Our HPE0-S59 training quiz will be your best teacher who helps you to find the key and difficulty of the exam, so that you no longer feel confused when review. Our HPE0-S59 study materials will be your best learning partner and will accompany you through every day of the review. Our HPE0-S59 Exam Quiz will help you to deal with all the difficulties you have encountered in the learning process and make you walk more easily and happily on the road of studying.

In our study, we found that many people have the strongest ability to use knowledge for a period of time at the beginning of their knowledge. As time goes on, memory fades. Our HPE0-S59 study materials are designed to help users consolidate what they have learned, will add to the instant of many training, the user can test their learning effect in time after finished the part of the learning content, have a special set of wrong topics in our HPE0-S59 Study Materials, enable users to find their weak spot of knowledge in this function, iterate through constant practice, finally reach a high success rate.

## S59 Valid Exam Materials

Every candidate wants to pass the HPE0-S59 exam in the least time successfully. More importantly, it is necessary for these people to choose the convenient and helpful HPE0-S59 test questions as their study tool in the next time. Because their time is not enough to prepare for the HPE0-S59 exam, and a lot of people have difficulty in preparing for the exam, so many people who want to pass the HPE0-S59 Exam and get the related certification in a short time are willing to pay more attention to our HPE0-S59 study materials as the pass rate is high as 99% to 100%.

### HPE Compute Solutions Sample Questions (Q109-Q114):

#### NEW QUESTION # 109

Your customer has an HPE Synergy frame equipped with a D3940 Storage Module. Each of the compute nodes has an appropriate storage controller installed and two 12Gb SAS switches installed in the first fabric.

The customer reports that compute nodes cannot access the storage module. What should you verify first when troubleshooting this problem?

- A. If the D3940 storage module is properly licensed through HPE OneView interface.
- B. If there is a logical interconnect created based on the 12Gb SAS switches.
- C. If there is at least one iSCSI network configured that will provide access to the module.
- D. If the D3940 module is imported in managed state that allows volume provisioning.

**Answer: B**

Explanation:

When compute nodes cannot access the D3940 Storage Module in an HPE Synergy environment, the first thing to check is whether a logical interconnect has been created based on the 12Gb SAS switches. Logical interconnects are essential for defining the connection and communication pathways between the compute nodes and the storage module. Without a proper logical interconnect configuration, the compute nodes will not be able to access the storage module.

#### NEW QUESTION # 110

A logical interconnect group can span on multiple HPE Synergy frames for which interconnect type?

- A. Brocade 32Gb Fibre Channel Switch Module for HPE Synergy
- B. HPE virtual Connect SE 32 Gb FC Module for Synergy
- C. HPE Virtual Connect SE 100 Gb F32 Module for Synergy
- D. HPE Synergy 12 Gb SAS Connection Module

**Answer: C**

Explanation:

A logical interconnect group in HPE Synergy is used to define a consistent network configuration across multiple frames. The HPE Virtual Connect SE 100 Gb F32 Module for Synergy allows for logical interconnect groups to span across multiple frames. This is because the 100 Gb module supports high-speed connectivity and the necessary infrastructure to maintain consistent network configurations over multiple frames, which is essential for scalable and flexible Synergy environments.

#### NEW QUESTION # 111

Drag and Drop Question

Your customer plans to use HPE OneView for VMware vCenter Server to deploy ESXi systems.

They created a server profile template that they want to use in HPE OneView. Put the steps required to configure HPE OneView for VMware vCenter Server on the left into their correct order on the right.

**Answer:**

Explanation:

Explanation:

1. Add vCenter Server to HPE OneView for VMware vCenter Server.

Establish the connection between HPE OneView and VMware vCenter so that HPE OneView can manage the ESXi deployment and infrastructure.

2. Add HPE OneView credentials to the vCenter Server and create OS Deployment Plan.

Provide the necessary credentials in vCenter to enable the integration with HPE OneView and create a deployment plan for deploying ESXi.

3. Upload HPE-friendly ESXi image.

Ensure the ESXi image is compatible with HPE infrastructure by uploading it to the deployment plan.

4. Deploy new ESXi systems using vCenter Server interface.

Deploy ESXi systems on the servers using the deployment plan through the vCenter Server interface.

These steps follow the logical process of integrating HPE OneView with VMware vCenter, creating deployment plans, and deploying the operating system on HPE server profiles. Proper sequencing ensures that the environment is ready for automated OS provisioning.

### NEW QUESTION # 112

Your customer wants to update the firmware for 36 HPE Synergy 480 Gen 10 compute modules with a server profile assigned from a server profile template.

Put the steps required to achieve this goal on the left into their correct order on the right.

#### Answer:

Explanation:

Explanation:

To update the firmware for the HPE Synergy 480 Gen 10 compute modules with a server profile assigned from a server profile template, the steps should be performed in the following order:

\* Upload SPP to HPE OneView repository. (First, the Service Pack for ProLiant (SPP) containing the firmware updates must be uploaded to the HPE OneView repository.)

\* Select Firmware baseline within server profile template. (Next, you need to select the desired firmware baseline in the server profile template.)

\* Select installation method (online or offline). (Choose whether the firmware updates will be installed online or offline.)

\* Update all server profiles from the template. (Finally, update all server profiles from the modified template to apply the firmware updates to the compute modules.)

### NEW QUESTION # 113

An HPE partner is helping a customer onboard HPE ProLiant servers, which use iLO 6, in HPE Compute Ops Management. The customer has asked what the minimum software version for iLO 6 is required.

What could affect the answer?

- A. Whether the customer plans to use HPE Compute Ops Management only to monitor the servers or also to manage their iLO and BIOS settings
- B. Which series the HPE ProLiant servers are (such as 100, 300, or 500)
- C. Whether the customer plans to use the simplified activation key onboarding process
- D. Which iLO license (Advanced or Standard) the servers have

#### Answer: A

### NEW QUESTION # 114

.....

The users of HPE0-S59 exam dumps cover a wide range of fields, including professionals, students, and students of less advanced culture. This is because the language format of our study materials is easy to understand. No matter what information you choose to study, you don't have to worry about being a beginner and not reading data. HPE0-S59 Test Questions are prepared by many experts. The content is very rich, and there are many levels. Our study materials want every user to understand the product and be able to really get what they need.
