Our brilliant materials are the product created by those professionals who have extensive experience of designing exam study material.

Scrum Professional Scrum Master I Sample Questions (Q22-Q27):

NEW QUESTION # 22

User documentation is part of your definition of "Done". However, there aren't enough technical writers for all teams. Your Development Team doesn't have a technical writer. What should you do?

- A. Wait until you have a technical writer on your Development Team to take care of this.
- **B. Your Development Team is still responsible for creating user documentation. In this case, the Development Team members will write it.**
- C. Let the user documentation remain undone and accumulate until after the last development Sprint. It will then be done by any available technical writers.
- D. Form a separate team of technical writers that will work on an on-demand basis for the various Product Owners. Work order will be first in, first out.

Answer: B

Explanation:

According to the Scrum Guide, the Development Team is responsible for creating a "Done" Increment that meets the Definition of "Done". User documentation is part of the Definition of "Done" in this scenario, so the Development Team must create it. The other options are not consistent with Scrum values and principles, such as self-organization, cross-functionality, and empiricism.

NEW QUESTION # 23

During a Sprint Retrospective, the Development Team proposes moving the Daily Scrum to only occur on Tuesdays and Thursdays. Which two are the most appropriate responses for the Scrum Master? (Choose the best two answers.)

- A. Acknowledge and support the self-organizing team's decision.
- **B. Learn why the Development Team wants this and work with them to improve the outcome of the Daily Scrum.**
- C. Have the developers vote.
- D. Consider the request and decide on which days the Daily Scrum should occur.
- **E. Coach the team on why the Daily Scrum is important as an opportunity to update the plan.**

Answer: B,E

NEW QUESTION # 24

Which Scrum Values are exhibited by not building Product Backlog items that have low business value? (Choose three.)

- **A. Courage.**
- **B. Respect.**
- C. Earned Value.
- D. Economic Value Added.
- **E. Focus.**

Answer: A,B,E

Explanation:

According to the Scrum Guide¹, there are five values that guide decisions within Scrum teams:

Commitment

Focus

Openness

Respect

Courage

By not building Product Backlog items that have low business value, Scrum teams exhibit respect for their stakeholders and customers, as they deliver what is most valuable and relevant for them. They also exhibit focus, as they concentrate on what matters most for achieving their Product Goal and Sprint Goal. They also exhibit courage, as they are willing to say no to low-value work and face possible conflicts or disagreements.

NEW QUESTION # 25

A Scrum Team is required to deliver a done Increment by the end of a Sprint. Select two statements that explain what done means.

- **A. No work is left to meet the Definition of Done.**
- B. All work the Developers are willing to do.
- C. Ready for integration.
- **D. Ready to be released to end users.**
- E. Whatever the Product Owner defines as quality.

Answer: A,D

Explanation:

In Scrum, the term "done" refers to the state where the Increment meets the Definition of Done (DoD), which is a shared understanding within the Scrum Team of what it means for work to be complete. The best two answers are:

C). No work is left to meet the Definition of Done: This statement aligns with the Scrum Guide, which states that the Increment must be in a usable condition and meet the DoD by the end of the Sprint. The DoD ensures that the work is fully completed, tested, and integrated, leaving no outstanding tasks.

D). Ready to be released to end users: This reflects the goal of Scrum that the Increment should be in a potentially releasable state at the end of each Sprint, meaning it is of sufficient quality and functionality to be delivered to users if the Product Owner chooses to do so.

The other options are incorrect because:

A). Ready for integration: While integration is part of the process, "done" implies more than just being ready for integration; it includes being fully completed and meeting the DoD.

B). All work the Developers are willing to do: This is subjective and does not align with the objective standard of the DoD, which is agreed upon by the entire Scrum Team.

E). Whatever the Product Owner defines as quality: The DoD is a team responsibility, not solely defined by the Product Owner, ensuring a collective standard rather than an individual judgment.

NEW QUESTION # 26

The Product Owner makes sure the team selects enough from the Product Backlog for a Sprint to satisfy the stakeholders.

- A. True
- B. False

Answer: B

Explanation:

The correct answer is B, because the Product Owner does not make sure the team selects enough from the Product Backlog for a Sprint to satisfy the stakeholders. The Scrum Guide states that "the number of items selected from the Product Backlog for the Sprint is solely up to the Development Team. Only the Development Team can assess what it can accomplish over the upcoming Sprint." Therefore, the Development Team is responsible for choosing the scope of work for a Sprint.

NEW QUESTION # 27

.....

Pass4sures's expert team has developed a latest short-term effective training scheme for Scrum certification PSM-I exam, which is a 20 hours of training for the candidates of Scrum certification PSM-I exam.
