

# New Dynatrace-Associate Exam Cram & New Dynatrace-Associate Exam Papers

## Dynatrace Associate Certification Exam 1 Questions and Answers 2022

How long does it take for automatic baselines to be available?

2 hours

How is user session duration calculated?

The elapsed time between initiation of the first user action in a session and the completion of the last user action in the session

Which event type has the highest severity level?

Availability events

What are advantages of making a request a "key request"?

- A. Longer data retention (35 days vs 10 days)
- B. Trend lines are retained forever
- C. Available through the timeseries API
- D. Custom alerting thresholds
- E. Increases reliability and alerting for low-volume requests

What are the event types in DT?

Ordered from most to least severity level:

- A. Availability
- B. Error
- C. Slowdown
- D. Resource
- E. Custom
- F. Info

DT synthetic supports three types of synthetic monitoring, they are..

- A. Single-URL browser monitor
- B. Browser clickpath
- C. HTTP monitor

Why is it a best practice to define extra metadata, and not tags, on a host system?

Tags defined on the system can be cumbersome to change and require pre-planning, but DT can use the metadata to define tags and management zones, or use the metadata dynamically within charts and dashboards

In order to serve you better, we have offline and online chat service stuff, and any questions about Dynatrace-Associate training materials, you can consult us directly or you can send your questions to us by email. In addition, Dynatrace-Associate exam dumps of us will offer you free demo, and you can have a try before purchasing. Free demo will help you to have a deeper understanding of what you are going to buy. If you have any question about the Dynatrace-Associate Training Materials of us, you can just contact us.

## Dynatrace Dynatrace-Associate Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>User Experience Monitoring: Covers real user monitoring (RUM) to track and analyze how end users interact with and experience web and mobile applications.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Synthetics: Covers the creation and monitoring of synthetic tests to simulate user interactions and proactively detect availability or performance issues.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Foundational Platform Capabilities: Covers the core features and navigation of the Dynatrace platform, including entity relationships, tagging, and how data is collected.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Kubernetes Infrastructure: Covers monitoring and observability of Kubernetes clusters, workloads, and containerized environments within Dynatrace.</li> </ul>

Topic 5	<ul style="list-style-type: none"> <li>• Dashboards: Covers building and customizing dashboards to visualize and communicate observability data across teams and stakeholders.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• Traces: Covers distributed tracing and PurePath technology to track and analyze individual transactions end-to-end across services.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• Infrastructure Observability: Covers monitoring and visibility into hosts, services, and infrastructure components to detect and analyze performance issues.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• Automation: Covers workflows, event-driven automation, and integrations that enable teams to automate remediation and operational tasks.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>• Log Investigation: Covers querying, filtering, and analyzing log data within Dynatrace to troubleshoot and identify root causes of problems.</li> </ul>

## 100% Pass Dynatrace - New Dynatrace-Associate Exam Cram

If you cannot fully believe our Dynatrace-Associate exam prep, you can refer to the real comments from our customers on our official website before making a decision. There are some real feelings after they have bought our study materials. Almost all of our customers have highly praised our Dynatrace-Associate exam guide because they have successfully obtained the certificate. Generally, they are very satisfied with our Dynatrace-Associate Exam Torrent. Also, some people will write good review guidance for reference. Maybe it is useful for your preparation of the Dynatrace-Associate exam. In addition, you also can think carefully which kind of study materials suit you best. If someone leaves their phone number or email address in the comments area, you can contact them directly to get some useful suggestions.

### Dynatrace Associate Certification Exam Sample Questions (Q39-Q44):

#### NEW QUESTION # 39

How would you inject the RUM JavaScript tag when using an agentless deployment?

- A. Manually insert the RUM JavaScript tag into each HTML page of your application
- B. Utilize the Dynatrace API to get the latest version number of the RUM agent
- C. Install the Dynatrace OneAgent onto the application's database
- D. Developing a Dynatrace ActiveGate extension to deploy the OneAgent

**Answer: A**

Explanation:

In agentless RUM deployment, the JavaScript snippet must be manually inserted into the HTML pages of the application.

This allows Dynatrace to:

- \* Capture user interactions
- \* Monitor frontend performance
- \* Track sessions without requiring OneAgent installation

Other options are incorrect:

- \* ActiveGate extensions are unrelated
- \* OneAgent installation contradicts agentless setup
- \* API usage does not inject the script

Reference: Based on official Dynatrace University training materials on Agentless RUM deployment.

