Salesforce Certified Platform Developer Sample Questions (Q10-Q15):

NEW QUESTION # 10

Universal Containers has large number of custom applications that were built using a third-party JavaScript framework and exposed using Visualforce pages. The Company wants to update these applications to apply styling that resembles the look and feel of Lightning Experience. What should the developer do to fulfill the business request in the quickest and most effective manner?

- A. Rewrite all Visualforce pages as Lightning components.
- B. Set the attribute enableLightning to true in the definition.
- C. Enable Available for Lightning Experience, Lightning Communities, and the mobile app on Visualforce pages used by the custom application.
- D. Incorporate the Salesforce Lightning Design System CSS stylesheet into the JavaScript applications.

Answer: D

NEW QUESTION # 11

A company has a custom object, Order__c, that has a required, unique external ID field called OrderNumber__c. Which statement should be used to perform the DML necessary to insert new records and update existing records in a list of order__c records using the external ID field?

- A.
- B.
- C.
- D.

Answer: A

NEW QUESTION # 12

Which scenario is valid for execution by unit tests?

- A. Execute anonymous Apex as a different user.
- B. Generate a Visualforce PDF with `getContentAsPDF()`.
- C. Set the created date of a record using a system method.
- D. Load data from a remote site with a callout.

Answer: C

NEW QUESTION # 13

Universal Containers implemented a private sharing model for the Account object. A custom Account search tool was developed with Apex to help sales representatives find accounts that match multiple criteria they specify. Since its release, users of the tool report they can see Accounts they do not own. What should the developer use to enforce sharing permission for the currently logged-in user while using the custom search tool?

- A. Use the `with sharing` keyword on the class declaration.

- B. Use the schema describe calls to determine if the logged-in users has access to the Account object.
- C. Use the without sharing keyword on the class declaration.
- D. Use the UserInfo Apex class to filter all SOQL queries to returned records owned by the logged-in user.

Answer: A

Explanation:

Use the with sharing keyword on the class declaration. The with sharing keyword ensures that the Apex code respects the object-level, field-level, and record-level sharing settings for the user who is running the Apex code. This means that the code will only return records that the user has access to, according to their Sharing Settings. You can find more information about the with sharing keyword in the official Salesforce documentation (https://developer.salesforce.com/docs/atlas.en-us.apexcode.meta/apexcode/apex_classes_keywords_sharing.htm).

NEW QUESTION # 14

Which three statements are true regarding custom exceptions in Apex? (Choose three.)

- A. A custom exception class name must end with "Exception".
- B. A custom exception class can extend other classes besides the Exception class.
- C. A custom exception class must extend the system Exception class.
- D. A custom exception class can implement one or many interfaces.
- E. A custom exception class cannot contain member variables or methods.

Answer: A,B,D

NEW QUESTION # 15

.....
