- E. Determining the number of 'lines of code'

**Answer: A,D**

#### NEW QUESTION # 24

Which statements with regard to project objectives and architectural objectives are true and which are false?

(Assign all answers.)

**Answer:**

Explanation:

Explanation:

A) False B) True C) True D) False

A) Architectural objectives and project objectives need to be identical.

\* This is false. Architectural objectives are concerned with the technical goals and quality attributes of the system, while project objectives are broader and include timelines, budgets, and overall project deliverables<sup>12</sup>.

B) Most of the time, architectural objectives are of a more long-term nature than project objectives.

\* This is true. Architectural objectives often focus on the sustainability and maintainability of the system, which are long-term considerations, whereas project objectives may be more immediate and focused on the project's completion<sup>12</sup>.

C) Architectural objectives and project objectives need to be negotiated between the concerned parties.

\* True. Both sets of objectives should align with the stakeholders' needs and the project's overall goals, and thus require negotiation
