TOGAF Enterprise Architecture Part 1 Exam (OGEA-101) dumps PDF version is printable and embedded with valid The Open Group OGEA-101 questions to help you get ready for the TOGAF Enterprise Architecture Part 1 Exam (OGEA-101) exam quickly. TOGAF Enterprise Architecture Part 1 Exam (OGEA-101) exam dumps pdf are also usable on several smart devices. You can use it anywhere at any time on your smartphones and tablets. We update our The Open Group OGEA-101 Exam Questions bank regularly to match the changes and improve the quality of OGEA-101 Questions so you can get a better experience.

The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q71-Q76):

NEW QUESTION # 71

Which section of the TOGAF template for Architecture Principles should highlight the requirements for carrying out the principle?

- A. Statement
- **B. Implications**
- C. Rationale
- D. Name

Answer: B

Explanation:

The Implications section describes the impact of adhering to the principle on the organization, the processes, the information systems, and the technology²³. It also identifies the changes, costs, and risks that may result from applying the principle²³. The Implications section helps to communicate the benefits and consequences of the principle to the stakeholders and to guide the implementation and governance of the architecture²³.

The other sections of the TOGAF template for Architecture Principles are:

*Name: This section provides a short and memorable name for the principle that represents its essence and purpose²³. The name should not mention any specific technology or solution²³.

*Statement: This section provides a concise and formal definition of the principle that expresses the fundamental rule or constraint that the principle imposes²³. The statement should be clear, unambiguous, and testable²³.

*Rationale: This section provides the reasoning and justification for the principle, explaining why it is important and how it supports the business goals and drivers²³. The rationale should also link the principle to the higher-level enterprise or IT principles that it elaborates on²³.

NEW QUESTION # 72

Consider the following statements:

* A whole corporation or a division of a corporation

* A government agency or a single government department

* A chain of geographically distant organizations linked together by common ownership Complete the sentence. The TOGAF Standard considers these to be examples of:

- A. Business Units
- B. Architecture Contexts
- C. Enterprises
- D. Organizations

Answer: C

Explanation:

"TOGAF defines 'enterprise' as any collection of organizations that has a common set of goals. For example, an enterprise could be a government agency, a whole corporation, a division of a corporation, a single department, or a chain of geographically distant organizations linked together by common ownership." www.opengroup.org Reference: The Open Group, Using TOGAF for Enterprise SOA, Section "What is an Enterprise?"

NEW QUESTION # 73

Complete the sentence The TOGAF standard covers the development of four architecture domains. Business. Data, Technology and _____.

- A. Transition
- B. Application
- C. Capability
- D. Segment

Answer: B

Explanation:

The TOGAF standard covers the development of four architecture domains: Business, Data, Technology and Application. These domains represent different aspects of an enterprise's architecture and provide a consistent way of describing, analyzing, and designing them. Reference: The TOGAF Standard | The Open Group Website, Section 2.2 Architecture Development Method (ADM).

NEW QUESTION # 74

What component of the Architecture Repository represents architecture requirements agreed with the Architecture Board?

- A. Reference Library
- B. Architecture Capability
- C. Governance Log
- D. Architecture Requirements Repository

Answer: D

Explanation:

The Architecture Requirements Repository stores all the requirements that are output of the architecture development cycle, as well as the requirements that are input to the architecture development cycle¹. The Architecture Requirements Repository includes the

following types of requirements¹:

*Stakeholder Requirements: These are the high-level requirements and expectations of the stakeholders, derived from the business drivers, goals, and objectives. They are captured and refined in the Architecture Vision phase and the Requirements Management phase.

*Architecture Requirements: These are the detailed requirements that specify what the architecture must do or deliver to meet the stakeholder requirements. They are derived and refined in the Business, Information Systems, and Technology Architecture phases.

*Implementation and Migration Requirements: These are the detailed requirements that specify what the implementation and migration projects must do or deliver to realize the architecture. They are derived and refined in the Opportunities and Solutions and Migration Planning phases.

The Architecture Requirements Repository is used to manage the architecture requirements throughout the architecture lifecycle, ensuring their traceability, consistency, and compliance¹. The Architecture Board is the authority that reviews and approves the architecture requirements, as well as the architecture deliverables and artifacts, as part of the architecture governance process².

References: 1: Architecture Requirements Repository 2: Architecture Board

NEW QUESTION # 75

Complete the sentence. Risk management involves: risk classification, identification,

- A. assessment, monitoring, mitigation and
- B. auditing, evaluation
- C. reporting, treatment
- D. measurement, response

Answer: A

Explanation:

In TOGAF's treatment of risk within architecture governance and ADM Guidelines & Techniques, risk management is seen as a continuous process including several phases. First one classifies potential risk types.

Then one identifies specific risks. After identification comes assessment (evaluating likelihood and impact), monitoring (tracking over time), mitigation (taking actions to reduce the risk), and related response or treatment options to decide what to do with residual risk. That sequence-classification, identification, assessment, monitoring, mitigation, and response-completes the risk management life cycle. It does not stop at evaluation or reporting; it includes active monitoring, control, and reaction to risks over time.

NEW QUESTION # 76

.....

Our OGEA-101 exam preparation materials have a higher pass rate than products in the same industry. If you want to pass OGEA-101 certification, then it is necessary to choose a product with a high pass rate. Our OGEA-101 study materials guarantee the pass rate from professional knowledge, services, and flexible plan settings. The 99% pass rate is the proud result of our OGEA-101 Study Materials. I believe that pass rate is also a big criterion for your choice of products, because your ultimate goal is to obtain OGEA-101 certification.
