In der heutigen konkurrenzfähigen IT-Branche können Sie mit IT-Zertifikaten Schritt für Schritt befördert werden. Viele Firmen würden Ihnen einen Berufsaufstieg oder die Gehaltserhöhung laut dem Goldgehalt Ihrer Zertifikate geben. Die CompTIA CAS-005 Zertifizierungsprüfung ist eine Prüfung von hohem Goldgehalt. Das CompTIA CAS-005 Zertifikat könne die Bedürfnisse der hart arbeitenden IT-Fachleuten abdecken. EchteFrage bietet Ihnen die zielgerichtete online Prüfungen zur CAS-005 Zertifizierungsprüfung. Sie können im Internet teilweise die Prüfungsfragen und Antworten zur CompTIA CAS-005 Zertifizierungsprüfung kostenlos als Probe herunterladen.

CompTIA CAS-005 Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none"> Governance, Risk, and Compliance: This section of the exam measures the skills of CompTIA security architects that cover the implementation of governance components based on organizational security requirements, including developing policies, procedures, and standards. Candidates will learn about managing security programs, including awareness training on phishing and social engineering.

Thema 2	<ul style="list-style-type: none"> • Security Operations: This domain is designed for CompTIA security architects and covers analyzing data to support monitoring and response activities, as well as assessing vulnerabilities and recommending solutions to reduce attack surfaces. Candidates will apply threat-hunting techniques and utilize threat intelligence concepts to enhance operational security.
Thema 3	<ul style="list-style-type: none"> • Security Architecture: This domain focuses on analyzing requirements to design resilient systems, including the configuration of firewalls and intrusion detection systems.
Thema 4	<ul style="list-style-type: none"> • Security Engineering: This section measures the skills of CompTIA security architects that involve troubleshooting common issues related to identity and access management (IAM) components within an enterprise environment. Candidates will analyze requirements to enhance endpoint and server security while implementing hardware security technologies. This domain also emphasizes the importance of advanced cryptographic concepts in securing systems.

CompTIA CAS-005 Originale Fragen, CAS-005 Exam Fragen

EchteFrage steht Ihnen ein umfassendes und zuverlässiges Konzept zur CompTIA CAS-005 Zertifizierungsprüfung zur Verfügung. Unser Konzept bietet Ihnen eine 100%-Pass-Garantie. Außerdem bieten wir Ihnen einen einjährigen kostenlosen Update-Service. Sie können im Internet kostenlos die Software und Prüfungsfragen und Antworten zur CompTIA CAS-005 Zertifizierungsprüfung als Probe herunterladen.

CompTIA SecurityX Certification Exam CAS-005 Prüfungsfragen mit Lösungen (Q309-Q314):

309. Frage

A company recently acquired a manufacturing plant. The acquiring company plans to create a unified network that does not impact its security posture. The manufacturing plant has been in operation for more than 30 years and has not followed an equipment replacement life cycle. Which of the following is the best way to meet this objective?

- A. Using a site-to-site VPN and integrating the manufacturing plant into the SIEM
- B. Deploying a proxy server at the manufacturing plant
- C. Implementing a WAF and patching the legacy IT equipment
- **D. Extending an SD-WAN with specific policies**

Antwort: D

Begründung:

The best answer is B. Extending an SD-WAN with specific policies because the question asks for a way to create a unified network while not weakening the acquiring company's security posture. In CompTIA SecurityX CAS-005, SD-WAN is explicitly part of Security Architecture, under "Deperimeterization: SASE, SD-WAN, and software-defined networking." The same official objective set also lists "Network architecture:

segmentation, microsegmentation, VPN..." and "Security boundaries... secure zones." Those objective areas support a policy-based integration approach in which the plant can be connected while maintaining segmentation, security zones, and centralized enforcement.

