HOT Simulations 312-85 Pdf - High Pass-Rate ECCouncil Actual 312-85 Test: Certified Threat Intelligence Analyst

P.S. Kostenlose und neue 312-85 Prüfungsfragen sind auf Google Drive freigegeben von ZertFragen verfügbar: https://drive.google.com/open?id=173ZHURbJG5zsVvvOdzN5GYrjY7Vo9ShW

Die Produkte von ZertFragen sind von guter Qualität. Sie sind am schnellsten aktualisiert. Wenn Sie die Schulungsunterlagen zur ECCouncil 312-85 Zertifizierungsprüfung kaufen, können Sie die ECCouncil 312-85 Zertifizierungsprüfung sicher bestehen.

Das CTIA -Zertifizierungsprogramm ist ideal für Cybersecurity -Fachkräfte, IT -Fachkräfte, Strafverfolgungsbeamte und alle, die sich für den Bereich der Bedrohungsinformationen interessieren. Das Zertifizierungsprogramm soll Fachleuten helfen, die notwendigen Fähigkeiten zu entwickeln, um Cyber -Angriffe zu verhindern und ihre Organisationen vor verschiedenen Cyber -Bedrohungen zu schützen. Das Zertifizierungsprogramm soll auch Fachleuten helfen, die erforderlichen Kenntnisse und Fähigkeiten für die Arbeit in verschiedenen Branchen wie Finanzen, Gesundheitswesen und Regierung zu erlangen. Durch den Erwerb der CTIA -Zertifizierung können Fachkräfte ihr Fachwissen in der Bedrohungsintelligenz nachweisen und für ihre Organisationen wertvoller werden.

312-85 aktueller Test, Test VCE-Dumps für Certified Threat Intelligence Analyst

Unser ZertFragen bietet den Kandidaten nicht nur gute Produktem sondern auch vollständigen Service. Wenn Sie unsere Produkte benutzen, können Sie einen einjährigen kostenlosen Update-Service genießen. Wir benachrichtigen den Kandidaten in erster Zeit die neuen Prüfungsmaterialien zur ECCouncil 312-85 Zertifizierung mit dem besten Service.

Die CTIA -Prüfung (Eccouncil Certified Threat Intelligence Analyst) ist eine Zertifizierung, die die Fähigkeit einer Person validiert, eine umfassende Analyse von Bedrohungsinformationen durchzuführen. Die Zertifizierung soll Fachleuten mit den Kenntnissen und Fähigkeiten ausstatten, die für die Identifizierung und Minderung potenzieller Cyber -Bedrohungen erforderlich sind. Die Prüfung deckt verschiedene Themen ab, einschließlich der Intelligenzanalyse, der Bedrohungsidentifikation, der Cyber -Bedrohungslandschaft und der Bedrohungsintelligenzplattformen.

ECCouncil Certified Threat Intelligence Analyst 312-85 Prüfungsfragen mit Lösungen (Q27-Q32):

27. Frage
In which of the following forms of bulk data collection are large amounts of data first collected from multiple sources in multiple formats and then processed to achieve threat intelligence?

- A. Production form
- B. Hybrid form
- C. Unstructured form
- D. Structured form

Antwort: C

Begründung:
In the context of bulk data collection for threat intelligence, data is often initially collected in an unstructured form from multiple sources and in various formats. This unstructured data includes information from blogs, news articles, threat reports, social media, and other sources that do not follow a specific structure or format.
The subsequent processing of this data involves organizing, structuring, and analyzing it to extract actionable threat intelligence. This phase is crucial for turning vast amounts of disparate data into coherent, useful insights for cybersecurity purposes.References:
* "The Role of Unstructured Data in Cyber Threat Intelligence," by Jason Trost, Anomali
* "Turning Unstructured Data into Cyber Threat Intelligence," by Giorgio Mosca, IEEE Xplore

28. Frage
H&P, Inc. is a small-scale organization that has decided to outsource the network security monitoring due to lack of resources in the organization. They are looking for the options where they can directly incorporate threat intelligence into their existing network defense solutions.
Which of the following is the most cost-effective methods the organization can employ?

- A. Look for an individual within the organization
- B. Recruit managed security service providers (MSSP)
- C. Recruit the right talent
- D. Recruit data management solution provider

Antwort: B

Begründung:
For H&P, Inc., a small-scale organization looking to outsource network security monitoring and incorporate threat intelligence into their network defenses cost-effectively, recruiting a Managed Security Service Provider (MSSP) would be the most suitable option. MSSPs offer a range of services including network security monitoring, threat intelligence, incident response, and compliance management, often at a lower cost than maintaining an in-house security team. This allows organizations to benefit from expert services and advanced security technologies without the need for significant resource investment.References:
* "The Benefits of Managed Security Services," by Gartner
* "How to Choose a Managed Security Service Provider (MSSP)," by CSO Online

29. Frage
Tech Crunch Inc. has hired John, who is a professional threat intelligence analyst. He was asked to conduct threat intelligence analysis that provides contextual information about the security events and incidents that further help the organization to disclose

potential risks, provide greater insight into attacker methodologies, identify past malicious activities, and perform investigations on malicious activities in a more efficient way.
Identify the type of threat intelligence John is going to perform for the organization.

