Latest Test NSK300 Simulations & Updated NSK300 Dumps

What's more, part of that ExamBoosts NSK300 dumps now are free: https://drive.google.com/open?id=1tiFNhWtR5uv23n45AEGxVVPW0qC6Jiol

Before the clients buy our NSK300 guide prep they can have a free download and tryout. The client can visit the website pages of our product and understand our NSK300 study materials in detail. You can see the demo, the form of the software and part of our titles. To better understand our NSK300 Preparation questions, you can also look at the details and the guarantee. So it is convenient for you to have a good understanding of our NSK300 exam questions before you decide to buy our NSK300 training materials.

Netskope NSK300 Exam Syllabus Topics:

Topic	Details
Topic 1	• Netskope Platform Implementation: This section of the exam measures the abilities of Cloud Security Engineers and focuses on implementing the Netskope Security Cloud Platform using recommended steering architectures and deployment approaches. It includes key concepts such as API-enabled protection and real-time protection features, ensuring candidates understand how to deploy Netskope to secure cloud usage effectively within enterprise networks.
Topic 2	• Netskope Platform Troubleshooting: This section of the exam measures the skills of Support Engineers and focuses on identifying and resolving common issues within the Netskope platform. It includes troubleshooting client connectivity problems, analyzing steering methods, resolving general connectivity concerns, and addressing SAML integration issues. The section ensures candidates can diagnose and fix issues that impact platform performance and user access.
Topic 3	• Cloud Security Solutions: This section of the exam measures the skills of Cloud Security Analysts and covers the core components and functions of the Netskope Security Cloud Platform. It includes understanding how the platform integrates with enterprise environments, the deployment methods supported by Netskope, and the role of various microservices in delivering cloud-based security. The focus is on ensuring candidates can recognize how Netskope's architecture protects users, applications, and data across cloud services.
Topic 4	• Netskope Platform Monitoring: This section of the exam measures the capabilities of Security Operations Center (SOC) Analysts and focuses on monitoring the platform through reporting and analytics tools. It highlights how Netskope insights support visibility into user activity, cloud app behavior, and policy effectiveness to help organizations maintain a continuous cloud security posture.

Topic 5	• Netskope Platform Management: This section of the exam measures the skills of Security Administrators and covers essential administrative tasks required to manage the Netskope Security Cloud Platform. It includes managing DLP functions, handling identity integrations, and monitoring Netskope components to maintain platform stability. The domain ensures professionals can manage daily operations and maintain strong access, data, and security controls.

Updated NSK300 Dumps | Test NSK300 Simulator Online

ExamBoosts provides updated and valid Netskope NSK300 Exam Questions because we are aware of the absolute importance of updates, keeping in mind the dynamic Netskope NSK300 Exam Syllabus. We provide you update checks for 365 days after purchase for absolutely no cost.

Netskope Certified Cloud Security Architect Sample Questions (Q57-Q62):

NEW QUESTION # 57
Review the exhibit.

A user has attempted to upload a file to Microsoft OneDrive that contains source code with PII and PCI data.
Referring to the exhibit, which statement Is correct?

- A. The user will be alerted and a single incident will be generated referencing the DLP-PII profile.
- B. The user will be blocked and a single Incident will be generated referencing all of the matching DLP profiles
- C. The user will be blocked and a separate incident will be generated for each of the matching DLP profiles.
- D. The user will be blocked and a single Incident will be generated referencing the DLP-PCI profile.

Answer: C

Explanation:
In the given scenario, a user is attempting to upload a file containing sensitive PII and PCI data to Microsoft OneDrive. The Netskope Security Cloud provides real-time data and threat protection when accessing cloud services, websites, and private apps from anywhere, on any device. Based on the exhibit provided, different DLP (Data Loss Prevention) profiles are triggered - DLP-SourceCode, DLP-PCI, and DLP-PII. Each of these profiles has specific actions associated with them; for instance, an alert is generated for Source Code while blocking actions are initiated for PCI and PII data. Since multiple DLP profiles are triggered due

to the sensitive nature of the content in the file being uploaded, separate incidents will be generated for each matching profile ensuring comprehensive security coverage and incident reporting.

NEW QUESTION # 58
Your company has a large number of medical forms that are allowed to exit the company when they are blank. If the forms contain sensitive data, the forms must not leave any company data centers, managed devices, or approved cloud environments. You want to create DLP rules for these forms.
Which first step should you take to protect these forms?

