When upgrading to Cloud Pak for Data v4.7, why must an export/import of governance data be performed?

- A. Catalog data must be relocated to persistent storage.
- B. Components of Information Server have been removed from the product.
- C. The underlying Db2 repository has been altered.
- D. Containers are ephemeral and cannot persist the data.

Answer: C

Explanation:
During the upgrade to Cloud Pak for Data version 4.7, significant changes were made to the underlying metadata repository, which is powered by Db2. These changes affect how governance data is stored and accessed, and an export/import is necessary to ensure compatibility and data integrity. The export step extracts governance metadata using the supported utility, and after the upgrade, it is re-imported into the upgraded structure. This is not due to container ephemerality or storage changes, but because of schema and format changes in Db2.
