

# Pass4Leader AZ-120 Cert Guide

P.S. Free & New AZ-120 dumps are available on Google Drive shared by Pass4Leader: [https://drive.google.com/open?id=1kd\\_wAu9\\_wpIxoKGsW9TmFEtnQWEjY1Ha](https://drive.google.com/open?id=1kd_wAu9_wpIxoKGsW9TmFEtnQWEjY1Ha)

More and more people look forward to getting the AZ-120 certification by taking an exam. However, the exam is very difficult for a lot of people. Especially if you do not choose the correct study materials and find a suitable way, it will be more difficult for you to pass the exam and get the Microsoft related certification. If you want to get the related certification in an efficient method, please choose the AZ-120 learning dumps from our company. We can guarantee that the study materials from our company will help you pass the exam and get the certification in a relaxed and efficient method.

Earning the AZ-120 certification demonstrates an individual's expertise in deploying and managing SAP workloads on Azure. It is a valuable credential for IT professionals who work with SAP systems, as well as those who are responsible for managing cloud infrastructure. By passing AZ-120 Exam, candidates can demonstrate their proficiency in leveraging Azure services to optimize performance and ensure the security and availability of SAP applications in the cloud.

## Microsoft AZ-120 Reliable Test Syllabus, AZ-120 Examcollection Vce

As we discussed above that the Planning and Administering Microsoft Azure for SAP Workloads (AZ-120) exam preparation material is available in three different formats. One of them is Microsoft AZ-120 PDF questions format which is portable. Users of this format can print Planning and Administering Microsoft Azure for SAP Workloads (AZ-120) real exam questions in this file to study without accessing any device. Furthermore, smart devices like laptops, smartphones, and tablets support the AZ-120 PDF Questions. Hence, you can carry this material to any place and revise AZ-120 exam questions conveniently without time restrictions.

## Microsoft Planning and Administering Microsoft Azure for SAP Workloads Sample Questions (Q100-Q105):

### NEW QUESTION # 100

You deploy an Azure Internal load balancer.

You deploy a node of an SAP NetWeaver 7.4 ABAP system named SP1.

You plan to deploy a second node.

You need to verify that the health probe port is configured for the cluster. The cluster IP address resource name is SAP SP1 IP.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

### NEW QUESTION # 101

You are planning replication of the SAP HANA database for the disaster recovery environment in Azure.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
You must use synchronous replication.	<input type="radio"/>	<input type="radio"/>
You must use delta data shipping for operation mode.	<input type="radio"/>	<input type="radio"/>
You must configure an Azure Directory (Azure AD) application to manage the failover.	<input type="radio"/>	<input type="radio"/>

**Answer:**

Explanation:

Statements	Yes	No
You must use synchronous replication.	<input type="radio"/>	<input checked="" type="radio"/>
You must use delta data shipping for operation mode.	<input type="radio"/>	<input checked="" type="radio"/>
You must configure an Azure Directory (Azure AD) application to manage the failover.	<input checked="" type="radio"/>	<input type="radio"/>

#### NEW QUESTION # 102

You are implementing a highly available deployment of SAP HANA on Azure virtual machines. You need to ensure that the deployment meets the following requirements:

- \* Supports host auto-failover
- \* Minimizes cost

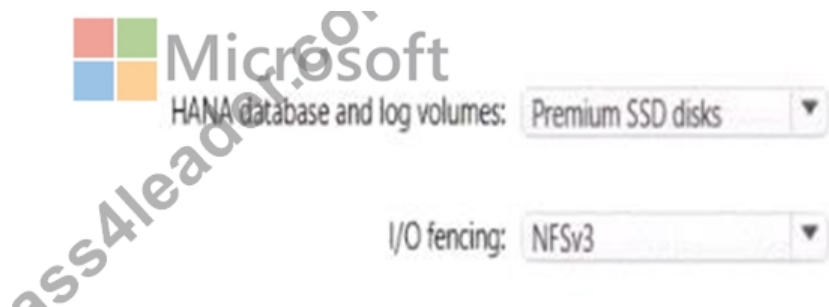

How should you configure the highly available components of the deployment? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Answer selected as in image below.

Topic 2, Litware, inc  
Overview

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all question include on this exam in the time provided.

To answer the question included in a case study, you will need to reference information that is provided in the case study. Case studies might contain and other resources that provide information about the scenario that is describe in the case study. Each question is independent of the other question in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answer and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To Start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such the content requirements, existing environment, and problem statements, if the case study has an All Information tab, note that the information displayed its identical to the information displayed on the subsequence tabs. When you are ready to answer a question click the Question button to return to the question.

