

FCSS_EFW_AD-7.4 Pdf Torrent - FCSS_EFW_AD-7.4 Test Practice

P.S. Free 2025 Fortinet FCSS_EFW_AD-7.4 dumps are available on Google Drive shared by TestkingPDF:
https://drive.google.com/open?id=1i7wS4GtZI77T_VGCIxdMWT011y0BuQh-

Our FCSS_EFW_AD-7.4 practice materials are on the cutting edge of this line with all the newest contents for your reference. Free demos are understandable materials as well as the newest information for your practice. Under coordinated synergy of all staff, our FCSS_EFW_AD-7.4 practice materials achieved to a higher level of perfection by keeping close attention with the trend of dynamic market. They eliminated stereotypical content from our FCSS - Enterprise Firewall 7.4 Administrator practice materials. And if you download our FCSS_EFW_AD-7.4 practice materials this time, we will send free updates for you one year long.

TestkingPDF FCSS - Enterprise Firewall 7.4 Administrator (FCSS_EFW_AD-7.4) exam questions are consistently updated to make sure they are according to the Fortinet latest exam syllabus. If you choose TestkingPDF, you can be sure that you'll always get the updated and real FCSS_EFW_AD-7.4 exam questions, which are essential to go through the FCSS_EFW_AD-7.4 test in one go. In addition, we also offer up to 1 year of free Fortinet FCSS_EFW_AD-7.4 certification exam question updates. These free updates ensure that candidates get access to the latest Fortinet exam questions even after they have made their initial purchase.

FCSS_EFW_AD-7.4 Test Practice, FCSS_EFW_AD-7.4 Valid Torrent

If you want to finish it with minimum efforts, TestkingPDF Fortinet FCSS_EFW_AD-7.4 test questions and answers is your best choice. TestkingPDF Fortinet FCSS_EFW_AD-7.4 test contains high quality exam dumps. Like the actual test, TestkingPDF test questions and test answers is of the same standard. Now, the best choice is to choose TestkingPDF Fortinet FCSS_EFW_AD-7.4 Certification Training for exam preparation. You must pass at 100%. If you fail, FULL REFUND is allowed.

Fortinet FCSS - Enterprise Firewall 7.4 Administrator Sample Questions (Q50-Q55):

NEW QUESTION # 50

A vulnerability scan report has revealed that a user has generated traffic to the website example.com (10.10.10.10) using a weak

SSL/TLS version supported by the HTTPS web server.

What can the firewall administrator do to block all outdated SSL/TLS versions on any HTTPS web server to prevent possible attacks on user traffic?

- A. Use the latest certificate, Fortinet_SSL_ECDSA256, and replace the CA certificate in the SSL/SSH inspection profile.
- B. Enable auto-detection of outdated SSL/TLS versions in the SSL/SSH inspection profile to block vulnerable websites.
- C. Install the required certificate in the client's browser or use Active Directory policies to block specific websites as defined in the SSL/SSH inspection profile.
- **D. Configure the unsupported SSL version and set the minimum allowed SSL version in the HTTPS settings of the SSL/SSH inspection profile.**

Answer: D

Explanation:

The best way to block outdated SSL/TLS versions is to configure the SSL/SSH inspection profile to enforce a minimum SSL/TLS version and disable weak SSL versions.

By setting the minimum allowed SSL version in the HTTPS settings of the SSL/SSH inspection profile, FortiGate will:

Block any connection using outdated SSL/TLS versions (such as SSLv3, TLS 1.0, or TLS 1.1).

Enforce secure communication using only strong SSL/TLS versions (such as TLS 1.2 or TLS 1.3).

Protect users from man-in-the-middle (MITM) and downgrade attacks that exploit weak encryption.

NEW QUESTION # 51

What does hyperscale capability in data center firewalls typically support?

- A. Bundling of multiple physical interfaces for a single logical interface
- B. Application layer operations such as intrusion prevention
- **C. Network speeds ranging from 10 Gbps to 1000 Gbps**
- D. Enhanced encryption and decryption processes only

Answer: C

NEW QUESTION # 52

An administrator must enable direct communication between multiple spokes in a company's network. Each spoke has more than one internet connection.

The requirement is for the spokes to connect directly without passing through the hub, and for the links to automatically switch to the best available connection.

How can this automatic detection and optimal link utilization between spokes be achieved?

- **A. Utilize ADVPN 2.0 to facilitate dynamic direct tunnels and automatic link optimization.**
- B. Set up OSPF routing over static VPN tunnels between spokes.
- C. Implement SD-WAN policies at the hub to manage spoke link quality.
- D. Establish static VPN tunnels between spokes with predefined backup routes.

Answer: A

Explanation:

ADVPN (Auto-Discovery VPN) 2.0 is the optimal solution for enabling direct spoke-to-spoke communication without passing through the hub, while also allowing automatic link selection based on quality metrics.

Dynamic Direct Tunnels:

ADVPN 2.0 allows spokes to establish direct IPsec tunnels dynamically based on traffic patterns, reducing latency and improving performance.

Unlike static VPNs, spokes do not need to pre-configure tunnels for each other.

Automatic Link Optimization:

ADVPN 2.0 monitors the quality of multiple internet connections on each spoke.

It automatically switches to the best available connection when the primary link degrades or fails.

This is achieved by dynamically adjusting BGP-based routing or leveraging SD-WAN integration.

NEW QUESTION # 53

A FortiGate is configured as an explicit web proxy. Clients using this web proxy are reporting DNS errors when accessing any website.

The administrator executes the following debug commands and observes that the n-dns-timeout counter is increasing:

```
#diagnose test application wad 2200
#diagnose test application wad 104
DNS Stats:
n_dns_reqs=878  n_dns_fails= 2  n_dns_timeout=875
n_dns_success=0

n_snd_retries=0  n_snd_fails=0  n_snd_success=0  n_dns_overflow=0
n_build_fails=0
```

What should the administrator check to fix the problem?

- A. That DNS traffic from client workstations is allowed by the explicit web proxy policies.
- B. That DNS service is enabled in the explicit web proxy interface.
- C. The connectivity between the client workstations and the DNS server.
- **D. The connectivity between the FortiGate unit and the DNS server.**

Answer: D

NEW QUESTION # 54

Which statement about the designated router (DR) and backup designated router (BDR) in an OSPF multi-access network is true?

- A. FortiGate first checks the OSPF ID to elect a DR.
- **B. Non-DR and non-BDR routers send link state updates and acknowledgements to 224.0.0.6.**
- C. Non-DR and non-BDR routers form full adjacencies to DR only.
- D. Only the DR receives link state information from non-DR routers.

Answer: B

NEW QUESTION # 55

.....

At present, Fortinet certification exam is the most popular test. Have you obtained Fortinet exam certificate? For example, have you taken Fortinet FCSS_EFW_AD-7.4 certification exam? If not, you should take action as soon as possible. The certificate is very important, so you must get FCSS_EFW_AD-7.4 certificate. Here I would like to tell you how to effectively prepare for Fortinet FCSS_EFW_AD-7.4 exam and pass the test first time to get the certificate.
