

AB-900 Practice Mock | Professional AB-900 New Real Test: Microsoft 365 Copilot & Agent Administration Fundamentals

With the rapid development of society, people pay more and more attention to knowledge and skills. So every year a large number of people take AB-900 tests to prove their abilities. But even the best people fail sometimes. In addition to the lack of effort, you may also not make the right choice on our AB-900 Exam Questions. A good choice can make one work twice the result with half the effort, and our AB-900 study materials will be your right choice.

AB-900 practice test can be your optimum selection and useful tool to deal with the urgent challenge. With over a decade's striving, our AB-900 training materials have become the most widely-lauded and much-anticipated products in industry. We have three versions of AB-900 Exam Questions by modernizing innovation mechanisms and fostering a strong pool of professionals. Therefore, rest assured of full technical support from our professional elites in planning and designing AB-900 practice test.

AB-900 New Real Test - AB-900 Reliable Braindumps Free

In addition, you can print these Microsoft AB-900 PDF questions for paper study in this format of GuideTorrent product frees you from restrictions of time and place as you can study AB-900 exam questions from your comfort zone in your spare time. The second version is the web-based format of the Microsoft AB-900 Practice Test. Browsers such as Internet Explorer, Microsoft Edge, Firefox, Safari, and Chrome support the web-based practice exam.

Microsoft AB-900 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Identify the core features and objects of Microsoft 365 services: This domain covers the main Microsoft 365 objects such as users, groups, licenses, mailboxes, SharePoint sites, and Teams. It also focuses on managing organization settings, roles, authentication, authorization, and core security features using Microsoft Entra and Microsoft Defender.
Topic 2	<ul style="list-style-type: none"> Perform basic administrative tasks for Copilot and agents: This domain focuses on managing Copilot and agents, including licensing, feature controls, and usage monitoring. It also covers creating agents, managing prompts, configuring user access, and monitoring agent activity through admin centers.
Topic 3	<ul style="list-style-type: none"> Understand data protection and governance tasks for Microsoft 365 and Copilot: This domain explains how Microsoft Purview protects and governs organizational data through classification, sensitivity labels, retention, and compliance tools. It also covers how Copilot accesses data, follows permissions, and how administrators monitor risks, alerts, and oversharing.

Microsoft 365 Copilot & Agent Administration Fundamentals Sample Questions (Q11-Q16):

NEW QUESTION # 11

Your organization has a Microsoft 365 subscription.

All users are assigned Microsoft 365 Copilot licenses.

Some users report receiving Copilot responses that contain information from a Microsoft SharePoint site named Finance. The users report that the information is commercially sensitive.

You need to prevent Copilot from providing responses that contain information from the Finance site.

What should you do?

- A. From the Finance site, configure permissions.
- B. From Microsoft Entra, create a Conditional Access policy.
- C. From Microsoft Purview, create an Information Barrier (IB) policy.
- D. From Microsoft Defender, create a data connector.

Answer: A

Explanation:

The correct answer is D. From the Finance site, configure permissions . Microsoft states that Microsoft 365 Copilot honors existing Microsoft 365 permissions and only grounds responses in content that the signed-in user is already allowed to access. That means if users are getting Finance-site content in Copilot responses, those users likely still have permission to that SharePoint content. The direct fix is to review and correct the site, library, folder, or file permissions on the Finance site so only the intended users retain access.

The other options do not directly solve this requirement. Information Barriers are designed for communication and collaboration segmentation scenarios, not for ordinary site-level oversharing remediation.

A Defender data connector is unrelated to SharePoint permission enforcement. Conditional Access controls sign-in and session access conditions, but it does not selectively remove Copilot grounding from one SharePoint site for users who still have site permissions. Because Copilot uses SharePoint and Microsoft Graph permissions as its boundary, the Microsoft-documented corrective action is to fix the Finance site permissions .

