C-S4EWM-2023 Exam Authorized Certification & Valid New C-S4EWM-2023 Exam Online Pass Success

If you want to finish it with minimum efforts, SureTorrent SAP C-S4EWM-2023 test questions and answers is your best choice. SureTorrent SAP C-S4EWM-2023 test contains high quality exam dumps. Like the actual test, SureTorrent test questions and test answers is of the same standard. Now, the best choice is to choose SureTorrent SAP C-S4EWM-2023 Certification Training for exam preparation. You must pass at 100%. If you fail, FULL REFUND is allowed.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q78-Q83):

NEW QUESTION # 78
What is the purpose of the custodian in the warehouse setup?

- A. The custodian has the legal possession of the stock

- B. The custodian is used for the determination of the putaway strategy
- C. The custodian processes stock without transfer of title
- D. The custodian replaces the previously used Supply Chain Unit

Answer: C

Explanation:
Comprehensive and Detailed In-Depth Explanation:
The custodian in SAP EWM manages stock ownership without title transfer, often in consignment scenarios.
Option C ("The custodian processes stock without transfer of title") is correct, as defined in the stock attributes and configured in
SPRO: SCM Extended Warehouse Management > Master Data > Define Custodian. Options A (putaway strategy), B (Supply
Chain Unit), and D (legal possession) are incorrect as they misalign with the custodian's role, which is operational rather than
strategic or legal.

NEW QUESTION # 79
Which of the following are internal goods movements? Note: There are 3 correct answers to this question.

- A. Slotting
- B. Replenishment
- C. Ad hoc movements
- D. Direct putaway
- E. Warehouse reorganization

Answer: B,C,E

Explanation:
Comprehensive and Detailed In-Depth Explanation:
Internal goods movements in SAP EWM occur within the warehouse without external triggers. Option B ("Warehouse
reorganization") is correct as it involves moving stock between bins for optimization. Option C ("Replenishment") is correct as it
moves stock from reserve to picking areas. Option D ("Ad hoc movements") is correct for manual internal relocations. Option A
(Slotting) is a planning process, not a movement, and option E (Direct putaway) is part of inbound processing, not internal.

NEW QUESTION # 80
How are waves created? Note: There are 2 correct answers to this question.

- A. Automatically when a warehouse task is created
- B. Automatically when a production material request is created
- C. Automatically when an outbound delivery order is created
- D. Manually during planning in the shipping cockpit

Answer: C,D

NEW QUESTION # 81
Which standard functions can be executed in the background when you enter an exception code in a radio frequency (RF)
transaction? Note: There are 3 correct answers to this question.

- A. Confirm warehouse order
- B. Generate workflow process
- C. Cancel physical inventory document
- D. Create bin replenishment
- E. Block a bin

Answer: B,D,E

NEW QUESTION # 82
Your customer wants to implement the material flow system (MFS) to control conveyors and the automated high rack storage area.

How do you connect SAP Extended Warehouse Management to communicate with the programmable logic controllers (PLC)?
Note: There are 2 correct answers to this question.

- A. Use an RFC adapter to connect with the TCP/IP socket server of the PLC
- B. Activate the link to the subsystems using the ALE interface on the warehouse number
- C. Directly integrate to the PLC using ABAP Push Channels.
- D. Send an IDoc through a Post Processing Framework action to the PLC.

Answer: A,B

Explanation:
To connect SAP Extended Warehouse Management (EWM) with the programmable logic controllers (PLCs) in a Material Flow System (MFS), these steps are followed:
* Activate the Link to Subsystems Using the ALE Interface on the Warehouse Number (A):
* ALE (Application Link Enabling) interface is used for integrating external systems.
* The warehouse number setup includes enabling the ALE connection to communicate with subsystems like MFS.
* Use an RFC Adapter to Connect with the TCP/IP Socket Server of the PLC (D):
* SAP EWM communicates with PLCs through the Material Flow System (MFS) using an RFC (Remote Function Call) adapter.
* The RFC adapter connects to the TCP/IP socket server of the PLC to transmit and receive data directly.
Incorrect Options:
* B: Sending IDocs via a Post Processing Framework (PPF) is not a standard communication method for PLC integration in MFS.
* C: Direct integration using ABAP Push Channels is not applicable for MFS scenarios.
