Best Accurate SolarWinds Current SCP-NPM Exam Content | Try Free Demo before Purchase

BONUS!!! Download part of Exam4Tests SCP-NPM dumps for free: https://drive.google.com/open?id=1tA0cTeRzEUiAHBfABk7ev4PHI4ETFNAw

We believe that you can buy our SCP-NPM demo PDF torrent without any misgivings, Firstly, we have a strong experts team who are devoted themselves to research of the technology, which ensure the high-quality of our SCP-NPM Dump guide, Exam4Tests offers SolarWinds Network Performance Monitor (NPM) Exam SCP-NPM free Updates. It is no exaggeration to say that the value of the certification training materials is equivalent to all exam related reference books.

SolarWinds SCP-NPM (SolarWinds Network Performance Monitor (NPM)) exam is a certification that is designed to test the proficiency of IT professionals in monitoring and analyzing network performance. SolarWinds Network Performance Monitor (NPM) Exam certification is offered by SolarWinds, a leading provider of network management software, and is designed to validate the knowledge and skills of network administrators, engineers, and other IT professionals who work with SolarWinds products.

Quiz 2026 SolarWinds High Hit-Rate SCP-NPM: Current SolarWinds Network Performance Monitor (NPM) Exam Exam Content

By propagating all necessary points of knowledge available for you, our SCP-NPM practice materials helped over 98 percent of former exam candidates gained successful outcomes as a result, Our SCP-NPM practice materials have accuracy rate in proximity to 98 and over percent for your reference. Up to now we classify them as three versions. They are pdf, software and the most convenient one app. Each of them has their respective feature and advantage including new information that you need to know to pass the test.

The SCP-NPM exam covers a range of topics related to network performance monitoring, including the installation and configuration of the NPM tool, network device discovery, network topology mapping, network fault and performance monitoring, and reporting and alerting. SCP-NPM exam is designed to ensure that candidates have a deep understanding of the SolarWinds NPM tool and can use it to monitor and troubleshoot complex network environments.

SolarWinds SCP-NPM (SolarWinds Network Performance Monitor) Certification Exam is a professional certification program designed for network and IT professionals. It is designed to validate the skills and knowledge required to install, configure, and manage SolarWinds Network Performance Monitor (NPM) software. SCP-NPM Exam covers a range of topics related to network monitoring, including network performance monitoring, device configuration management, network topology discovery, and more.

SolarWinds Network Performance Monitor (NPM) Exam Sample Questions (Q57-Q62):

NEW QUESTION # 57
You need to add a new subnet of 500 devices for monitoring. What is the first step to incorporate these devices into NPM?

- A. Perform a Network Discovery
- B. Collect NetFlow from a core router
- C. Add the nodes using the Add Node feature in Manage Nodes
- D. Measure network-wide bandwidth consumption

Answer: A

Explanation:
To add a new subnet of 500 devices for monitoring, the first step is to perform a network discovery using the Network Sonar Wizard in NPM. This wizard allows you to scan your network by IP address range, subnet, or seed device and automatically discover and add nodes and interfaces to NPM for monitoring. You can also specify credentials, polling settings, and custom properties for the discovered devices. Performing a network discovery can help you quickly and efficiently incorporate new devices into NPM without manually adding them one by one. References: Discover your network devices, Specify subnets, Discover devices by subnets

NEW QUESTION # 58
You have two groups of users - one in Sydney and one in Perth. How do you limit the users within the Orion Platform so they only have access to the devices in their location?

- A. Configure Network Atlas to show only devices in their geographical location
- B. Configure the Orion Web Console settings to show only devices in the user's geographical location
- C. Group devices into geographical Orion groups and use single group Account limitations to limit user access
- D. Use the Orion Service Manager to limit user access to nodes only in their location

Answer: C

Explanation:
According to the SolarWinds NPM Administrator Guide, you can use Orion groups to organize your network objects based on any criteria, such as location, device type, department, etc. You can then apply account limitations based on Orion groups to restrict user access to only the network objects that belong to a specific group. For example, you can create two Orion groups, one for Sydney and one for Perth, and assign the devices in each location to the corresponding group. Then, you can use the single group Account limitation to limit the users in Sydney to only view the Sydney group, and the users in Perth to only view the Perth group. References: SolarWinds NPM Administrator Guide, page 163-165; Limit users to specific network areas in the SolarWinds Platform

NEW QUESTION # 59
Your network includes the headquarters and three remote sites. Users from remote site A complain they do not have access to the company's accounting server. Users from remote site B and C have access to the accounting server. How can you find the source of the issue?

- A. Use NetPath to see if there are problem areas between remote site A and remote sites B and C
- B. Use NetPath to see if there are problem areas between remote site A and the headquarters
- C. Verify that the accounting servers' CPU utilization are not abnormally high
- D. Verify that the accounting servers are up

Answer: B

NEW QUESTION # 60
You start a new job where NPM is already in use. As soon as you are added to the alert list, you begin receiving "high traffic utilization" alerts from a handful of interfaces.
When you check the alert, the traffic spike has ended. Your new colleagues advise you to ignore these alerts because the spikes rarely last for more than a couple of minutes and are only a concern if they last longer.

How should NPM be modified so you receive fewer false alerts?

- A. Increase the statistics polling frequency on the problematic interfaces
- B. Increase the status polling frequency on the problematic interfaces
- C. Configure the alert so that it resets only when traffic utilization remains high for a sustained period
- D. Configure the alert so that it triggers only when traffic utilization remains high for a sustained period

Answer: D

Explanation:
The best way to reduce false alerts for high traffic utilization is to configure the alert trigger condition to be more specific and accurate. By setting the alert to trigger only when traffic utilization remains high for a sustained period, you can avoid getting alerted for short-lived spikes that are not a cause for concern. You can use the Time of Day and Trigger Condition options in the alert configuration wizard to define the duration and threshold of the high traffic utilization condition. For example, you can set the alert to trigger only when traffic utilization is greater than 80% for more than 10 minutes during business hours. References:

NEW QUESTION # 61
Retention policies require you to keep Syslog messages in the database for 9 days before you can discard them. Syslog messages from 8 days ago are missing.
What is likely the issue?

- A. Default Syslog retention period is seven days
- B. Default Syslog web filter is seven days
- C. Database compaction runs weekly
- D. Detailed records are summarized after seven days

Answer: A

Explanation:
By default, Orion NPM retains Syslog messages in the database for seven days before discarding them. This means that any Syslog messages older than seven days are deleted from the database and cannot be viewed or searched in the web console. To change the default Syslog retention period, you need to modify the Database Settings on the Orion Polling Settings page in the web console. You can also use the Database Manager tool to manually delete or archive Syslog messages from the database. Reference: SolarWinds SCP Study Aid - NPM, page 19; NPM Administrator Guide, page 111.
