SAP Certified Associate - Positioning SAP Business Suite Sample Questions (Q29-Q34):

NEW QUESTION # 29

Match the challenges to their respective personas.

Retaining and engaging talent as skills requirements evolve	Delivering modernization and AI-powered innovation at the same time	Steering transformation by balancing growth and profitability	Running resilient global supply chains amidst constant disruptions	Meeting rising customer expectations	Optimizing cost, quality, availability and sustainability
-------------------------------------------------------------	---------------------------------------------------------------------	---------------------------------------------------------------	--------------------------------------------------------------------	--------------------------------------	-----------------------------------------------------------

Answer:

Explanation:

- * CFO:Steering transformation by balancing growth and profitability
- * CPO:Optimizing cost, quality, availability and sustainability
- * COO:Running resilient global supply chains amidst constant disruptions
- * CHRO:Retaining and engaging talent as skills requirements evolve
- * CRO:Meeting rising customer expectations
- * CIO:Delivering modernization and AI-powered innovation at the same time

NEW QUESTION # 30

What does SAP do to help installed-base customers with their transformation journey to the SAP Business Suite?

- A. Support and accelerate their lift and shift efforts to cloud ERP only
- **B. Position and leverage the GROW with SAP transformation journey**
- C. Move capabilities into the public cloud wherever possible

Answer: B

Explanation:

GROW with SAP is SAP's official program designed to help customers (including existing or installed-base customers) transform and accelerate their move to SAP Business Suite (especially S/4HANA Cloud and cloud-based ERP) using best practices, ready-to-run cloud solutions, and guided transformation journeys.

It provides tools, services, and support to simplify and speed up the transition-not just "lift and shift" but true business transformation.

NEW QUESTION # 31

Which SAP Business Suite modules are essential for supply chain management? There are 2 correct answers to this question.

- A. SAP SCM (Supply Chain Management)
- B. SAP CRM
- C. SAP ERP
- D. SAP BusinessObjects

Answer: A,C

NEW QUESTION # 32

A global retail company is struggling with fragmented customer data across multiple departments, leading to inefficiencies in sales and service operations. They need an SAP solution that integrates customer interactions, optimizes sales processes, and enhances customer insights. Which SAP solutions should they implement? There are 3 correct answers to this question.

- A. SAP Ariba
- B. SAP Business Warehouse
- C. SAP CRM
- D. SAP Predictive Analytics
- E. SAP ERP

Answer: B,C,D

NEW QUESTION # 33

What is a key advantage of SAP Business Data Cloud Intelligent Applications?

- A. They primarily focus on raw data collection with minimal integrated analysis capabilities.
- B. They provide pre-configured dashboards with AI-driven insights for faster decision-making.
- C. They remove the requirement for formal data governance and compliance policies.

Answer: B

Explanation:

The question asks for a key advantage of SAP Business Data Cloud Intelligent Applications, which are prebuilt, AI-powered applications within SAP Business Data Cloud designed to deliver actionable insights and automate business processes. According to official SAP documentation and the provided search results, the primary advantage is that these applications provide pre-configured dashboards with AI-driven insights for faster decision-making, enabling business users to access ready-to-use analytics with minimal setup. This makes Option B the correct answer.

Explanation of Correct answer:

Option A: They provide pre-configured dashboards with AI-driven insights for faster decision-making.

This is correct because SAP Business Data Cloud Intelligent Applications are designed to deliver pre-configured, SAP-managed dashboards and analytics that leverage AI to provide actionable insights, significantly reducing the time-to-value for business users. These applications combine data from SAP Datasphere and visualization capabilities from SAP Analytics Cloud, infused with AI-driven features like predictive analytics and simulations, to enable agile and informed decision-making. The Describing the Key Capabilities and Benefits of SAP Business Data Cloud lesson on learning.sap.com states:

