

Quiz 2026 Nutanix Authoritative NCP-CI-AWS Latest Material

P.S. Free & New NCP-CI-AWS dumps are available on Google Drive shared by Prep4sures: <https://drive.google.com/open?id=1r8DeQKnFq18aXYAVIkZkv2VgxcM2sN0O>

The NCP-CI-AWS exam prep from our company will offer the help for you to develop your good study habits. If you buy and use our NCP-CI-AWS study materials, you will cultivate a good habit in study. More importantly, the good habits will help you find the scientific prop learning methods and promote you study efficiency, and then it will be conducive to helping you pass the NCP-CI-AWS Exam in a short time. So hurry to buy the NCP-CI-AWS test guide from our company, you will benefit a lot from it.

Nutanix NCP-CI-AWS Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Prepare the AWS cloud environment: This exam segment evaluates your ability to set up the AWS cloud environment, initiate NC2 service subscription, establish implementation criteria, and recognize networking prerequisites.
Topic 2	<ul style="list-style-type: none">• Configuring an NC2 on AWS Environment: This section examines your proficiency in setting up cloud networking and security measures, as well as addressing connectivity issues.
Topic 3	<ul style="list-style-type: none">• Managing an NC2 on AWS Environment: This exam component tests your understanding of node and cluster management tasks, along with your ability to oversee cluster and cloud resource health.
Topic 4	<ul style="list-style-type: none">• Deploying an NC2 on AWS Environment: This portion assesses your knowledge of cloud cluster deployment, cloud provider network configuration, and your skills in addressing cluster deployment challenges.

Exam NCP-CI-AWS Learning | Practice NCP-CI-AWS Test

In today's society, there are increasingly thousands of people put a priority to acquire certificates to enhance their abilities. With a total new perspective, NCP-CI-AWS study materials have been designed to serve most of the office workers who aim at getting an exam certification. With the popularization of wireless network, those who are about to take part in the NCP-CI-AWS exam guide to use APP on the mobile devices as their learning tool, because as long as entering into an online environment, they can instantly open the learning material from their appliances. Our NCP-CI-AWS Study Materials provide such version for you. The online test engine is a kind of online learning, you can enjoy the advantages of APP version of our NCP-CI-AWS exam guide freely. Moreover, you actually only need to download the APP online for the first time and then you can have free access to our NCP-CI-AWS exam questions in the offline condition if you don't clear cache.

Nutanix Certified Professional - Cloud Integration - AWS Sample Questions (Q128-Q133):

NEW QUESTION # 128

An administrator is experiencing problems with several operations, including VM IP address assignment validations, VM power-on and VM power-off operations.

Whenever a related operation is performed, an alert is generated in the NC2 console indicating that the Cloud API endpoints are unavailable.

The issue was further investigated and it was determined that NC2 is unable to make API calls to the underlying cloud infrastructure due to network connectivity misconfigurations.

Which two connectivity misconfigurations could be causing this issue? (Choose two.)

- A. Subnets are connected to the Internet via NAT gateways.
- B. AWS VPC endpoints are used for connectivity to AWS services.
- C. IAM roles and policies are incorrectly configured.
- D. Route tables for cloud subnets contain incorrect route entries.

Answer: C,D

Explanation:

Route tables for cloud subnets contain incorrect route entries:

If the route tables associated with the cloud subnets contain incorrect route entries, the NC2 cluster might not be able to reach the necessary AWS services or endpoints. Correct route entries are crucial for ensuring proper communication between the NC2 cluster and the underlying AWS infrastructure.

IAM roles and policies are incorrectly configured:

Incorrectly configured IAM roles and policies can prevent NC2 from making API calls to AWS services. These roles and policies must be properly set up to allow the necessary permissions for NC2 to interact with AWS resources and perform required operations.

Reference:

Refer to the AWS documentation on route table configuration and IAM roles and policies, and Nutanix documentation on NC2 cloud connectivity and permissions.

NEW QUESTION # 129

An organization plans to use the Cluster Protect feature to protect the cluster data.

Which license will satisfy this requirement?

- A. AOS Pro or AOS Ultimate
- B. AOS Pro or NCI Pro
- C. AOS Ultimate or NCI Ultimate
- D. NCI Pro or AOS Ultimate

Answer: C

Explanation:

The Cluster Protect feature, which provides data protection and disaster recovery capabilities for Nutanix clusters, requires either the AOS Ultimate or NCI Ultimate license. These licenses include the necessary features to leverage Cluster Protect for ensuring data resilience and recovery.

NEW QUESTION # 130

An administrator has been tasked with performing a test migrating from an NC2 environment to a Nutanix on-premises environment.

Where should the administrator perform this task?

- A. NC2 Prism Element
- B. NC2 Prism Central

- C. On-premises Prism Central
- D. Nutanix Cloud Services Portal

Answer: B

Explanation:

When performing a migration from an NC2 environment to a Nutanix on-premises environment, the task should be performed using the NC2 Prism Central. This is because NC2 Prism Central provides a centralized management interface that allows administrators to manage and migrate workloads between cloud and on-premises environments seamlessly.

Nutanix Community Guide

NEW QUESTION # 131

During the recovery of entities protected by Cluster Project, an administrator discovers that the recovery plan is not executing correctly because it exceeds the number of supported entities.

How many entities can be recovered using a Single recovery plan?

- A. 0
- **B. 1**
- C. 2
- D. 3

Answer: B

Explanation:

The Nutanix disaster recovery capabilities include recovery plans that define how entities are recovered in the event of a failure. There is a limit to the number of entities that can be managed within a single recovery plan.

* Entity Limit:

* According to Nutanix documentation, the maximum number of entities that can be recovered using a single recovery plan is 300.

Exceeding this limit will cause issues during the execution of the recovery plan.

* Impact of Exceeding the Limit:

* If the number of entities in a recovery plan exceeds the supported limit, the recovery process may fail or not execute correctly, as observed in the scenario.

NEW QUESTION # 132

A company wants to use Nutanix NC2 to burst VDI resources to the AWS cloud. The VDI workloads requires GPU acceleration. Which solution meets the company's requirements?

- A. AN36 nodes
- **B. g4dn.metal nodes**
- C. AN36P nodes
- D. m6g.metal nodes

Answer: B

Explanation:

For VDI workloads that require GPU acceleration, the g4dn.metal nodes are the appropriate choice. These instances are equipped with NVIDIA T4 GPUs, which are well-suited for graphics-intensive applications such as VDI workloads that need GPU acceleration. Other node types like AN36P, m6g.metal, or AN36 do not provide the necessary GPU capabilities.
