enabled, this data may not be captured, leading to underreported metrics.

A is false: Product Recommendations does not require extra licenses for reporting.

C is false: The service already supports engagement and revenue metrics; no additional contract required.