NEW QUESTION # 12

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

* To use Microsoft 365 Copilot Chat to reason over web data, you need a Microsoft 365 Copilot license. Answer: No

* To use the Researcher agent in Microsoft 365 Copilot, you need a Microsoft 365 Copilot license. Answer: Yes

* To add an agent in the Microsoft 365 Copilot app, you need a Microsoft 365 Copilot license. Answer: No

The correct selections are No, Yes, No . Microsoft documents that Microsoft 365 Copilot Chat is available at no additional cost for eligible Entra account users with qualifying Microsoft 365 licenses, and that it includes secure AI chat grounded in the web . That means a separate Microsoft 365 Copilot add-on license is not required just to use Copilot Chat over web data.

Statement 2 is Yes because Microsoft states that Researcher is part of the core default experience for Microsoft 365 Copilot licensed users . In other words, access to the Researcher agent requires the Microsoft 365 Copilot license.

Statement 3 is No because Microsoft documents that users can access agents and create them in the Microsoft 365 Copilot app through Copilot Chat, and Microsoft 365 service descriptions state that web- grounded agents are available at no extra cost for commercial users with a qualifying Microsoft 365 license.

A Copilot add-on license is required for certain advanced capabilities, but not simply to add an agent in the app in general.

NEW QUESTION # 13

You need to create a Microsoft 365 Copilot agent that can create charts and visualizations based on a Microsoft Excel workbook.

What should you configure for the agent?

- A. the Customer Insights Assistant template
- **B. the code interpreter capability**
- C. the image generator capability
- D. the Scrum Assistant template

Answer: B

Explanation:

The correct answer is C. the code interpreter capability . Microsoft Learn states that the code interpreter capability for Microsoft 365 Copilot declarative agents allows the agent to generate and execute Python code to analyze data and generate visualizations . Microsoft's agent schema documentation explicitly describes Code Interpreter as a capability used to solve complex math problems, analyze data, and generate visualizations. That directly matches the requirement to create charts and visualizations from a Microsoft Excel workbook .

Microsoft documentation also explains that code interpreter supports working with Excel files and is used for scenarios such as data analysis , statistical computations , and generating charts . This makes it the correct configuration for an agent that must reason over workbook data and produce chart-based outputs. By contrast, the image generator capability is for creating images, not for analyzing workbook data. The Scrum Assistant and Customer Insights Assistant options are templates, not the specific technical capability required to read data and build charts from an Excel workbook.

NEW QUESTION # 14

Your organization has a Microsoft 365 E5 subscription.

You need to ensure that a third-party cloud service can authenticate to Microsoft Entra.

What should you configure?

- A. a Microsoft 365 Copilot connector
- B. multifactor authentication (MFA)
- C. a Conditional Access policy
- **D. an app registration**

Answer: D

Explanation:

The correct answer is D. an app registration . Microsoft Learn states that to delegate identity and access management functions to Microsoft Entra ID , an application must be registered with a Microsoft Entra tenant . When you register an application, you create its identity configuration in Microsoft Entra, and a corresponding service principal is created so the application can authenticate and integrate with the tenant.

This is the standard Microsoft mechanism for allowing a third-party cloud service or app to authenticate to Microsoft Entra.

The other options do not provide the app identity required for authentication. Multifactor authentication (MFA) strengthens user sign-ins, but it does not onboard a third-party service as an application identity in Entra. Conditional Access enforces access policies after authentication and authorization decisions are being made; it does not create the application identity itself. A Microsoft 365 Copilot connector is used to bring external data into Microsoft 365 experiences, not to let a third-party cloud service authenticate to Microsoft Entra. Therefore, the correct configuration is an app registration .

NEW QUESTION # 15

Hotspot Question

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 16

.....

In order to make you have a deeper understanding of what you are going to buy, we offer you free demo for AB-900 training materials. We recommend you have a try before buying. If you are quite content with the AB-900 training materials, just add them

into your cart and pay for them. You will get the downloading link and password and you can start your learning right now. In addition, we have online and offline chat service staff who possess the professional knowledge of the AB-900 Exam Dumps, if you have any questions, just contact us.