- A. Use Netskope Secure Forwarder to create an ML Model of all forms
- B. Use Netskope Secure Forwarder to create EDM hashes of all forms.
- C. Use Netskope Secure Forwarder to create an MIP tag for all forms.
- D. Use Netskope Secure Forwarder to create fingerprints of all forms.

Answer: D

Explanation:
The first step to protect the medical forms containing sensitive data is to create fingerprints of all forms using Netskope Secure Forwarder. Fingerprints are unique identifiers that can be used to detect when a form contains sensitive data. By creating fingerprints, you can set up DLP (Data Loss Prevention) rules that will allow blank forms to exit the company but will prevent forms with sensitive data from leaving the protected environments. This method ensures that only forms without sensitive information are allowed to be shared externally.

NEW QUESTION # 59
A company has deployed Explicit Proxy over Tunnel (EPoT) for their VDI users They have configured Forward Proxy authentication using Okta Universal Directory They have also configured a number of Real-time Protection policies that block access to different Web categories for different AD groups so. for example, marketing users are blocked from accessing gambling sites. During User Acceptance Testing, they see inconsistent results where sometimes marketing users are able to access gambling sites and sometimes they are blocked as expected They are seeing this inconsistency based on who logs into the VDI server first.
What is causing this behavior?

- A. Forward Proxy is configured to use the Cookie Surrogate
- B. Forward Proxy authentication is configured but not enabled.
- C. Forward Proxy is not configured to use the IP Surrogate
- D. Forward Proxy is not configured to use the Cookie Surrogate

Answer: D

Explanation:
The inconsistent results observed during User Acceptance Testing (where marketing users sometimes access gambling sites and sometimes are blocked) are likely due to the configuration of the Forward Proxy.
Cookie Surrogate: The Cookie Surrogate is a mechanism used in Forward Proxy deployments to maintain user context across multiple requests. It ensures that user-specific policies are consistently applied even when multiple users share the same IP address (common in VDI environments).
Issue: If the Forward Proxy is not configured to use the Cookie Surrogate, it may lead to inconsistent behavior. When different users log into the VDI server, their requests may not be associated with their specific user context, resulting in varying policy enforcement.
Solution: Ensure that the Forward Proxy is properly configured to use the Cookie Surrogate, allowing consistent policy enforcement based on individual user identities. Reference:

NEW QUESTION # 60
Review the exhibit.

You are asked to integrate Netskope with Crowdstrike EDR. You added the Remediation profile shown in the exhibit. Which action will this remediation profile take?

- A. The malware will be quarantined.
- B. The malware hash will be added as an IOC in Crowdstrike.
- C. The endpoint will be isolated.
- D. The malware hash will be added as an IOC in Netskope.

Answer: C

Explanation:
The remediation profile shown in the exhibit will take the action of isolating the endpoint. This is indicated by the "Isolate" option being checked under "TAKE ACTIONS" in the configuration settings. When this option is selected, the remediation profile is configured to isolate the endpoint upon detection of a threat, which is a common response to contain a potential security breach and prevent further spread of malware within the network1.

NEW QUESTION # 61
A company wants to capture and maintain sensitive Pll data in a relational database to help their customers. There are many employees and contractors that need access to sensitive customer data to perform their duties The company wants to prevent the exfiltration of sensitive customer data by their employees and contractors.
In this scenario. what would satisfy this requirement?

- A. regular expression
- B. fingerprinting
- C. machine learning
- D. exact data match

Answer: B

Explanation:
Fingerprinting would satisfy the requirement to prevent the exfiltration of sensitive Personally Identifiable Information (PII) data by employees and contractors. Fingerprinting is a data protection technique that involves creating a unique digital representation of sensitive data. This allows for the detection of any exact or partial matches of the fingerprinted data leaving the company's

environment, thereby preventing unauthorized data exfiltration. It is particularly effective in scenarios where multiple individuals require access to sensitive data, as it can protect against both inadvertent and malicious attempts to move data outside of authorized channels1.

NEW QUESTION # 62

......

You may urgently need to attend NSK300 certificate exam and get the certificate to prove you are qualified for the job in some area. But what certificate is valuable and useful and can help you a lot? Passing the test certification can help you prove that you are competent in some area and if you buy our NSK300 Study Materials you will pass the test almost without any problems. with a high pass rate as 98% to 100%, our NSK300 learning guide can be your best assistant on your way to success.
