You can review and practice with it clearly just like using a processional book. It can satisfy the fundamental demands of candidates with concise layout and illegible outline. The second one of Workday-Pro-HCM-Core Test Braindumps is software versions which are usable to windows system only with simulation test system for you to practice in daily life. The last one is app version of Workday-Pro-HCM-Core exam torrent suitable for different kinds of electronic products.

Workday Pro HCM Core Certification Exam Sample Questions (Q46-Q51):

NEW QUESTION # 46

What action can you take after a business process completes?

- A. Cancel
- B. Delegate
- C. Rescind
- D. Reassign

Answer: C

Explanation:

After a business process completes in Workday, the valid corrective action that can be taken is to Rescind the process. The Rescind action allows an authorized user (typically with HR Partner or BP Administrator access) to reverse the completed business process, effectively undoing the transaction and restoring the system to its prior state.

This is often used when incorrect data was entered, or when the transaction was completed prematurely.

Rescinding a process automatically generates related rescind events and notifications, ensuring system integrity.

Option A (Cancel) applies to in-progress business processes only - it stops a process before completion.

Option B (Reassign) allows task ownership changes while a process is active but not after completion.

Option D (Delegate) is a security feature for work delegation, not a post-completion action.

Thus, Rescind is the only valid corrective action once a BP is finalized.

Reference (Paraphrased Source):

Workday Pro HCM Core - Business Process Framework and Transaction Correction Guide (2023R2), Section: "Rescind and Cancel Business Processes."

NEW QUESTION # 47

You need to create a new supervisory organization and it needs to inherit attributes from an existing supervisory organization. What task do you use?

- A. Create Subordinate
- B. Assign Included Organizations
- C. Assign Roles
- D. Create Supervisory Organization

Answer: A

Explanation:

Comprehensive and Detailed Explanation (Paraphrased from Workday Pro HCM Core - Organizations Setup and Management Guide 2023R2):

When creating a new supervisory organization that should inherit attributes such as staffing model, company, and cost center from an existing organization, you use the Create Subordinate task.

This task creates the new subordinate organization directly under a superior supervisory organization. It automatically copies inherited settings such as visibility, organization assignments, and staffing model, ensuring hierarchical alignment and simplifying setup.

Option B (Create Supervisory Organization) creates a brand-new top-level supervisory org without inheritance.

Option A (Assign Roles) only assigns role-based permissions after creation.

Option C (Assign Included Organizations) is used for related org relationships, not for hierarchical creation.

Thus, Create Subordinate is the correct task when the new org must inherit settings from a superior one.

Reference (Paraphrased Source):

Workday Pro HCM Core - Organizations Configuration Guide (2023R2), Section: "Creating Subordinate Supervisory

Organizations and Inherited Attributes."

NEW QUESTION # 48

What is a Workday standard report?

- A. An ad-hoc report for on-the-fly analytics
- B. A report to export data for external analysis
- **C. A delivered predefined report**
- D. A customized report for specific organizational needs

Answer: C

Explanation:

A Workday standard report refers to a delivered, predefined report that is built and maintained by Workday.

These reports are available out-of-the-box and are designed to support common and essential business processes and analytics across HCM, Finance, and other Workday modules. Users can run standard reports immediately without needing to create them from scratch, and they often serve as a base for custom reporting when further refinement or filtering is necessary.

Workday provides hundreds of these reports covering a broad range of functionality-examples include

"Employee Roster", "All Positions", "Business Process Transactions", etc. These reports are typically domain-secured, which means access to them is governed by user security and data access permissions.

As per the Workday Pro HCM Reporting Study Guide, standard reports are also known as "delivered reports" and often include pre-configured prompts and formatting that align with Workday best practices.

Workday Pro HCM - Reporting and Analytics Fundamentals, "Standard Reports Overview" section.

NEW QUESTION # 49

What is the purpose of a subprocess?

- **A. It triggers steps from another business process.**
- B. It allows users to approve a transaction.
- C. It sends instructions and information for a task.
- D. It starts a Workday-delivered background process.

Answer: A

Explanation:

In Workday, a subprocess is a step type used within a business process definition to initiate another, independent business process. The purpose of a subprocess is to trigger a set of predefined steps from a separate process that runs as part of the main (parent) process. This provides modularity and reusability across multiple BPs.

For example, when configuring a Hire process, you might add a Request Compensation Change subprocess to automatically launch once the hire is initiated. This avoids duplicating configuration work and ensures consistency in how related actions are handled across events.

Option A is incorrect because approvals are managed through Approval Steps, not subprocesses.

Option C is incorrect - background processes are system-managed and not user-configured through subprocesses.

Option D refers to To-Do or Notification Steps, which are informational, not subprocess-driven.

Thus, subprocesses are a way to embed or chain additional processes into an event flow, promoting flexibility and maintainability.

Reference (Paraphrased Source):

Workday Pro HCM Core - Business Process Configuration Guide (2023R2), Section: "Subprocess Step Type and Configuration Best Practices."

NEW QUESTION # 50

You want all managers to approve both hire details and proposed compensation. The consolidated approval chain step displays after Propose Compensation and the completion step, Review Employee Hire. What statement describes the action that happens next?

- A. You receive a critical error because the step order should be Review Employee Hire, Propose Compensation (completion step), and then consolidated approval chain.
- **B. You receive a critical error because the consolidated approval chain step should be the completion step.**

- C. You receive a warning because the consolidated approval chain step should be the completion step.
- D. You execute the business process successfully to meet the business need.

Answer: B

Explanation:

Comprehensive and Detailed Explanation (Paraphrased from Workday Pro HCM Core - Business Process Configuration Guide 2023R2):

A Consolidated Approval Chain Step allows multiple approval actions within a business process to be combined into a single, streamlined approval task. However, this step must be the final step before the completion step in a business process.

If the Consolidated Approval Chain appears after the completion step, Workday will trigger a critical error because the step order violates the BP framework rules. The system expects the consolidated approval to act as the last step to ensure that all approvals are received before the event finalizes.

Therefore, Option C is correct - a critical error occurs because the Consolidated Approval Chain Step must immediately precede the completion step, not follow it.

Reference (Paraphrased Source):

Workday Pro HCM Core - Business Process Configuration Guide (2023R2), Section: "Consolidated Approval Chains and Step Sequence Rules."

NEW QUESTION # 51

.....

By doing this you can stay updated and competitive in the market and achieve your career objectives in a short time period.
