TrainingQuiz also offers a demo of the USGBC LEED-Green-Associate exam product which is absolutely free. Up to 1 year of free LEED Green Associate Exam (LEED-Green-Associate) questions updates are also available if in any case the sections of the USGBC LEED-Green-Associate Actual Test changes after your purchase. Lastly, we also offer a full refund guarantee according to terms and conditions if you do not get success in the LEED Green Associate Exam exam after using our LEED-Green-Associate product.

## USGBC LEED-Green-Associate Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Water Efficiency: This section of the exam measures the skills of water conservation specialists and covers strategies for reducing water usage both indoors and outdoors. It includes the use of gray water and rainwater in irrigation and the implementation of low-flow fixtures.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Location and Transportation: This section of the exam measures the skills of urban planners and covers site selection criteria and alternative transportation strategies. It emphasizes choosing sites that minimize environmental impact and promote sustainable transportation options.</li> </ul>

Topic 3	<ul style="list-style-type: none"> <li>• <b>Materials and Resources:</b> This section of the exam measures the skills of sustainable materials specialists and focuses on reuse, life-cycle impacts, waste management, and environmentally preferable purchasing practices. It highlights the importance of material selection in reducing environmental impacts.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Project Surroundings and Public Outreach:</b> This section of the exam measures the skills of community engagement specialists and covers the environmental impacts of buildings, green building codes, and the values of sustainable design. It also includes regional design considerations and public outreach strategies.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Sustainable Sites:</b> This section of the exam measures the skills of landscape architects and focuses on on-site assessment and design strategies that reduce environmental impact. It includes topics like habitat conservation, rainwater management, and exterior lighting.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• <b>Energy and Atmosphere:</b> This section of the exam measures the skills of energy efficiency engineers and covers building loads, energy efficiency measures, and alternative energy practices. It emphasizes commissioning, energy auditing, and the use of renewable energy sources.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• <b>Indoor Environmental Quality:</b> This section of the exam measures the skills of indoor air quality specialists and covers strategies for improving indoor air quality, lighting, acoustics, and occupant comfort. It emphasizes the use of low-emitting materials and green cleaning practices.</li> </ul>

## Quiz 2026 USGBC LEED-Green-Associate: Useful LEED Green Associate Exam Test Cram

We here guarantee that we will never sell the personal information of our candidates. There is no need for you to worry about the individual privacy under our rigorous privacy LEED-Green-Associate protection system. As regards purchasing, our website and LEED-Green-Associate study materials are absolutely safe and free of virus. For further consideration we will provide professional IT personnel to guide your installation and the use of our LEED-Green-Associate Study Materials remotely. So you can buy our LEED-Green-Associate study materials without any misgivings. If you have any questions, please you contact us online through the email.

### USGBC LEED Green Associate Exam Sample Questions (Q105-Q110):

#### NEW QUESTION # 105

Which of the following statements regarding non-potable water is true?

- **A. Stormwater runoff can be treated and used in a facility's cooling towers**
- B. Captured rainwater must be treated before it can be used to irrigate landscaping
- C. can be used for any household purpose as long as it is not consumed
- D. Blackwater can only be used for flush fixtures

**Answer: A**

Explanation:

Explanation

Stormwater runoff can indeed be treated and used in a facility's cooling towers. This is an example of using non-potable water (water that is not of drinking quality) for purposes that do not require potable water. Other uses for treated stormwater might include toilet flushing or irrigation. References: LEED Green Associate Candidate Handbook, U.S. Green Building Council resources

#### NEW QUESTION # 106

What is the best way to prevent a building's indoor pollutant(s)?

- A. Remove any pollutants that enter the building
- B. Test for radon
- **C. Eliminate or control pollutants at the source**

- D. Monitor carbon dioxide

**Answer: C**

Explanation:

The best way to prevent a building's indoor pollutant(s) is to eliminate or control pollutants at the source. Indoor pollutants are substances or particles that can adversely affect the indoor air quality (IAQ) of a building and the health, comfort, and productivity of the occupants. Indoor pollutants can originate from various sources, such as building materials, furnishings, cleaning products, combustion appliances, outdoor air, or occupant activities. Eliminating or controlling pollutants at the source can prevent them from entering or spreading in the indoor environment, which can reduce the exposure and risk for the occupants. Some examples of source control strategies are: using low-emitting materials, installing local exhaust ventilation, sealing combustion appliances, implementing green cleaning practices, and prohibiting smoking<sup>13</sup>. Reference: LEED v4 Green Associate Candidate Handbook<sup>1</sup>, EPA's Indoor Air Quality<sup>3</sup>

#### **NEW QUESTION # 107**

Flush out process is performed to remove which of the following?

- A. Blackwater
- B. Waste
- C. Graywater
- **D. voc**

**Answer: D**

Explanation:

Flush out process is performed to remove volatile organic compounds (VOCs) from the indoor air after construction or renovation<sup>12</sup>. VOCs are chemicals that can evaporate at room temperature and cause health problems, such as headaches, nausea, and irritation<sup>3</sup>. Flush out process involves supplying 100% outdoor air to the building for a certain period of time or until a certain amount of air changes are achieved<sup>12</sup>.

Flush-out documentation | LEEDuser<sup>1</sup>

Building flushout - option 2 | LEEDuser<sup>2</sup>

Volatile Organic Compounds' Impact on Indoor Air Quality | Indoor Air Quality (IAQ) | US EPA<sup>3</sup>

#### **NEW QUESTION # 108**

Which of the following credit categories does not have a prerequisite?

- A. Location and Transportation
- B. Materials and Resources
- **C. Water Efficiency**
- D. Indoor Environmental Quality

**Answer: C**

Explanation:

Water Efficiency is the only credit category that does not have a prerequisite in LEED v4 for Building Design and Construction. Prerequisites are the minimum requirements that all projects must meet to be eligible for LEED certification. They are mandatory and non-weighted, meaning they do not contribute to the project's score. The other credit categories have at least one prerequisite each, as shown in the table below:

Credit Category	Prerequisite
Location and Transportation	LEED for Neighborhood Development Location OR Sensitive Land Protection
Sustainable Sites	Construction Activity Pollution Prevention
Energy and Atmosphere	Fundamental Commissioning and Verification; Minimum Energy Performance; Fundamental Refrigerant Management
Materials and Resources	Storage and Collection of Recyclables; Construction and Demolition Waste Management Planning
Indoor Environmental Quality	Minimum Indoor Air Quality Performance; Environmental Tobacco Smoke Control

### NEW QUESTION # 109

Which impact categories have been identified as most important for a LEED project to accomplish?

- A. Increase return on investment, promote sustainable and regenerative material cycles
- B. Protect biodiversity and ecosystem services, improve business efficiency
- C. Reduce contribution to climate change, enhance human health and well-being
- D. Increase return on investment, promote human scale development

Answer: C

### NEW QUESTION # 110

.....

USGBC LEED-Green-Associate exam materials are successful with high efficiency and high quality to navigate you throughout the process. If you pay attention to using our LEED-Green-Associate practice engine, thing will be solved easily. We have favorable quality reputation in the mind of exam candidates these years by trying to provide high quality LEED Green Associate Exam LEED-Green-Associate Study Guide with the lowest prices while the highest quality.
