## Exam Dumps EXIN CDCP Provider | New CDCP Dumps Pdf

You only need 20-30 hours to learn our CDCP Test Braindumps and then you can attend the exam and you have a very high possibility to pass the exam. For many people whether they are the in-service staff or the students they are busy in their job, family lives and other things. But you buy our CDCP prep torrent you can mainly spend your time energy and time on your job, the learning or family lives and spare little time every day to learn our Certified Data Centre Professional (CDCP) exam torrent. Owing to the superior quality and reasonable price of our exam materials, our exam torrents are not only superior in price than other makers in the international field, but also are distinctly superior in many respects.

## EXIN CDCP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Designing a Scalable Network Infrastructure: It covers ANSI</li><li>TIA-942 cabling hierarchy, network redundancy, structured Cabling System, and planning considerations.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Data Centre Location, Building and Construction: It focuses on appropriate sites and components of an effective data centre and supporting facilities setup.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Electro Magnetic Fields: The topic deals with effects of EMF on human health and equipment (H)EMP, standards, and EMF shielding solutions.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Physical Security and Safety: Sub-topics are about physical security considerations and physical safety considerations.</li></ul>

Topic 5	<ul style="list-style-type: none"> <li>Auxiliary Systems: The topic covers water leak detection systems, data centre monitoring requirements, EMS, BMS and DCIM.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Light: This topic covers light fixture types and placement, emergency lighting, and emergency Power Supply (EPS).</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>Raised Floor</li> <li>Suspended Ceiling: The topic discusses applicable standards, signal reference grid, and disability act and regulations.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>Power Infrastructure: It focuses ATS and STS systems, redundancy levels and techniques, static and dynamic UPS systems, battery types, thermo-graphics, and renewable energy factor (REF).</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>Equipment Racks: It discusses power rail</li> <li>strip options, security considerations, and rack standards, properties and selection criteria.</li> </ul>
Topic 10	<ul style="list-style-type: none"> <li>Cooling Infrastructure: The topic focuses on liquid immersion cooling, supplemental cooling options, sensible and latent heat definitions, and temperature and humidity recommendations.</li> </ul>

## EXIN Certified Data Centre Professional (CDCP) Sample Questions (Q17-Q22):

### NEW QUESTION # 17

Which formula can provide a simple 'cost of downtime per hour" without taking seasonality and other factors into account?

- A. Revenue/52
- B. Revenue/8760**
- C. Revenue/365
- D. Revenue/1024

**Answer: B**

Explanation:

8760 is the number of hours in a year ( $24 \text{ hours} \times 365 \text{ days}$ ). Dividing annual revenue by 8760 gives a basic average revenue per hour, commonly used in downtime cost calculations.

### NEW QUESTION # 18

Which Class of Fires involves ordinary combustible materials such as paper, wood and cloth?

- A. Class B
- B. Class D
- C. Class A**
- D. Class K

**Answer: C**

Explanation:

According to the CDCP Preparation Guide, Class A fires involve ordinary combustible materials such as paper, wood and cloth. These materials leave behind ash or embers when they burn. Class A fires can be extinguished by water or other cooling agents that reduce the temperature of the fuel below its ignition point.

### NEW QUESTION # 19

When dealing with glass door racks, cool air is injected into the rack from:

- A. The top of the rack through the fans and vents mounted inside the rack.
- B. The front door in a downflow direction.
- **C. The rear door in a downflow direction.**
- D. The bottom of the rack.

**Answer: C**

Explanation:

Glass door racks are a type of rack that have solid glass front doors and rear door heat exchangers (RDHx).

RDHx are devices that use facility coolant to absorb heat from the exhaust air of the IT equipment and return cool air to the room. RDHx can be either passive or active, depending on the fan configuration. In general, IT hardware within the rack is air-cooled and the door heat exchanger uses facility coolant to absorb heat from exhaust air to return air to the facility at or near inlet air temperature to the rack. This rear door heat exchanger can either be a passive or active solution. When dealing with glass door racks, cool air is injected into the rack from the rear door in a downflow direction. This means that the cool air flows from the top to the bottom of the rack, following the natural convection of the hot air rising. This way, the cool air can reach all the IT equipment in the rack and prevent hot spots or overheating.

### NEW QUESTION # 20

Which one of the following is an Objective of Data Center Fire Protection?

- A. Depression
- B. Information
- **C. Suppression**
- D. Representation

**Answer: C**

Explanation:

The objective of data center fire protection is to suppress or extinguish a fire before it can cause significant damage to the equipment, personnel, or business continuity. Fire suppression systems are designed to reduce the heat, oxygen, or fuel elements of the fire triangle, and to limit the spread of fire and smoke. Fire suppression systems can be classified into two types: water-based and gas-based. Water-based systems include sprinklers, mist, and water spray systems, which use water as the extinguishing agent. Gas-based systems include inert gas, halocarbon, and clean agent systems, which use gases or chemicals as the extinguishing agent. The choice of fire suppression system depends on several factors, such as the fire risk, the type of fuel, the environmental impact, the reliability, the cost, and the compatibility with the data center equipment and operations.

### NEW QUESTION # 21

The termination of the ability of a product to perform its required function can be defined as.

- A. Hindrance
- **B. Failure**
- C. Obstacle
- D. Termination

**Answer: B**

Explanation:

According to the EPI Data Centre Professional (CDCP) Preparation Guide, failure is defined as "the termination of the ability of a product to perform its required function" (page 9). Failure can occur due to various reasons, such as wear and tear, design flaws, human errors, environmental factors, or external events.

Failure can affect the availability, reliability, and performance of a product, system, or service.