"New to SAP Business Data Cloud (SAP BDC) are context-aware SAP Business Data Cloud Intelligent Applications. These pre-configured dashboards provide ready-to-run insights by combining planning and analysis, all infused with trusted Artificial Intelligence (AI) to drive smarter, faster decisions. The intelligent applications enable agile decision-making, predictive analysis, and simulations, leading to better business outcomes." learning.sap.com Additionally, the Intelligent Applications in Business Data Cloud page on www.sap.com elaborates:

"Surface actionable insights and recommendations for analytics and planning with intelligent applications connected directly to your business data. ... These intelligent applications are adaptive, AI-powered applications that learn from your data, understand business context, and act on your behalf to transform business outcomes." sap.com For example, applications like Working Capital Insights or People Intelligence provide prebuilt dashboards that integrate operational and financial data, offering AI-driven recommendations for areas like cash flow optimization or workforce planning. The installation of these applications automates the creation of underlying data models, replication flows, and SAP Analytics Cloud stories, requiring only a few clicks to deploy, as noted in the Managing and Leveraging SAP Business Data Cloud Intelligent Applications lesson:

"From a business user perspective, the result of an installed Intelligent Application is a ready-to-use dashboard. The Intelligent Application is presented to the business user as an SAP Analytics Cloud story which is connected to one or more underlying SAP Datasphere models. The story and all of these connected models are automatically created during the installation of an Intelligent Application." learning.sap.com This pre-configured, AI-driven approach ensures faster decision-making by eliminating the need for extensive manual configuration, making Option A the key advantage.

Explanation of Incorrect Answers:

Option B: They remove the requirement for formal data governance and compliance policies.

This is incorrect because SAP Business Data Cloud Intelligent Applications do not eliminate the need for formal data governance and compliance policies. In fact, these applications rely on robust governance to ensure data quality, security, and compliance, which are critical for trusted AI and analytics outcomes. The SAP Business Data Cloud overview on www.sap.com emphasizes:

"SAP Business Data Cloud delivers fully managed capabilities for business data fabric, ... ensuring data across applications and operations has a foundation for generative AI that is reliable, responsible, and relevant." sap.com Furthermore, data products within SAP Business Data Cloud include metadata and governance policies to maintain trust and compliance:

"In SAP BDC, data products are curated, reusable, and business-ready data assets designed to deliver immediate value. They encapsulate not just raw data, but also metadata, business context, and governance policies, making them trusted, actionable tools for analysis, planning, and decision-making." learning.sap.com This indicates that governance and compliance are integral to the platform, not removed, making Option B incorrect.

Option C: They primarily focus on raw data collection with minimal integrated analysis capabilities.

This is incorrect because SAP Business Data Cloud Intelligent Applications are designed to provide advanced analytics and AI-driven insights, not just raw data collection. They integrate data from SAP and non-SAP sources, enrich it with business semantics, and deliver sophisticated analysis through prebuilt dashboards and AI capabilities, as opposed to focusing on raw data. The SAP Business Data Cloud features page on www.sap.com states:

constates:

"Deliver transformational insights for advanced analytics and planning with prebuilt applications and data products across all lines of business. ... Make faster, smarter decisions with prebuilt analytical apps across your enterprise for Core Enterprise Analytics, People Analytics, and more." sap.com The SAP Sapphire Innovation Guide 2025 further highlights:

"Intelligent applications within SAP Business Data Cloud deliver transformational insights across the entire SAP Business Suite, integrating analytics, AI, and simulations into transactional workflows." sap.com This focus on integrated analytics and AI-driven insights directly contradicts Option C, which misrepresents the applications as having minimal analysis capabilities.

Summary:

The key advantage of SAP Business Data Cloud Intelligent Applications is that they provide pre-configured dashboards with AI-driven insights for faster decision-making, as stated in Option A. These applications leverage SAP Analytics Cloud and SAP Datasphere to deliver ready-to-use, context-aware analytics, enabling rapid deployment and agile decision-making. Option B is incorrect because governance and compliance remain essential, and Option C is incorrect because the applications prioritize advanced analytics over raw data collection. This aligns with SAP's strategy to streamline data-to-decision processes within SAP Business Suite, as supported by the provided search results and official documentation.
