The price for JN0-253 study guide is quite reasonable, no matter you are a student or employee in the company, you can afford them. Just think that, you only need to spend some money, you can get a certificate as well as improve your ability. Besides, we also pass guarantee and money back guarantee for you fail to pass the exam after you have purchasing JN0-253 Exam Dumps from us. We can give you free update for 365 days after your purchasing. If you have any questions about the JN0-253 study guide, you can have a chat with us.

Juniper JN0-253 Exam Syllabus Topics:

Topic	Details
Topic 1	Juniper Mist Monitoring and Analytics: This domain focuses on monitoring tools including service-level expectations, packet captures, AI-driven insights, automated alerts, and audit logs for comprehensive network visibility.
Topic 2	Juniper Mist Cloud Fundamentals: This domain covers Juniper's cloud-native platform architecture, focusing on AI and machine learning capabilities for intelligent network management and real-world deployment scenarios.
Topic 3	Juniper Mist Network Operations and Management: This domain examines operational features across Wi-Fi, Wired, WAN, Routing, and Access Assurance, delivering specialized management capabilities for different network infrastructure layers.
Topic 4	Marvis Virtual Network Assistant AI: This domain introduces Marvis, an AI-powered assistant providing automated troubleshooting through intelligent actions, natural language queries, and specialized analytical tools for proactive issue resolution.
Topic 5	Location-based Services: This domain presents virtual Bluetooth Low Energy capabilities for asset tracking, visibility, and location-aware experiences that extend networking into physical space management.
Topic 6	Juniper Mist Cloud Operations: This domain covers three API types (RESTful, WebSocket, Webhook) for programmatic integration, plus support resources including ticketing systems and documentation.

JN0-253 Updated Dumps & JN0-253 Test Dump

The experts of our company are checking whether our JN0-253 test quiz is updated or not every day. We can guarantee that our JN0-253 exam torrent will keep pace with the digitized world by the updating system. We will try our best to help our customers get the latest information about study materials. If you are willing to buy our JN0-253 Exam Torrent, there is no doubt that you can have the right to enjoy the updating system. More importantly, the updating system is free for you. Once our Mist AI, Associate (JNCIA-MistAI) exam dumps are updated, you will receive the newest information of our JN0-253 test quiz in time.

Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q97-Q102):

NEW QUESTION # 97

Which device detects a Layer 1 bad cable action within Marvis Actions?

- A. wireless client
- **B. Mist Edge**
- C. wired client
- D. access point

Answer: B

Explanation:

The Mist Edge device is responsible for detecting Layer 1 issues, such as bad cable actions, within the Marvis Actions framework. Mist Edge integrates with Marvis AI to provide detailed insights into network health, including physical layer issues like faulty cables, which can impact network performance. By identifying and alerting administrators to these problems, Mist Edge helps maintain the integrity and reliability of the network infrastructure.

NEW QUESTION # 98

Which Mist supported API is considered data-driven?

- A. Webhook
- B. WebSocket
- **C. RESTful**
- D. gRPC

Answer: C

NEW QUESTION # 99

What are two ways to claim an Access Point with Juniper Mist? (Choose two.)

- **A. Activation code**
- B. MAC address
- C. Serial number
- **D. Claim code**

Answer: A,D

Explanation:

From Juniper's official guide:

"You'll need either a claim code or an activation code to claim an AP. With either, you can claim an AP by using one of the following methods:

- * Mist AI Mobile App
- * A Web browser

You can claim either a single AP using a claim code or multiple APs using an activation code. You can use any of these methods to claim an AP:

- * To claim a single AP, use the claim/QR code located on the rear of the AP.
- * To claim multiple APs, you'll need to use an activation code. When you purchase multiple APs, we provide you with an activation

code along with your PO information." From the Mist documentation:

"APs can be claimed to any organization by using either the activation code, claim code or QR code.

Activation Code: Whenever you order APs, our Sales Operations team will send you an activation code which can be used for claiming the APs and subscriptions as per the order. ...

AP Claim Code: You can individually claim APs to your organization by navigating to Organization > Inventory > Claim APs and entering in the claim code found on the back of each AP.

AP QR Code: Using our Mist AI mobile app you can scan the QR code printed on the back of our APs to claim APs to your organization." Summary:

The Juniper Mist platform allows you to claim an Access Point using:

- * Activation code (provided for bulk purchases, via PO)

- * Claim code (unique per AP, on the rear label)

- * QR code (scanned with the Mist AI mobile app, also encoded as the claim code) These extracts are direct from Juniper's own documentation and confirm the methods for AP onboarding in the Mist platform.

NEW QUESTION # 100

Which Radio Resource Management (RRM) changes are only made once a day between 2:00 AM and 3:00 AM local time?

- A. channel and power level changes triggered by DFS events
- B. RF template changes to channel width
- C. channel and power settings across a site based on long-term statistics and baselines
- D. channel and power level changes triggered by SSID scheduling

Answer: C

Explanation:

Identify the Changes: Radio Resource Management (RRM) changes and their timings.

RRM Changes:

Channel and power settings based on long-term statistics.

RF template changes to channel width.

Changes triggered by SSID scheduling.

Changes triggered by DFS events.

Timing of Changes:

Long-term RRM changes to channel and power settings are typically scheduled once a day to avoid disrupting network performance.

NEW QUESTION # 101

What is the purpose of Audit Logs in Juniper Mist?

- A. to record key performance events
- B. to record administrative activities
- C. to record security alerts
- D. to record SLE violations

Answer: B

Explanation:

The purpose of Audit Logs in Juniper Mist is to record administrative activities within the Mist dashboard.

According to the official Juniper Mist documentation: "Audit Logs provide a detailed chronological record of each configuration change, administrative action, and user activity within the Mist Cloud portal. These logs include information such as the action performed (e.g., adding or removing sites, devices, or users), the timestamp, and the user who performed the action. Audit Logs are critical for accountability, compliance, and troubleshooting, enabling administrators to trace changes and ensure that only authorized users are making modifications to their network settings. Mist stores audit log records securely and makes them accessible for review by organization administrators from the dashboard's Organization > Audit Logs section." This directly aligns with option C, as the logs primarily track configuration changes and administrative actions-not performance events, security alerts, or SLE violations. Such activities include site creation, modification, device assignment, role changes, and other user or configuration updates.