This is especially important because the manufacturing plant is old and has not followed an equipment refresh life cycle. That strongly suggests there may be legacy systems, operational technology, and devices that cannot be rapidly modernized or patched. A policy-driven SD-WAN design is more effective than simply connecting the site because it allows the acquiring company to preserve trust boundaries and apply differentiated controls to plant traffic. That aligns directly with CompTIA's official SecurityX emphasis on segmentation, secure zones, and deperimeterization technologies.

Why the other options are not the best choice:

A is not best because a WAF protects web applications, not an entire acquired manufacturing environment, and the scenario does not say the core issue is a web application stack. Also, "patching the legacy IT equipment" is unrealistic in a plant with decades-old infrastructure and does not answer the requirement for a unified but controlled network design. C is weaker because a site-to-site VPN provides connectivity and SIEM provides visibility, but neither by itself gives the same policy-based segmentation and architectural control as SD-WAN. D is too narrow because a proxy server does not solve full-site network integration or

architecture-wide posture management.

310. Frage

A company is developing a new service product offering that will involve the Security Officer (CISO) researching the relevant compliance regulations. Which of the following best describes the CISO's action?

- A. Reference framework
- B. Data retention
- C. Data classification
- D. Due diligence

Antwort: D

Begründung:

Due diligence involves investigating and verifying processes, regulations, or environments to ensure compliance with laws and standards.

311. Frage

A company experienced a data breach, resulting in the disclosure of extremely sensitive data regarding a merger. As a regulated entity, the company must comply with reporting and disclosure requirements. The company is concerned about its public image and shareholder values. Which of the following best supports the organization in addressing its concerns?

- A. Crisis management plan
- B. Business impact analysis
- C. Data subject access request
- D. Supply chain management program

Antwort: A

312. Frage

A Chief Information Security Officer (CISO) is developing a third-party risk management program and wants to establish an order of preference for solicitation and acceptance of audit and assessment results from business partners. The CISO prefers a formal certification against an established framework, which should be considered more reliable than self-attestations. Which of the following is most likely the reason for this perspective?

- A. Certifications are typically issued against a formal standard.
- B. A certification audit is managed by a central authority.
- C. Assessments are based on evidence, not judgments.
- D. For standards like PCI, self-attestations are more reliable than certifications.

Antwort: A

313. Frage

A global organization wants to manage all endpoint and user telemetry. The organization also needs to differentiate this data based on which office it is correlated to. Which of the following strategies best aligns with this goal?

- A. Data labeling
- B. Continuous monitoring
- C. Centralized logging
- D. Sensor placement

Antwort: A

Begründung:

Comprehensive and Detailed

Managing telemetry and differentiating it by office requires a way to categorize data. Let's evaluate:

A . Sensor placement: Useful for data collection but doesn't inherently differentiate by office.

B . Data labeling: Assigns metadata (e.g., office location) to telemetry, enabling differentiation. This aligns with CAS-005's focus on data management for security operations.

C . Continuous monitoring: Ensures ongoing data collection but doesn't address differentiation.

D . Centralized logging: Consolidates data but lacks specific office-based categorization without labeling.

314. Frage

.....

In den letzten Jahren entwickelt sich die IT-Branche sehr schnell. Viele Leute fangen an, IT-Kenntnisse zu lernen. Sie geben viel Mühe aus, um eine bessere Zukunft zu haben. Die CompTIA CAS-005 Zertifizierungsprüfung ist eine unentbehrliche Zertifizierungsprüfung in der IT-Branche. Viele Leute machen sich große Sorgen um die Prüfung. Heute empfehle ich Ihnen einen guten Methode, nämlich, die Fragenkataloge zur CompTIA CAS-005 Zertifizierungsprüfung von EchteFrage zu kaufen. Sie können Ihnen helfen, die CompTIA CAS-005 Zertifizierungsprüfung 100% zu bestehen. Sonst geben wir Ihnen eine volle Rückerstattung. Und Sie würden keine Verluste erleiden.
