- B. ExpressRoute
- C. SSL VPN connections
- D. GRE tunnels

NEW QUESTION # 42
The cloud administration team is reviewing an AWS deployment that was done using CloudFormation.
The deployment includes six FortiGate instances that required custom configuration changes after being deployed. The team notices that unwanted traffic is reaching some of the FortiGate instances because the template is missing a security group.

- B. CloudFormation rejects the update and warns that a new full stack is required.
