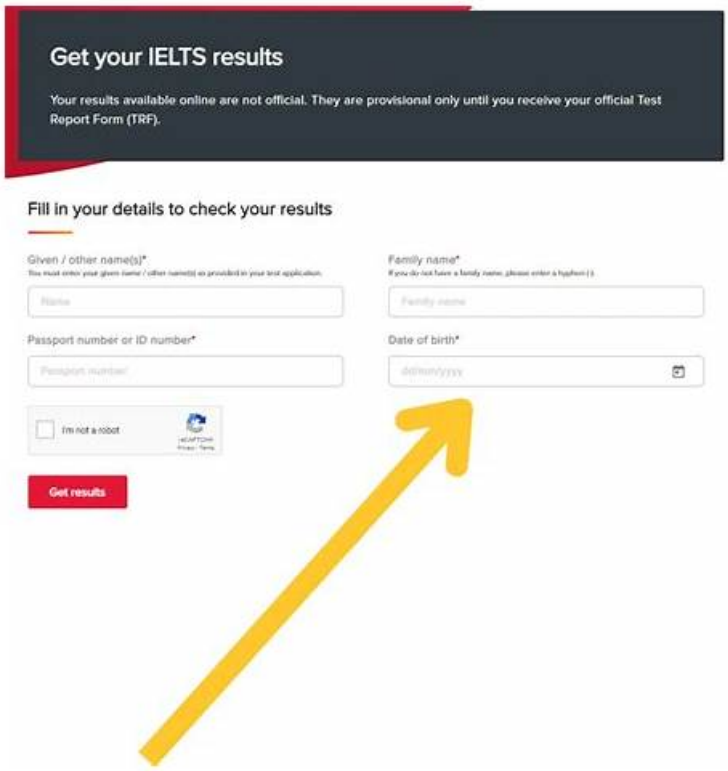
Exams IDP Torrent - Latest Test IDP Experience



There are three versions of our IDP learning engine which can allow all kinds of our customers to use conveniently in different situations. They are the PDF, Software and APP online versions. I specially recomend the APP online version of our IDP Exam Dumps. With the online app version of our IDP actual exam, you can just feel free to practice the questions in our IDP training materials on all kinds of electronic devices, such as IPAD, telephone, computer and so on!

As the talent team grows, every fighter must own an extra technical skill to stand out from the crowd. To become more powerful and struggle for a new self, getting a professional IDP certification is the first step beyond all questions. We suggest you choose our IDP test prep ----an exam braindump leader in the field. Since we release the first set of the IDP quiz guide, we have won good response from our customers and until now---a decade later, our products have become more mature and win more recognition. We promise to give you a satisfying reply as soon as possible. All in all, we take an approach to this market by prioritizing the customers first, and we believe the customer-focused vision will help our IDP Test Guide' growth.

Pass Guaranteed 2026 The Best CrowdStrike IDP: Exams CrowdStrike Certified Identity Specialist(CCIS) Exam Torrent

Without complex collection work and without no such long wait, you can get the latest and the most trusted IDP exam materials on our website. The different versions of our dumps can give you different experience. There is no doubt that each version of the IDP Materials is equally effective. To instantly purchase our IDP exam materials with the safe payment PayPal, you can immediately download it to use.

CrowdStrike Certified Identity Specialist(CCIS) Exam Sample Questions (Q43-Q48):

NEW QUESTION # 43
Falcon Identity Protection can continuously assess identity events and associate them with potential threats WITHOUTwhich of the following?

- A. API-based connectors

- B. The need for string-based queries
- C. Machine-learning-powered detection rules
- D. Ingesting logs

Answer: B

Explanation:
Falcon Identity Protection is architected as alog-free identity security platform, a core tenet emphasized throughout the CCIS curriculum. Unlike traditional SIEM- or log-based solutions, Falcon Identity Protection doesnot require string-based queriesto continuously assess identity events or associate them with threats.
Instead, the platform relies onmachine-learning-powered detection rules,real-time authentication traffic inspection, andAPI-based connectorsto collect and analyze identity telemetry directly from domain controllers and identity providers. This approach eliminates the operational complexity of building, tuning, and maintaining query logic.
String-based queries are commonly associated with legacy log aggregation tools and SIEM platforms, where analysts must manually search logs to identify suspicious behavior. Falcon Identity Protection replaces this model withbehavioral baselining and automated correlation, enabling continuous identity risk assessment without human-driven query execution.
Because Falcon does not require string-based queries to operate,Option Dis the correct and verified answer.

NEW QUESTION # 44
Which entity tab will show an administrator how to lower the account's risk score?