Overview

Litware, inc. is an international manufacturing company that has 3,000 employees.

Litware has two main offices. The offices are located in Miami, FL, and Madrid Spain.

Segmen

Existing Environment

Infrastructure

Litware currently uses a third-party provider to host a datacenter in Miami and a disaster recovery datacenter in Chicago, it.

The network contains an Active Directory domain named litware.com.Litware has two third-party applications hosted in Azure.

Litware already implemented a site-to-site VPN connection between the on-premises network and Azure.

SAP Environment

Litware currently runs the following SAP products:

- \* Enhancement Pack 6 for SAP ERP Central Component 6.0 (SAP ECC 6.0)
- \* SAP Extended Warehouse Management (SAP EWM)
- \* SAP Business Warehouse (SAP BW)
- \* SAP NetWeaver Process Integration (PI)
- \* SAP Solution Manager

All users run on the Windows Server platform. All databases use Microsoft SQL Server. Currently, you have 20 production servers.

You have 30 non-production servers including five testing severs, five development servers, five quality assurance (QA) servers, and 15 pre=production servers.

Currently, all SAP applications are in the litware.com domain.

Problem Statements

The current version of SAP ECC has a transaction that, when run in batches overnight, tables eight hours to complete. You confirm that upgrading to SAP Business Suite on HANA will improve performance because of code changes and the SAP HANA database platform.

Litware is dissatisfied with the performance of its current hosted infrastructure vendor. Litware experienced several hardware failures and the vendor struggled to adequately its 24/7 business operation.

Business Goals

Litware identifies the following business goals:

- \* Increase the performance of SAP ECC application by moving to SAP HANA. All other database will remain on SQL Server.
- \* Move away from the current infrastructure vendor to increase the stability and availability of the SAP services.
- \* Use the new Environment, Health and Safety (EH&S) in Recipe Management function.
- \* Ensure that any migration activities can be completed within a 48-hour period during a weekend.

Planned Changes

Litware identifies the following planned changes:

- \* Migrate SAP to Azure.
- \* Upgrade and migrate SAP ECC to SAP business Suite on HANA Enhancement Pack 8.

Technical Requirements

Litware identifies the following technical requirements:

- \* Implement automated backups.
- \* Support load testing during the migrate.
- \* Identify opportunities to reduce costs during the migration.
- \* Continue to use the Litware.com domain for all SAP landscapes.
- \* Ensure that all SAP applications and databases are highly available.
- \* Remove all SAP components from the on-premises network once the migrate is complete.
- \* Minimize the purchase of additional SAP licenses. SAP HANA license were already purchased.
- \* Ensure that SAP can provide technical support for all the SAP landscapes deployed to Azure.

#### NEW QUESTION # 104

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
The Azure Enhanced Monitoring Extension for SAP stores performance data in an Azure Storage account.	<input type="radio"/>	<input type="radio"/>
You can enable the Azure Enhanced Monitoring Extension for SAP on a SUSE Linux Enterprise Server 12 (SLES 12) server by running the Set-AzVMAEMExtension cmdlet.	<input type="radio"/>	<input type="radio"/>
You can enable the Azure Enhanced Monitoring Extension for SAP on a server that runs Windows Server 2016 by running the Set-AzVMAEMExtension cmdlet.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
The Azure Enhanced Monitoring Extension for SAP stores performance data in an Azure Storage account.	<input checked="" type="radio"/>	<input type="radio"/>
You can enable the Azure Enhanced Monitoring Extension for SAP on a SUSE Linux Enterprise Server 12 (SLES 12) server by running the Set-AzVMAEMExtension cmdlet.	<input checked="" type="radio"/>	<input type="radio"/>
You can enable the Azure Enhanced Monitoring Extension for SAP on a server that runs Windows Server 2016 by running the Set-AzVMAEMExtension cmdlet.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation:

Box 1: Yes

The SAP Azure Enhanced Monitoring Extension builds on top of the Azure Diagnostic extension, which stores its data in an Azure

Storage account that you specify.

Box 2: Yes

The Set-AzVMAEMExtension cmdlet updates the configuration of a virtual machine to enable or update the support for monitoring for SAP systems that are installed on the virtual machine. The cmdlet installs the Azure Enhanced Monitoring (AEM) extension that collects the performance data and makes it discoverable for the SAP system.

The -OSType specifies the OS. Either Windows or Linux.

Box 3: Yes
