NEW QUESTION # 24

What are three components of an RFP? (Choose three.)

- A. a list of available IP addresses within their current IP allocation
- B. a list of design requirements
- C. general information about the existing network environment
- D. a list of devices to meet the design requirements
- E. the types of solutions that the design must include

Answer: B,C,E

NEW QUESTION # 25

In which two instances should you use Postman as part of network automation? (Choose two.)

- A. to perform prototyping of API requests
- B. to write custom scripts in the Python programming language
- C. to connect network infrastructure with cloud applications
- D. to receive real-time updates from a device without polling

Answer: A,C

Explanation:

Postman is commonly used to prototype API requests, making it ideal for testing and verifying network APIs before automation scripts are developed. It also helps in connecting network infrastructure to cloud applications by crafting and sending REST API calls to interact with cloud-based services and platforms.

NEW QUESTION # 26

What are the last two steps of business continuity planning? (Choose two.)

- A. assess the risks
- B. know your network
- C. formulate the plan
- D. test the plan

Answer: C,D

NEW QUESTION # 27

Where are path selections made for an SD-WAN router?

- A. local routing engine
- B. centralized controller
- C. physical interface card
- D. local packet forwarding engine

Answer: A

Explanation:

In SD-WAN, path selections are made at the local routing engine level on each SD-WAN router based on policies defined by the centralized controller. This allows for real-time, dynamic traffic steering without requiring per-packet decisions from the controller.

NEW QUESTION # 28

You are designing a solution to allow secure communication over the public Internet for a corporate WAN deployment. For

business policy reasons, all branch-to-branch traffic must first pass through the corporate headquarters. Which solution will work in this scenario?