#### NEW QUESTION # 40

Which of the following is the default threshold type used for anomaly detection on Hosts (CPU saturation, memory saturation, disk utilization...)?

- A. Static Thresholds

- B. Impact Analysis
- C. Automated Multi-Dimensional Baselineing
- D. Integrations

**Answer: C**

Explanation:

Dynatrace uses Automated Multi-Dimensional Baselineing as the default anomaly detection method for host metrics such as CPU, memory, and disk utilization.

This approach:

- \* Automatically learns normal behavior patterns over time
- \* Adjusts thresholds dynamically based on historical data
- \* Considers multiple dimensions such as time of day and workload patterns This allows Dynatrace to detect anomalies more accurately compared to fixed thresholds.

Static thresholds are manually defined and not the default.

Other options are unrelated to anomaly detection mechanisms.

Reference: Based on official Dynatrace University training materials covering anomaly detection and Davis AI.

#### NEW QUESTION # 41

Your team has to investigate the performance of a database. Assuming all monitoring sources for a database are available, what tools can you use to find database performance information?

- A. By running synthetic tests against the database
- B. Looking at service data for a specific database
- C. In the 'Databases' app
- D. Through provided dashboards from a database extension

**Answer: C**

Explanation:

The 'Databases' app in Dynatrace offers a comprehensive, vendor-agnostic view of all monitored databases. It consolidates performance metrics such as CPU usage, memory consumption, active sessions, response times, and failed connections. It is designed to give users a centralized location for investigating the health and performance of databases, making it the primary tool for such tasks. The app enables teams to correlate issues with underlying infrastructure, understand resource consumption, and identify performance bottlenecks directly tied to the database.

Provided dashboards from a database extension may contain useful visualizations but lack the breadth of metrics and insights that the dedicated Databases app provides. Synthetic tests are primarily used for simulating user behavior to test availability and performance from the user's perspective-not for internal database monitoring. Looking at service data can help in understanding application-level issues but does not deliver detailed or direct metrics from the database layer.

Reference: Based on official Dynatrace University training materials and product documentation.

#### NEW QUESTION # 42

Which of the following best describes the functionality of the Security Investigator app?

- A. Conduct memory profiling tests to investigate the integrity of short-term data in the case of an attack
- B. Checks for secure passwords in the credential vault
- C. Investigate user sessions for instances of malicious actors and different cyber-attack vectors
- D. Run multiple DQL queries to connect multiple types of data for the primary purpose of investigating security issues

**Answer: D**

Explanation:

The Security Investigator app in Dynatrace is designed for advanced security analysis and threat investigation using Dynatrace Query Language (DQL).

It enables users to:

Run and chain multiple queries across logs, metrics, traces, and events Correlate different data types stored in Grail Perform deep investigations into potential security incidents This query-driven approach allows analysts to explore data relationships and uncover threats efficiently.

Other options describe capabilities not related to this app:

Credential vault checks are unrelated

Session investigation is part of RUM and Session Replay

Memory profiling is not a feature of Security Investigator

Reference: Based on official Dynatrace University training materials on Security Investigator and Grail

### NEW QUESTION # 43

Select the log ingestion options available. (Select all that apply)

- A. Dynatrace Hub
- B. Dynatrace Extensions
- C. Dynatrace OneAgent
- D. Dynatrace API
- E. Dynatrace Operator

**Answer: B,C,D**

Explanation:

Dynatrace supports multiple methods for log ingestion :

\* OneAgent automatically collects logs from monitored hosts and containers

\* Dynatrace API allows pushing logs directly into the platform

\* Dynatrace Extensions can be used to ingest logs from specific technologies Dynatrace Operator is used for Kubernetes deployment, not direct log ingestion.

Dynatrace Hub is a repository for extensions, not an ingestion mechanism itself.

Reference: Based on official Dynatrace University training materials on log monitoring and ingestion methods.

### NEW QUESTION # 44

.....

A lot of office workers in their own professional development encounter bottleneck and begin to choose to continue to get the test Dynatrace-Associate certification to the school for further study. We all understand the importance of education, and it is essential to get the Dynatrace-Associate certification. Learn the importance of self-evident, and the stand or fall of learning outcome measure, in reality of hiring process, for the most part through your grades of high and low, as well as you acquire the qualification of how much remains. Therefore, the Dynatrace-Associate practice materials can give users more advantages in the future job search, so that users can stand out in the fierce competition and become the best.
