Microsoft AI Business Professional Sample Questions (Q25-Q30):

NEW QUESTION # 25

Select the answer that correctly completes the sentence.

Answer:

Explanation:

NEW QUESTION # 26

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 27

From Microsoft 365 Copilot, you add custom instructions.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

The instructions will apply to new chat conversations. Answer: Yes

The instructions will apply to new conversations with the Researcher agent and the Analyst agent. Answer: Yes

The instructions will apply to previous responses in existing conversation. Answer: No

Custom instructions in Microsoft 365 Copilot are a persistent preference mechanism that influences how Copilot responds going forward. Once configured, they are applied when you start new interactions, helping Copilot maintain consistent tone, formatting, and behavioral preferences across future chats. Therefore, they apply to new chat conversations (Statement 1 = Yes).

Custom instructions also carry into new conversations you initiate with Copilot experiences and agents (such as Researcher and Analyst), because the instructions act as a user-level guidance layer that shapes responses regardless of which Copilot "mode" you start-provided those agents are being used in the same Copilot environment and are subject to your settings (Statement 2 = Yes).

However, custom instructions do not retroactively change content that was already generated. Existing conversation history and any prior responses remain unchanged; the instructions affect subsequent turns or new threads, not previously produced outputs (Statement 3 = No).

NEW QUESTION # 28

Hotspot Question

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 29

What is a potential benefit of using AI in business operations?

- A. AI makes all decisions on behalf of human managers
- **B. AI can increase operational efficiency by automating repetitive tasks**
- C. AI requires no human supervision

- D. AI eliminates the need for data-driven decision-making

Answer: B

Explanation:

AI is highly effective at automating repetitive and mundane tasks, which helps businesses improve efficiency, reduce human error, and free up human workers for more strategic activities.

NEW QUESTION # 30

.....
