#### NEW QUESTION # 72

An administrator is working with a development team to integrate a customer service application with a large language model deployed on the Nutanix Enterprise AI platform. The model provides natural language responses, and the secure application needs to send user input and receive model-generated replies in real time.

The following requirements must be met:

The application must be connected to the correct API endpoint exposed by the model.

A valid API key must be used to authenticate each request.

The response format must match the expected schema in the application.

The administrator must test and confirm successful communication before production rollout.

Which step should the administrator perform to configure and validate the application successfully?

- A. Set up the application in the hypervisor management interface and validate access using VM-level health checks.
- **B. Confirm the response meets requirements using the copied endpoint URL and API key from the portal.**
- C. Configure access to the endpoint by assigning the application a role in Prism Central.
- D. Expose the model endpoint publicly by assigning an external IP address and bypass authentication for faster testing.

**Answer: B**

### NEW QUESTION # 73