- A. Tactical threat intelligence
- B. Operational threat intelligence
- C. Strategic threat intelligence
- D. Technical threat intelligence

Antwort: B

Begründung:
The description focuses on contextual information about events and incidents, including attacker methodologies, risks, and historical malicious activity. This aligns with Operational Threat Intelligence.
Operational Threat Intelligence provides actionable insights about current or recent attacks, giving context that supports incident response and security operations. It connects individual technical indicators with the larger picture of attacker campaigns and motives.
Why the Other Options Are Incorrect:
* B. Strategic threat intelligence: Focuses on long-term, high-level planning for executives.
* C. Technical threat intelligence: Deals with raw indicators such as hashes, IPs, and URLs.
* D. Tactical threat intelligence: Focuses on adversary TTPs for defense operations, not contextual event analysis.
Conclusion:
John is performing Operational Threat Intelligence, which enriches event data with contextual information for investigation and response.
Final Answer: A. Operational threat intelligence
Explanation Reference (Based on CTIA Study Concepts):
CTIA defines operational threat intelligence as intelligence that provides context for incidents and ongoing attacks, helping organizations understand threats at a campaign or activity level.

30. Frage
Steve works as an analyst in a UK-based firm. He was asked to perform network monitoring to find any evidence of compromise. During the network monitoring, he came to know that there are multiple logins from different locations in a short time span. Moreover, he also observed certain irregular log in patterns from locations where the organization does not have business relations. This resembles that somebody is trying to steal confidential information.
Which of the following key indicators of compromise does this scenario present?

- A. Unexpected patching of systems
- B. Unusual activity through privileged user account
- C. Unusual outbound network traffic
- D. Geographical anomalies

Antwort: D

Begründung:
The scenario described by Steve's observations, where multiple logins are occurring from different locations in a short time span, especially from locations where the organization has no business relations, points to
'Geographical anomalies' as a key indicator of compromise (IoC). Geographical anomalies in logins suggest unauthorized access attempts potentially made by attackers using compromised credentials. This is particularly suspicious when the locations of these logins do not align with the normal geographical footprint of the organization's operations or employee locations. Monitoring for such anomalies can help in the early detection of unauthorized access and potential data breaches.

SANS Institute Reading Room, "Indicators of Compromise: Reality's Version of the Minority Report"
"Identifying Indicators of Compromise" by CERT-UK

31. Frage
As the CEO of a multinational corporation, you focus on making decisions that align with the organization's long-term goals and overall business strategies. What type of threat intelligence would be most valuable in guiding your decisions to enhance a company's resilience against emerging cyber threats?

- A. Tactical threat intelligence
- B. Strategic threat intelligence
- C. Operational threat intelligence
- D. Technical threat intelligence

Antwort: B

Begründung:
Strategic Threat Intelligence provides high-level insights into the overall threat landscape, long-term trends, and the potential impact of emerging cyber threats on business operations and strategy. It is primarily designed for executives, policymakers, and senior management to make informed decisions that align with organizational goals and risk tolerance.
This intelligence type translates complex technical data into business-relevant language, helping leadership understand:
* The motives and objectives of threat actors.
* The geopolitical or industry trends affecting cybersecurity risk.
* The overall security posture and areas requiring investment.
* How to allocate resources for long-term resilience and compliance.
Why the Other Options Are Incorrect:
* A. Operational Threat Intelligence:Focuses on ongoing campaigns and immediate threats relevant to security operations and incident response teams.
* B. Tactical Threat Intelligence:Deals with adversary Tactics, Techniques, and Procedures (TTPs) and is used by SOC and defense analysts for short-term defensive actions.
* D. Technical Threat Intelligence:Focuses on technical indicators such as IP addresses, hashes, and URLs, used for detection and blocking within security tools.
Conclusion:
For a CEO focusing on long-term strategic decisions and organizational resilience, the most valuable form of threat intelligence is Strategic Threat Intelligence.
Final Answer: C. Strategic Threat Intelligence
Explanation Reference (Based on CTIA Study Concepts):
As outlined in CTIA's section on Types of Threat Intelligence, strategic threat intelligence provides executive- level insights for planning and governance, supporting risk management and long-term decision-making.