- A. Asset
- B. Timeline
- C. Risk
- D. Activity

Answer: C

Explanation:
In CrowdStrike Falcon Identity Protection, theRisktab within a user or account entity provides administrators with direct visibility intowhy an account has a specific risk score and what actions can be taken to reduce that score. This functionality is a core component of theUser AssessmentandRisk Assessmentsections of the CCIS (CrowdStrike Identity Specialist) curriculum.
The Risk tab aggregates bothanalysis-based risksanddetection-based risks, clearly identifying contributing factors such as compromised passwords, excessive privileges, risky authentication behavior, stale or never- used accounts, and policy violations. It also highlights theseverity, likelihood, and consequenceof each risk factor, allowingadministrators to prioritize remediation efforts effectively. Most importantly, this tab provides actionable guidance, enabling teams to understand which specific remediation steps-such as enforcing MFA, resetting credentials, reducing privileges, or disabling unused accounts-will directly lower the account's overall risk score.
Other entity tabs do not provide this capability. TheTimelinetab focuses on chronological events and detections, theActivitytab displays authentication and behavioral activity, and theAssettab shows associated endpoints and resources. Only theRisktab is designed to explain risk drivers and guide remediation, making Option Dthe correct and verified answer.

NEW QUESTION # 45
When an endpoint that has not been used in the last90 daysbecomes active, a detection forUse of Stale Endpointis reported.

- A. 180 days
- B. 90 days
- C. 60 days
- D. 30 days

Answer: B

Explanation:
Falcon Identity Protection identifiesstale endpointsas systems that have not authenticated or shown activity for an extended period and then suddenly become active. According to the CCIS curriculum, an endpoint that has been inactive for90 daysand then resumes activity will trigger aUse of Stale Endpointdetection.
This detection is important because attackers frequently exploit dormant or forgotten systems to re-enter environments, evade monitoring, or move laterally. A long period of inactivity followed by sudden authentication activity is considered a strong identity risk signal.

The 90-day threshold is used to establish a reliable inactivity baseline while minimizing false positives.
Shorter timeframes could incorrectly flag normal usage patterns, while longer timeframes could delay detection of genuine threats.
Because Falcon explicitly defines stale endpoint activity using a90-day inactivity window,Option Bis the correct answer.

NEW QUESTION # 46
Under which CrowdStrike documentation category could you find Identity Protection API information?

- A. Falcon Management
- B. CrowdStrike APIs
- C. Tools and Reference
- D. CrowdStrike Store

Answer: B

Explanation:
Identity Protection API documentation is part of CrowdStrike's centralized API documentation structure.
According to the CCIS curriculum,Identity Protection API information is located under the
"CrowdStrike APIs" documentation category.
This category includes:
* API authentication and scopes
* Identity Protection GraphQL schemas
* Query examples for detections, incidents, users, and risk
* Usage guidance and limitations
CrowdStrike consolidates all API-related documentation in one location to ensure consistent access and maintenance across Falcon modules. Identity Protection APIs are not documented under Falcon Management, Store, or general reference sections.
Because all product APIs-including Identity Protection-are documented underCrowdStrike APIs,Option Dis the correct and verified answer.

NEW QUESTION # 47
The Enforce section of Identity Protection is used to:

- A. Define policy rules that determine what actions to take in response to certain triggers observed in the environment
- B. Configure domains, appliances, subnets, connectors, risk configuration, and settings
- C. View all identity-based detections and identity-based incidents in the environment
- D. Gain an overview of the domain and indicate whether the domain follows best security practice

Answer: A

Explanation:
The Enforce section of Falcon Identity Protection is dedicated to policy-based identity enforcement.
According to the CCIS curriculum, this section allows administrators to define and manage Policy Rules and Policy Groups that specify how the platform should respond when identity-related conditions are detected.
These rules evaluate triggers such as risky authentication behavior, privilege misuse, compromised credentials, or elevated risk scores, and then execute actions like blocking access, enforcing MFA, or initiating Falcon Fusion workflows. Enforce is therefore the execution layer of Falcon's identity security model.
The other options correspond to different sections of the platform:
Configuration tasks are handled in Configure.
Detections and incidents are reviewed in Monitor or Explore.
Domain posture overviews are displayed in Domain Security Overview.
Because Enforce directly controls what actions are taken in response to identity risk, Option B is the correct and verified answer.

NEW QUESTION # 48
.....

Three versions are available for IDP study materials, and you can choose the most suitable one according to your own needs. IDP PDF version is printable, and you can print them and take some notes on them if you want. IDP Soft test engine can be used in more than 200 personal computers, and they support MS operating system. IDP Online Test engine is convenient and easy to learn, and it

supports all web browsers. You can have a general review of what you have learned. Just have a try, and there is always a version for you.
