- A. Scalability and compliance
- B. Secure and compliant frameworks

- D. Enterprise-grade orchestration

### NEW QUESTION # 18

(What does business AI mean? Note: There are 3 correct answers to this question.)

- A. Agility
- B. Enterprise data
- C. Processes
- D. Technology foundation
- E. Customer centricity

**Answer: B,C,D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: Business AI in SAP is defined as the combination of technology foundation (the underlying AI technology), enterprise data (the business data it leverages), and processes (the business processes it enhances and automates). This holistic approach ensures AI is embedded in business contexts for relevant, reliable, and responsible outcomes, with customer centricity and agility as resulting benefits rather than core components.

Exact extracts supporting this:

"What does SAP Business AI mean? Essentially three things: The technology it is based on. The enterprise data it is trained on. The processes it runs through."learning.sap.com Enterprise data: "Grounded in customers' business data."learning.sap.com Processes: "Embed AI features across all business processes, delivering immediate value to businesses."events.sap.com "Automating processes, and enabling predictive analytics."community.sap.com Technology foundation: "The technology it is based on."learning.sap.com "These AI functionalities are designed to help businesses automate processes, gain insights from data, improve decision-making."community.sap.com Other options are incorrect because:

Option B: Customer centricity is a benefit or principle in SAP solutions (e.g., in supply chain), but not a core definitional component of business AI.

Option D: Agility is an outcome enabled by business AI, such as increasing business agility, but not part of its fundamental definition. Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: From the SAP Learning course "Discovering SAP Business AI," specifically the unit "Explaining the role of SAP Business AI," which defines business AI as the intersection of technology, data, and processes. Supported by SAP community blogs and product overviews, aligning with C\_BCBIAI\_2502 certification for positioning AI in the SAP Business Suite.
