Online and offline chat service stuff is available, if you have any questions about PL-400 study materials, don't hesitate to contact us.

## Microsoft Power Platform Developer Sample Questions (Q137-Q142):

### NEW QUESTION # 137

You are training a group of makers to use Power Automate.

You have the following expressions:

You need to identify what each expression is doing.

What does each expression do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

Box 1: Return the statuscode at runtime.

You could try the following method to get the status code.

Configure Compose action under the specified action to get the status code.

`outputs('ActionName')['statusCode']`

Box 2: Return all the results from all actions from MyScope

The `@result()` expression accepts the name of a Scope as a parameter and returns a JSON array of objects that represent the results of the execution of each action within the Scope.

### NEW QUESTION # 138

The communication department for a company plans to add a publicly accessible survey page to the company's public website. You must add the new survey page to the company's public website and capture data from the page to a Common Data Service environment.

Explicit user credentials must not be required to write survey data to Common Data Service.

You need to implement authentication.

Which authentication mechanism should you implement?

- A. Claims-based
- B. X.509 certificate
- C. OAuth2.0
- D. Microsoft 365

**Answer: C**

Explanation:

OAuth is the preferred means to authenticate because it provides access to both the OData RESTful web services (Web API and OData global Discovery service) as well as to the SOAP web services (Organization service and Discovery service).

OAuth is also required to support:

\* Azure Active Directory configurations for conditional access, such as Two-factor Authentication (2FA)

\* Use of client secrets to enable server-to-server authentication scenarios.

\* Cross-Origin Resource Sharing (CORS) to connect a Single-page Application (SPA) Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/authentication>

### NEW QUESTION # 139

A company uses SharePoint for its intranet and other functions. The company has also implemented model-driven apps.

SharePoint users must be able to create contact records in the Common Data Service (CDS), without having to navigate to the model-driven apps.

You need to create a link in SharePoint to open the CDS contact from displaying data from SharePoint.

How should you complete the URL? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation

Box 1: main.aspx

Example, to open the Active Contacts view.

<https://myorg.crm.dynamics.com/main.aspx?etn=contact&pagetype=entitylist&viewid={00000000-0000-0000-0000-000000000000}>

Box 2: etn Etn: The logical name of the entity. Important: Do not use the etc (entity type code) parameter that contains an integer code for the entity.

This integer code varies for custom entities in different organizations.

Box 3: Extraqs

Extraqs: Optional for forms. This parameter contains encoded parameters within this parameter.

When you open a new form by using the URL address, you can include arguments in the extraqs parameter to set field values Note: You must encode the parameters passed in the extraqs parameter. To encode the parameters, use encodeURIComponent. To use special characters like "=" or "&" in the parameter values, you must double encode (e.g. to set name to A=B&C, it would be extraqs=name%3DA%253DB%2526C).

Box 4: entitylist

Pagetype: The type of page. There are two possible values:

- entityrecord

Displays an entity record form

- entitylist

Displays an entity view.
