For candidate who wants a better job through obtaining a certificate, passing the exam becomes significant. Our 1z0-1054-25 Study Materials will offer you a chance like this. Our 1z0-1054-25 study guide is known for the high quality and high accuracy. We are pass guarantee and money back guarantee for our customers. If you can get the certificate, you will have a better competitive power in the job market and have more opportunity.

Oracle Financials Cloud: General Ledger 2025 Implementation Professional Sample Questions (Q79-Q84):

NEW QUESTION # 79

You are using the Create Budgets in a Spreadsheet option to load your budget balances into the General Ledger balances cube. Your FYXX Budget is not appearing in the Budget Name list of values. What are two reasons for this?

- A. Transfer Budget Balances to Budget Cubes has not been run.
- B. Publish Chart of Accounts Dimension Members and Hierarchies to the Balances Cube has not been run.
- C. Budgeting is not enabled in the Ledger options.
- **D. A value for the budget scenario is not created.**
- **E. The Create Scenario Dimension Members program has not been run.**

Answer: D,E

Explanation:

To use the Create Budgets in a Spreadsheet option, you need to have a budget scenario value and a scenario dimension member for your budget. A budget scenario value is a user-defined value that identifies a budget, such as FYXX Budget. A scenario dimension member is a member of the scenario dimension in the General Ledger balances cube that corresponds to a budget scenario value, such as FYXX_Budget. You can create budget scenario values and scenario dimension members using the Manage Budget Scenario Values task or the Create Scenario Dimension Members program. If you do not create these values and members, your budget will not appear in the Budget Name list of values in the spreadsheet. Therefore, the two reasons for your issue are:

* A value for the budget scenario is not created: You need to create a budget scenario value for your budget using the Manage Budget Scenario Values task. This task enables you to define and maintain budget scenario values and their attributes, such as description, start date, end date, and status. You can also specify whether the budget scenario value is enabled for budgeting and reporting. You need to enable the budget scenario value for budgeting to use it in the spreadsheet.

* The Create Scenario Dimension Members program has not been run: You need to run the Create Scenario Dimension Members program to create scenario dimension members for your budget scenario values. This program automatically creates scenario dimension members for all budget scenario values that are enabled for budgeting and do not have existing scenario dimension members. You can run this program manually or schedule it to run periodically. You need to run this program after you create or update budget scenario values to ensure that they are reflected in the scenario dimension.

Create Budgets in a Spreadsheet

Manage Budget Scenario Values

Create Scenario Dimension Members

NEW QUESTION # 80

Which two can you use to import geographical data?

- A. SQL Data loader
- **B. File-based data import (FBDI)**
- C. ADF desktop integration
- **D. Geographical data providers**

Answer: B,D

NEW QUESTION # 81

Which two statements are true regarding the Intercompany Reconciliation Report? (Choose two.)

- A. You can only drill down to the general ledger journal and then from there to the subledger journal entry.
- B. The report displays all clearing company balancing lines for a period.
- C. The report can be run using an additional currency and conversion rate that converts all amounts into a common currency for comparison.
- D. The report includes Ledger balancing lines generated when the primary balancing segment value (BSV) is in balance, but either the second or third BSVs are not.
- E. The report displays the intercompany receivables and intercompany payables balances in summary for a period.

Answer: C,D

Explanation:

According to the Oracle documentation¹², the Intercompany Reconciliation Report can be run using an additional currency and conversion rate that converts all amounts into a common currency for comparison (option C). The report also includes ledger balancing lines generated when the primary balancing segment value is in balance, but either the second or third balancing segment values are not (option B). Option A is incorrect because you can drill down to the general ledger journal, subledger accounting entry, and source receivables or payables transaction². Option D is incorrect because the report displays the intercompany receivables and intercompany payables balances in summary for a period, and any differences between them¹. Option E is incorrect because the report does not display clearing company balancing lines².

NEW QUESTION # 82

Your customer is a financial institution that needs to maintain average daily balances (ADB). Which statement is true about this functionality in Oracle Fusion Cloud applications?

- A. When using ADB, you must define a transaction calendar and assign it to your ledger.
- B. Average balances are stored for both subledger and general ledger balances.
- C. Average balances are maintained for both actual and budget balances.

Answer: C

NEW QUESTION # 83

Which two are predefined roles in General Ledger?

- A. General Accounting Manager
- B. General Accounting Supervisor
- C. General Accountant
- D. General Accounting Clerk

Answer: A,C

NEW QUESTION # 84
