With so many online resources, knowing where to start when preparing for an NREMT EMT exam can be tough. But with NREMT EMT practice test, you can be confident you're getting the best possible NREMT EMT Exam Dumps. NREMT exam mirrors the NREMT EMT exam-taking experience, so you know what to expect on NREMT EMT exam day.

The EMT practice exam we offered is designed with the real questions that will help you in enhancing your knowledge about the EMT certification exam. Our online test engine will improve your ability to solve the difficulty of EMT Real Questions and get used to the atmosphere of the formal test. Our experts created the valid EMT study guide for most of candidates to help them get good result with less time and money.

>> Pdf EMT Format <<

Take Your NREMT EMT Exam Prepare on the Go with PDF Format

We have three different versions of EMT exam questions on the formats: the PDF, the Software and the APP online. Though the content is the same, the varied formats indeed bring lots of conveniences to our customers. The PDF version of EMT exam Practice can be printed so that you can take it wherever you go. And the Software version can simulate the real exam environment and support offline practice. Besides, the APP online can be applied to all kind of electronic devices. No matter who you are, I believe you can do your best to achieve your goals through our EMT Preparation questions!

There are Candidates must know the topics before they start of preparation.

Our Test Prep EMT exam dumps will include the following topics:

- Airway, Respiration, and Ventilation 20%
- Medical / Obstetrics / Gynecology 28%
- EMS Operations 12%
- Trauma 21%
- Cardiology and Resuscitation 19%

How can you ready for Emergency Medical Technicians (EMT) Exam

For Emergency Medical Technicians (EMT) Exam, there is a study guide

Emergency Medical Technicians (EMT): Get our quick guide if you don't have time to read all the page.

The National Registry of Emergency Medical Technicians, or NREMT, is a nonprofit organization that helps maintain the skills, knowledge, and abilities of Emergency Medical Technicians (EMTs) in the United States. Although you probably know the important role EMUs play in our society, you may not be familiar with the proof required to become an emergency medical technician. NREMT manages a wide range of professional emergency medical tests, including First Aid, First Aid (EMR), First Aid Technicians (EMT), Advanced First Aid Technicians (AEMT), EMT -Intermediate / 99 (EMT- I / 99) and paramedics. Although the exams vary by type of emergency responder, they cover all the general knowledge and skills necessary to provide emergency medical services. In this guide, we'll cover everything you need to know about the EMT exam, including study tips, test content, scoring, the best NREMT practice exam, and much more.

NREMT Emergency Medical Technicians Exam Sample Questions (Q47-Q52):

NEW QUESTION # 47

A 26-year-old patient has an altered mental status. Family advises that the patient has diabetes. The patient's skin is pale, cool, and clammy. What, if anything, can the EMT infer about the patient's glucose level based on the patient's presentation?

- A. The patient's blood sugar is most likely normal.
- B. The patient's blood sugar is most likely high.
- C. The patient's blood sugar cannot be inferred.
- **D. The patient's blood sugar is most likely low.**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Altered mental status, combined with pale, cool, and clammy skin, is strongly suggestive of hypoglycemia (low blood sugar).

Hypoglycemia is especially dangerous in diabetics who take insulin or oral hypoglycemics.

The body's adrenergic response causes the "cool and clammy" presentation.

Hyperglycemia typically presents with warm, dry skin and develops more slowly. EMTs should administer oral glucose if the patient can swallow.

NREMT Medical Guidelines - Endocrine Emergencies

AAOS EMT Textbook (11th ed.), Chapter: Endocrine and Metabolic Emergencies National EMS Education Standards - Diabetic Emergencies

NEW QUESTION # 48

A 44-year-old patient with diabetes feels weak and dizzy. The EMT provides oral glucose and transports the patient to the hospital, where the patient recovers. The EMT tells their partner they did not provide the patient with a blanket because they felt the patient was wasting their time. What best describes the action the EMT took?

- **A. Negligence**
- B. Breach of ethics
- C. Battery

- D. Breach of duty

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Negligence occurs when an EMT:

- * Has a duty to act
- * Breaches that duty (e.g., by withholding basic care like warmth)
- * Causes harm or risk of harm
- * Establishes causation

The EMT's failure to treat the patient with respect and dignity - even if the patient improved - still constitutes negligence, especially if tied to a discriminatory or dismissive attitude.

Brady Emergency Care (13th ed.), Chapter: Legal and Ethical Responsibilities

NEW QUESTION # 49

A 23-year-old male fell down a flight of stairs, struck his head, and briefly lost consciousness. He opens his eyes when you ask him questions, knows his name, but doesn't know where he is or what happened.

He is able to squeeze your hands on command. What is his Glasgow Coma Score?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Use the Glasgow Coma Scale (GCS) to calculate:

- * Eye Opening (E): Opens to speech = 3
 - * Verbal Response (V): Confused but appropriate words = 4
 - * Motor Response (M): Obeys commands = 6
- Total = 3 + 4 + 6 = 13

However, the question states he opens eyes to voice, knows name (orientation to person), and follows commands - this would mean:

- * Eye = 3
- * Verbal = 5 (Oriented to person, but disoriented to place/time)
- * Motor = 6

Correct Total: 14

NEW QUESTION # 50

A 78-year-old female tripped and fell while walking. Her left leg is rotated externally and shorter than her right leg. You should suspect

- A. Posterior hip dislocation
- B. Colles' fracture
- **C. Proximal femur fracture**
- D. Pelvic fracture

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

An externally rotated, shortened leg is a classic sign of a proximal femur fracture, specifically a femoral neck or intertrochanteric fracture, commonly seen in elderly fall patients. This presentation reflects muscle pull and fracture displacement.

* Posterior hip dislocations cause internal rotation.

* Pelvic fractures may cause instability but not specific leg rotation/shortening.

* Colles' fracture is a distal radius (wrist) injury, unrelated to leg trauma.

National EMS Education Standards - Geriatric Trauma

AAOS Emergency Care (11th ed.), Chapter: Orthopedic Injuries

NEW QUESTION # 51

Which of the following techniques are appropriate for examining a patient with an acute abdomen?

Select the two correct options.

- A. Begin palpation with the most painful quadrant
- **B. Lie the patient supine with legs flexed**
- **C. Visualize the abdomen before palpation**
- D. Press softly if the abdomen has a pulsating mass
- E. Palpate the abdomen prior to auscultation

Answer: B,C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In patients with acute abdominal pain, you must first inspect (visualize) for distension, discoloration, or masses before touching. Palpation always begins away from the most painful area. The patient should be in a supine position with knees flexed to relax the abdominal muscles and ease the exam.

Palpating a pulsating mass could rupture an abdominal aortic aneurysm and is contraindicated.
