ISC CISSP (Certified Information Systems Security Professional) Exam is a globally recognized certification for information security professionals. CISSP exam is designed to test the candidate's knowledge and understanding of information security concepts, principles, and practices. Certified Information Systems Security Professional (CISSP) certification demonstrates the candidate's commitment to the field of information security and provides a credential that is highly valued by employers around the world.

The CISSP exam is offered by the International Information System Security Certification Consortium (ISC) and is designed for professionals who have at least five years of experience in the information security field. Certified Information Systems Security Professional (CISSP) certification is highly valued by employers as it demonstrates an individual's knowledge and expertise in information security. In addition, it provides a competitive edge to professionals seeking career advancement in this field.

The CISSP Certification Exam covers eight domains of information security, including security and risk management, asset security, security architecture and engineering, communication and network security, identity and access management, security assessment and testing, security operations, and software development security. CISSP exam is designed to test an individual's knowledge and understanding of these domains, as well as their ability to apply this knowledge in practical scenarios.

Answer: A

Explanation:
Source: TIPTON, Hal, (ISC)2, Introduction to the CISSP Exam presentation.

NEW QUESTION # 299
An application is used for funds transfer between an organization and a third-party. During a security audit, an issue with the business continuity/disaster recovery policy and procedures for this application. Which of the following reports should the audit file with the organization?

- A. Service Organization Control (SOC) 2
- B. Statement on Auditing Standards (SAS) 70
- C. Service Organization Control (SOC) 1
- D. Statement on Auditing Standards (SAS) 70-1

Answer: A

Explanation:
Service Organization Control (SOC) 2 is a report that provides information about the security, availability, processing integrity, confidentiality, and privacy of a service organization's system. It is intended for users who need assurance about the controls at a service organization relevant to security, availability, processing integrity, confidentiality, or privacy. A SOC 2 report can help an organization assess the business continuity/disaster recovery policy and procedures for an application that is outsourced to a third-party service provider.

NEW QUESTION # 300
What is called the percentage of valid subjects that are falsely rejected by a Biometric
Authentication system?

- A. Crossover Error Rate (CER)
- B. False Rejection Rate (FRR) or Type I Error
- C. True Rejection Rate (TRR) or Type III Error
- D. False Acceptance Rate (FAR) or Type II Error

Answer: B

Explanation:
The percentage of valid subjects that are falsely rejected is called the False
Rejection Rate (FRR) or Type I Error.
Source: KRUTZ, Ronald L. & VINES, Russel D., The CISSP Prep Guide: Mastering the
Ten Domains of Computer Security, 2001, John Wiley & Sons, Page 38

NEW QUESTION # 301
