Certification Trend Deep-Security-Professional Torrent - Excellect Deep-Security-Professional Pass Rate

Our company have the higher class operation system than other companies, so we can assure you that you can start to prepare for the Deep-Security-Professional exam with our study materials in the shortest time. In addition, if you decide to buy Deep-Security-Professional exam materials from our company, we can make sure that your benefits will far exceed the costs of you. The rate of return will be very obvious for you. We sincerely reassure all people on the Deep-Security-Professional Test Question from our company and enjoy the benefits that our study materials bring. We believe that our study materials will have the ability to help all people pass their Deep-Security-Professional exam and get the related exam in the near future.

Trend Micro Certified Professional for Deep Security Sample Questions (Q74-Q79):

NEW QUESTION # 74

Which of the following statements regarding the Integrity Monitoring Protection Module is true?

- A. Any changes to monitored system objects that are detected after a Recommendation Scan is run on the protected computer are assumed to be malicious.
- B. The Integrity Monitoring Protection Module can detect changes to the system, but lacks the ability to distinguish between legitimate and malicious changes.
- C. The Integrity Monitoring rules include a property that identifies whether a change to a monitored system object was performed as part of a legitimate operation.
- D. Any changes to the system objects monitored by the Integrity Monitoring Protection Module are assumed to be legitimate, however, an administrator can revise the status of the object modification to Malicious during a review of the Integrity Monitoring Events.

Answer: B

Explanation:

integrity-monitoring-set-up

NEW QUESTION # 75

New servers are added to the Computers list in Deep Security Manager Web config by running a Discover operation. What behavior can you expect for newly discovered computers?

- A. Any servers discovered in the selected Active Directory branch hosting a Deep Security Agent will be added to the Computers list.
- B. Any servers within the IP address range hosting a Deep Security Agent will be added to the Computers list.
- C. Any servers within the IP address range will be added to the Computers list, regardless of whether they are hosting a Deep Security Agent or not.
- D. Any servers within the IP address range that are hosting Deep Security Agents will be added to the Computers list and will be automatically activated.

Answer: B

Explanation:

When running a Discovery operation with Automatically Resolve IPs to hostnames enabled, it is possible that the discovery operation will find hostnames where Deep Security Manager can not.

Discovery is able to fall back to using a WINS query or NetBIOS broadcast to resolve the hostname in addition to DNS. Deep Security Manager only supports hostname lookup via DNS.

* Computers identified with this method can be automatically assigned a group, but not a policy.

* Agent software found on those computers will NOT be automatically activated.

* If a computer is listed through other detection methods, it will NOT be listed in the results of this search.

Study Guide - pages (345, 80)

NEW QUESTION # 76

Based on the script displayed in the exhibit, which of the following statements are correct? Select all that apply.

- A. This script will deploy the Deep Security Agent on a server, but will not automatically activate it.
- B. Deep Security Agents deployed using this script will be assigned a specific policy when activated.
- C. Deep Security Agents deployed using this script are activated against a specific tenant.
- D. Deep Security Agents deployed using this script will be activated against Tenant 0 in a multi-tenant environment.

Answer: B,C

NEW QUESTION # 77

Based on the configuration setting highlighted in the exhibit, what behavior can be expected during a malware scan?

- A. With the highlighted setting enabled, Deep Security Agents will scan files for viruses and malware using supplementary aggressive detection pattern files.
- B. With the highlighted setting enabled, Deep Security Agents will scan files for known malware as well as newly encountered

malware by accessing the Suspicious Objects List.

- C. With the highlighted setting enabled, Deep Security Agents will scan files for known viruses and malware using patterns and any files deemed suspicious will be submitted to a configured Deep Discovery Analyzer for further analysis.
- D. With the highlighted setting enabled, Deep Security Agents will scan files for unknown malware using Predictive Machine Learning.

Answer: B

NEW QUESTION # 78

Based on the Malware Scan Configuration displayed in the exhibit, which of the following statements is false.

□

- A. Deep Security Agents will only be able to identify malware in files by using patterns downloaded from the Smart Protection Network.
- B. Any document files that display suspicious behavior will be submitted and executed in a sandbox environment on a Deep Discover Analyzer device.
- C. Internet access is required to properly enable the features identified in this configuration.
- D. Deep Security Agents using this Malware Scan Configuration will not monitor for compromised Windows processes.

Answer: D

Explanation:

Configure Malware Scan

NEW QUESTION # 79

.....

There are a lot of advantages of our APP online version. On one hand, the online version of our Deep-Security-Professional exam questions can apply in all kinds of the electronic devices. In addition, the online version of our Deep-Security-Professional training materials can work in an offline state. If you buy our products, you have the chance to use our study materials for preparing your exam when you are in an offline state. We believe that you will like the online version of our Deep-Security-Professional Exam Questions.
