In addition, the price of the HPE6-A88 dumps pdf is reasonable and affordable for all of you.

HPE Aruba Networking ClearPass Exam Sample Questions (Q61-Q66):

NEW QUESTION # 61

When managing network access through ClearPass, an administrator notices that client status changes are causing repeated disconnections and re-authentications. The administrator wants to prevent the service from making the same enforcement decision without considering newly gathered information. What action should the administrator take?

- A. Increase the timeout period for client re-authentication.
- B. Select the option 'Use Cached Results' on the enforcement tab.
- C. Enable automatic endpoint reconciliation.

Answer: C

Explanation:

Comprehensive and Detailed Explanation From HPE Aruba Networking ClearPass portfolio:

Automatic endpoint reconciliation is a feature designed to handle rapid changes in device status. It ensures that when new information (like a profile change or a posture update) is received, ClearPass immediately reconciles that data with the current session. This prevents "flapping" or repetitive disconnections where the system fails to correctly apply the updated context to the device's network access.

NEW QUESTION # 62

Why would an administrator enable MAC caching for guest users in ClearPass?

Response:

- A. To enforce VLAN tagging dynamically
- B. To speed up DNS resolution for returning users
- C. To bypass captive portal re-authentication for returning guests
- D. To prevent access by unauthorized IoT devices

Answer: C

NEW QUESTION # 63

Which licensing model is used in ClearPass to enable features such as OnGuard and Onboard?

Response:

- A. Feature-based license with shared pool
- B. Subscription-based per user
- C. Device-based license pool
- D. Role-based dynamic activation

Answer: A

NEW QUESTION # 64

An IT administrator is configuring a Web-Based Health Check service in ClearPass to enforce posture compliance for client endpoints. They need to ensure that the service can handle requests from various operating systems and networks. Which step should the administrator take to ensure the posture policy is applied correctly to the agent's System Health Validator report?

- A. Assign multiple Posture Policies to the same client endpoint.
- B. Configure the service without specifying the operating system for the agent.
- C. Select the Posture Compliance option to add the Posture tab to the service.

Answer: C

Explanation:

In ClearPass service configuration, the Posture tab is not visible by default. To enable health check logic, the administrator must check the "Posture Compliance" box in the Service tab. This adds the Posture configuration screen where the administrator can select the specific Posture Policy that will evaluate the reports sent by the OnGuard agents.

NEW QUESTION # 65

Which ClearPass feature allows organizations to enforce limited access for unauthenticated guests?

Response:

- A. Pre-Auth Check
- **B. Captive Portal**
- C. Enforcement Policy
- D. MAC Caching

Answer: B
