Terraform-Associate-004 Reliable Dumps Free & Reliable Terraform-Associate-004 Braindumps Questions

Our Terraform-Associate-004 study material is the most popular examination question bank for candidates. Terraform-Associate-004 study material has helped thousands of candidates successfully pass the exam and has been praised by all users since it was appearance. Terraform-Associate-004 study material has the most authoritative test counseling platform, and each topic in Terraform-Associate-004 Study Materials is carefully written by experts who are engaged in researching in the field of professional qualification exams all the year round. They have a very keen sense of change in the direction of the exam, so that they can accurately grasp the important points of the exam.

HashiCorp Terraform-Associate-004 Exam Syllabus Topics:

Topic	Details
Topic 1	• Terraform modules: This domain explains organizing and reusing code through modules, understanding variable scope between modules, implementing modules in configurations, and managing module versions.
Topic 2	• Terraform configuration: This domain covers writing Terraform code including resources and data blocks, using variables and outputs, handling complex types, creating dynamic configurations with expressions and functions, managing dependencies, implementing validation, and handling sensitive data.
Topic 3	• Infrastructure as Code (IaC) with Terraform: This domain covers the foundational concept of Infrastructure as Code and how Terraform enables managing resources across multiple cloud providers and services through a unified workflow.

Topic 4	• Terraform fundamentals: This domain addresses installing and managing provider plugins, understanding Terraform's provider architecture, and how Terraform tracks infrastructure state.
Topic 5	• Core Terraform workflow: This domain focuses on the essential workflow steps: initializing directories, validating configurations, generating execution plans, applying changes, destroying infrastructure, and formatting code.

HashiCorp Certified: Terraform Associate (004) (HCTA0-004) Sample Questions (Q24-Q29):

NEW QUESTION # 24
What kind of configuration block will create an infrastructure object with settings specified within the block?

- A. resource
- B. data
- C. provider
- D. state

Answer: A

Explanation:
This is the kind of configuration block that will create an infrastructure object with settings specified within the block. The other options are not used for creating infrastructure objects, but for configuring providers, accessing state data, or querying data sources.

NEW QUESTION # 25
Terraform can only manage resource dependencies if you set them explicitly with the depends_on argument.

- A. True
- B. False

Answer: B

Explanation:
Terraform can manage resource dependencies implicitly or explicitly. Implicit dependencies are created when a resource references another resource or data source in its arguments. Terraform can infer the dependency from the reference and create or destroy the resources in the correct order. Explicit dependencies are created when you use the depends_on argument to specify that a resource depends on another resource or module.
This is useful when Terraform cannot infer the dependency from the configuration or when you need to create a dependency for some reason outside of Terraform's scope. References = : Create resource dependencies : Terraform Resource Dependencies Explained

NEW QUESTION # 26
Why does this backend configuration not follow best practices?

- A. You should not store credentials in Terraform configuration
- B. An alias meta-argument should be included in backend blocks whenever possible
- C. You should use the local enhanced storage backend whenever possible
- D. The backend configuration should contain multiple credentials so that more than one user can execute terraform plan and terraform apply

Answer: A

Explanation:
This is a bad practice, as it exposes your credentials to anyone who can access your configuration files or state files. You should use environment variables, credential files, or other mechanisms to provide credentials to Terraform.

NEW QUESTION # 27
Any user can publish modules to the public Terraform Module Registry.

- **A. True**
- B. False

Answer: A

Explanation:
The Terraform Registry allows any user to publish and share modules. Published modules support versioning, automatically generate documentation, allow browsing version histories, show examples and READMEs, and more. Public modules are managed via Git and GitHub, and publishing a module takes only a few minutes. Once a module is published, releasing a new version of a module is as simple as pushing a properly formed Git tag1.
References = The information can be verified from the Terraform Registry documentation on Publishing Modules provided by HashiCorp Developer1.

NEW QUESTION # 28
What is modified when executing Terraform inrefresh-only mode?

- A. Your cloud infrastructure.
- B. Your Terraform configuration.
- **C. Your state file.**
- D. Your Terraform plan.

Answer: C

Explanation:
Inrefresh-only mode(terraform apply -refresh-only), Terraformupdates the state fileto match the actual infrastructurewithout modifying resources.
A (Terraform configuration)-Not modifiedin refresh-only mode.
B (Terraform plan)-Plan is generated but not modified.
D (Cloud infrastructure)-Not modifiedin refresh-only mode.
Official Terraform Documentation Reference:
Refresh-Only Mode

NEW QUESTION # 29
......

Some candidates may purchase our Terraform-Associate-004 software test simulator for their companies. They will ask us how many personal computers our soft version can be install. In fact we have no limit for computer quantity. So if you purchase our Terraform-Associate-004 software test simulator, it supports multi-users at the same time. It can be installed on computers without any limits. If you are a training school, it is suitable for your teachers to present and explain casually. Good Terraform-Associate-004 software test simulator have high passing rate and TestSimulate are looking forward to your long-term cooperation.
