NEW QUESTION # 408

Select the answer that correctly completes the sentence.

Azure Blob Storage is a data store for queuing and reliably delivering messages between applications. file share that can be mapped as a network drive. key/attribute store for non-relational, structured data. storage service optimized for very large objects, such as video files and bitmaps.

Answer:

Explanation:

Azure Blob Storage is a

data store for queuing and reliably delivering messages between applications.
file share that can be mapped as a network drive.
key/attribute store for non-relational, structured data.
storage service optimized for very large objects, such as video files and bitmaps.

NEW QUESTION # 409

Match the Azure service to the correct description.

Instructions: To answer, drag the appropriate Azure service from the column on the left to its description on the right. Each service may be used once, more than once, or not at all NOTE: Each correct match is worth one point.

Answer Options	Answer Area
Azure HDInsight	A managed relational cloud database service
Azure Data Lake Analytics	A cloud-based service that leverages massively parallel processing (MPP) to quickly run complex queries across petabytes of data in a relational database
Azure Synapse Analytics	Can run massively parallel data transformation and processing programs across petabytes of data
Azure SQL Database	An open-source framework for the distributed

Answer:

Explanation:

Answer Options	Answer Area
Azure HDInsight	Azure SQL Database A managed relational cloud database service
Azure Data Lake Analytics	Azure HDInsight A cloud-based service that leverages massively parallel processing (MPP) to quickly run complex queries across petabytes of data in a relational database
Azure Synapse Analytics	Azure Data Lake Analytics Can run massively parallel data transformation and processing programs across petabytes of data
Azure SQL Database	Azure Synapse Analytics An open-source framework for the distributed

Explanation:

Azure SQL Database	A managed relational cloud database service.
Azure SQL Data Warehouse	A cloud-based service that leverages massively parallel processing (MPP) to quickly run complex queries across petabytes of data in a relational database
Azure Data Lake Analytics	Can run massively parallel data transformation and processing programs across petabytes of data
Azure Synapse Analytics	An open-source framework for the distributed processing and analysis of big data sets in clusters

Azure Synapse Analytics

NEW QUESTION # 410

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
A single Microsoft account can be used to manage multiple Azure subscriptions.	<input type="radio"/>	<input type="radio"/>
